AUTH-01	D4	Platform Infrastructure	AUTH	Auth & Identity	Trader registration	As a trader, I can create an account with email and password on my prop firms domain so that I belong to that firm's tenant.	M	P0	V1-Core	Draft	BE-1	TEN-02	Build		salmancoz@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancoz@gmail.com	9/14/2026	V1.0
AUTH-02	D4	Platform Infrastructure	AUTH	Auth & Identity	Email verification	As the platform, I require new traders to verify their email before trading so that fake accounts are reduced.	S	P0	V2	Draft	BE-1	NOT-03	Build		salmancoz@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancoz@gmail.com	9/14/2026	V2.0
AUTH-03	D4	Platform Infrastructure	AUTH	Auth & Identity	Staff invitation	As a tenant admin, I can invite staff by email and assign a role so that they get scoped access without sharing credentials.	M	P0	V2	Draft	BE-2	AUTH-12, AUTH-14	Build		salmancoz@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancoz@gmail.com	9/14/2026	V2.0
AUTH-04	D4	Platform Infrastructure	AUTH	Auth & Identity	Login	As any user, I can log in with email and password and be placed in the correct tenant context from the domain so that I only see my firm's data.	M	P0	V1-Core	Draft	BE-1	TEN-01	Build		salmancoz@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancoz@gmail.com	9/14/2026	V1.0
AUTH-05	D4	Platform Infrastructure	AUTH	Auth & Identity	Password reset	As a user, I can reset a forgotten password through a single-use email link so that I regain access securely.	S	P0	V1-Core	Draft	BE-1	NOT-03	Build	Postmark	salmancoz@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancoz@gmail.com	9/14/2026	V1.0
AUTH-06	D4	Platform Infrastructure	AUTH	Auth & Identity	Social login	As a trader, I can sign up and log in with Google so that onboarding is faster.	M	P1	V2	Draft	BE-1	AUTH-01	Build		salmancoz@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancoz@gmail.com	9/14/2026	V2.0
AUTH-07	D4	Platform Infrastructure	AUTH	Auth & Identity	Token sessions	As the platform, I issue short-lived JWT access tokens with rotating refresh tokens and server-side revalidation so that stolen tokens expire quickly.	M	P0	V1-Core	Draft	BE-1		Build	Redis (self-hosted)	salmancoz@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancoz@gmail.com	9/14/2026	V1.0
AUTH-08	D4	Platform Infrastructure	AUTH	Auth & Identity	Session control	As a user, I can view my active sessions and log out of all devices so that I can remove access from a lost device.	S	P1	V2	Draft	BE-1	AUTH-07	Build		salmancoz@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancoz@gmail.com	9/14/2026	V2.0
AUTH-09	D4	Platform Infrastructure	AUTH	Auth & Identity	Staff 2FA	As a tenant admin or staff member, I must enroll TOTP two-factor at first login so that financial operations are protected.	M	P0	V1-Core	Draft	BE-2	AUTH-04	Build		salmancoz@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancoz@gmail.com	9/14/2026	V1.0
AUTH-10	D4	Platform Infrastructure	AUTH	Auth & Identity	Trader 2FA	As a trader, I can optionally enable TOTP two-factor so that my funded account is safer.	M	P1	V2	Draft	BE-2	AUTH-04	Build		salmancoz@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancoz@gmail.com	9/14/2026	V2.0
AUTH-11	D4	Platform Infrastructure	AUTH	Auth & Identity	2FA backup codes	As a 2FA user, I receive one-time backup codes so that I am not locked out if I lose my device.	S	P1	V2	Draft	BE-2	AUTH-09	Build		salmancoz@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancoz@gmail.com	9/14/2026	V2.0
AUTH-12	D4	Platform Infrastructure	AUTH	Auth & Identity	Role model	As the platform, I define Super Admin, Tenant Admin, custom staff roles, Trader, and API Consumer so that access maps to responsibility.	M	P0	V1-Core	Draft	BE-2	TEN-01	Build		salmancoz@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancoz@gmail.com	9/14/2026	V1.0
AUTH-13	D4	Platform Infrastructure	AUTH	Auth & Identity	Permission engine	As the platform, I enforce permission keys declared by each module in resource action format at the API layer so that modules plug-in without custom auth code.	L	P0	V1-Core	Draft	BE-2		Build		salmancoz@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancoz@gmail.com	9/14/2026	V1.0
AUTH-14	D4	Platform Infrastructure	AUTH	Auth & Identity	Custom roles	As a tenant admin, I can create roles and assign permission subsets so that staff access matches my org structure.	M	P0	V2	Draft	BE-2	AUTH-13	Build		salmancoz@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancoz@gmail.com	9/14/2026	V2.0
AUTH-15	D4	Platform Infrastructure	AUTH	Auth & Identity	Tenant scoping	As the platform, I restrict every query and action to the caller's tenant inside the data layer so that cross-tenant access is impossible by construction.	L	P0	V1-Core	Draft	BE-1	TEN-01, TEN-03	Build		salmancoz@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancoz@gmail.com	9/14/2026	V1.0
AUTH-16	D4	Platform Infrastructure	AUTH	Auth & Identity	Super admin separation	As a platform owner, my console identity cannot act inside a tenant except through audited impersonation so that tenant data stays protected.	M	P1	V1-Core	Draft	BE-2	AUTH-13	Build		salmancoz@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancoz@gmail.com	9/14/2026	V1.0
AUTH-17	D4	Platform Infrastructure	AUTH	Auth & Identity	Password policy	As the platform, I enforce minimum strength and length with regard to that credentials resist offline cracking.	S	P0	V1-Core	Draft	BE-1		Build		salmancoz@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancoz@gmail.com	9/14/2026	V1.0
AUTH-18	D4	Platform Infrastructure	AUTH	Auth & Identity	Login throttling	As the platform, I rate limit login attempts and lock accounts after repeated failures so that credential stuffing fails.	S	P0	V2	Draft	BE-1	GW-05	Build		salmancoz@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancoz@gmail.com	9/14/2026	V2.0
AUTH-19	D4	Platform Infrastructure	AUTH	Auth & Identity	Login history	As a user and as an admin, I can see recent logins with device and location so that suspicious access is visible.	M	P1	V2	Draft	BE-1	AUD-01	Build		salmancoz@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancoz@gmail.com	9/14/2026	V2.0
AUTH-20	D4	Platform Infrastructure	AUTH	Auth & Identity	Account suspension	As a tenant admin, I can suspend a user so that all their sessions and tokens are invalidated immediately.	S	P0	V1-Core	Draft	BE-1	AUTH-07	Build		salmancoz@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancoz@gmail.com	9/14/2026	V1.0
AUTH-21	D4	Platform Infrastructure	AUTH	Auth & Identity	Tenant API keys	As a tenant admin, I can issue, rotate, and revoke API keys for B2B integrations so that external systems authenticate without user credentials.	M	P1	V2	Draft	BE-2	AUTH-13, GW-01	Build		salmancoz@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancoz@gmail.com	9/14/2026	V2.0
AUTH-22	D4	Platform Infrastructure	AUTH	Auth & Identity	Auth audit	As the platform, I log every login, failed login, password change, role change, and key rotation to the audit log so that security events are traceable.	S	P0	V2	Draft	BE-1	AUD-01	Build		salmancoz@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancoz@gmail.com	9/14/2026	V2.0
AUTH-23	D4	Platform Infrastructure	AUTH	Auth & Identity	Staff IP allowlist	As a tenant admin on an enterprise plan, I can restrict staff logins to approved IP ranges so that office-only access is enforced.	M	P2	V2	Draft	BE-2	AUTH-04	Build		salmancoz@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancoz@gmail.com	9/14/2026	V2.0
AUTH-24	D4	Platform Infrastructure	AUTH	Auth & Identity	SSO federation	As a tenant admin on enterprise plan, I can configure SAML/OIDC SSO so that my staff uses corporate identity providers.	L	P2	V3	Draft	BE-2	AUTH-12	Build		salmancoz@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancoz@gmail.com	9/14/2026	V3.0
AUTH-25	D4	Platform Infrastructure	AUTH	Auth & Identity	SCM provisioning	As a tenant admin, I sync users from my identity provider via SCM so that staff onboarding is automated.	M	P2	V3	Draft	BE-2	AUTH-24	Build		salmancoz@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancoz@gmail.com	9/14/2026	V3.0
AUTH-26	D4	Platform Infrastructure	AUTH	Auth & Identity	Passwordless authentication	As a trader, I can log in with magic link or WebAuthn so that I avoid password fatigue.	M	P2	V3	Draft	BE-1	AUTH-04	Build		salmancoz@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancoz@gmail.com	9/14/2026	V3.0
AUTH-27	D4	Platform Infrastructure	AUTH	Auth & Identity	Admin forced logout	As a tenant admin with permission, I force logout all sessions of a specific trader without a full suspension, so that I can respond to suspected compromise proactively.	S	P1	V2	Draft	BE-1	AUTH-07	Build		salmancoz@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancoz@gmail.com	9/14/2026	V2.0
AUTH-28	D4	Platform Infrastructure	AUTH	Auth & Identity	Admin-assisted 2FA reset	As support staff with permission, I reset a trader or staff 2FA enrollment after identity checks, with audit and a cooldown on sensitive actions, so that a lost device does not permanently lock an account.	M	P0	V2	Draft	BE-2	AUTH-09, AUTH-10, AUD-01	Build		salmancoz@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancoz@gmail.com	9/14/2026	V2.0
AUTH-29	D4	Platform Infrastructure	AUTH	Auth & Identity	Email change flow	As a user, I change my account email only through confirmation to both old and new addresses with a cooldown on payouts and full audit, so that email change cannot be used as an account takeover path.	M	P1	V2	Draft	BE-1	AUTH-07, PAY-06	Build		salmancoz@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancoz@gmail.com	9/14/2026	V2.0
AUTH-30	D4	Platform Infrastructure	AUTH	Auth & Identity	Step-up authentication for sensitive actions	As the platform, I require a fresh 2FA challenge for sensitive actions such as payout method change, role change, and bulk suspension, so that a stolen session cannot perform high-risk operations.	M	P1	V2	Draft	BE-2	AUTH-09, AUTH-10, GW-17	Build		salmancoz@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancoz@gmail.com	9/14/2026	V2.0
AUTH-31	D4	Platform Infrastructure	AUTH	Auth & Identity	Terms acceptance log	As the platform, I record which version of terms, privacy, and risk disclaimer each user accepted at registration and reaccepted after changes, so that legal consent is provable per trader.	S	P0	V2	Draft	BE-1	TEN-13	Build		salmancoz@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancoz@gmail.com	9/14/2026	V2.0
AUTH-32	D4	Platform Infrastructure	AUTH	Auth & Identity	Registration abuse protection	As the platform, I block disposable email domains, rate limit registrations per IP and require a bot challenge on signup, so that fake account farms become expensive to run.	S	P1	V2	Draft	BE-1	GW-06, GW-20	Build		salmancoz@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancoz@gmail.com	9/14/2026	V2.0
AUTH-33	D4	Platform Infrastructure	AUTH	Auth & Identity	Enumeration-resistant flows	As the platform, login, password reset, and invite flows return identical responses for known and unknown emails, so that attackers cannot harvest valid accounts.	S	P1	V2	Draft	BE-1	AUTH-04	Build		salmancoz@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancoz@gmail.com	9/14/2026	V2.0
AUTH-34	D4	Platform Infrastructure	AUTH	Auth & Identity	Session policy configuration	As a tenant admin, I configure session lifetimes and remember-me policy separately for traders and staff, so that session risk matches firm policy.	S	P2	V2	Draft	BE-2	TEN-08, AUTH-07	Build		salmancoz@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancoz@gmail.com	9/14/2026	V2.0
AUTH-35	D4	Platform Infrastructure	AUTH	Auth & Identity	Self-serve account closure	As a trader, I close my own account only when no open positions, pending payouts, or open risk cases exist, with a retention notice, so that closure is safe and compliant.	M	P2	V2	Draft	BE-2	AUD-13, PAY-01	Build		salmancoz@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancoz@gmail.com	9/14/2026	V2.0
AUTH-36	D4	Platform Infrastructure	AUTH	Auth & Identity	Duplicate identity merge	As staff, I merge duplicate trader identities belonging to one person across multiple emails with audit and consolidated logs, so that abuse analysis and CRM see one person.	M	P2	V2	Draft	BE-2	RSK-08, ADM-03	Build		salmancoz@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancoz@gmail.com	9/14/2026	V2.0
AUTH-37	D4	Platform Infrastructure	AUTH	Auth & Identity	Trusted device management	As a user, I view and revoke devices trusted for 2FA step-up exemption, so that a lost device can be untrusted remotely.	S	P2	V2	Draft	BE-1	AUTH-30	Build		salmancoz@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancoz@gmail.com	9/14/2026	V2.0
AUTH-38	D4	Platform Infrastructure	AUTH	Auth & Identity	Staff credential hygiene	As the platform, I enforce staff password expiry and block reused passwords, so that staff credentials meet enterprise tenant expectations.	S	P2	V2	Draft	BE-1	AUTH-17	Build		salmancoz@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancoz@gmail.com	9/14/2026	V2.0
TEN-01	D4	Platform Infrastructure	TEN	Tenant Management	Tenant record	As a super admin, I can create, view, edit, suspend, and terminate a tenant so that each prop firm has its isolated workspace.	M	P0	V1-Core	Draft	BE-1	AUTH-12	Build		salmancoz@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancoz@gmail.com	9/14/2026	V1.0
TEN-02	D4	Platform Infrastructure	TEN	Tenant Management	Tenant resolution	As the platform, I resolve the tenant from the request domain or subdomain at the edge so that branding, colors, and data scope are correct for every request.	M	P0	V1-Core	Draft	BE-1	OPS-02	Build	Cloudflare	salmancoz@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancoz@gmail.com	9/14/2026	V1.0
TEN-03	D4	Platform Infrastructure	TEN	Tenant Management	Tenant-scoped data access	As the platform, I inject the caller's tenant ID into every repository query so that no module can read another tenant's rows.	L	P0	V1-Core	Draft	BE-1		Build		salmancoz@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancoz@gmail.com	9/14/2026	V1.0
TEN-04	D4	Platform Infrastructure	TEN	Tenant Management	Branding	As a tenant admin, I can set logo, favicon, colors, and fonts so that the trader portal and admin panel look like my brand.	M	P0	V2	Draft	BE-1, FE-1	TEN-02, TEN-18	Build		salmancoz@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancoz@gmail.com	9/14/2026	V2.0
TEN-05	D4	Platform Infrastructure	TEN	Tenant Management	Custom domain	As a tenant admin, I can map my own domain to my tenant so that traders see my URL instead of a platform subdomain.	M	P1	V2	Draft	BE-1, DevOps	TEN-02	Build		salmancoz@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancoz@gmail.com	9/14/2026	V2.0

Req ID	Domain ID	Domain Name	Module ID	Module	Feature Name	User Story	Complexity	Priority	Phase	Status	Owner	Depends On	🔗	Build Strategy	Notes	Proposed By	Proposed On	Team Comments	Comment Status	Last Reviewed By	Last Reviewed On	Release
TEN-06	D4	Platform Infrastructure	TEN	Tenant Management	Terminology map	As a tenant admin, I can rename core terms such as challenge, trade, and payout so that the UI speaks my firm's language.	M	P1	V2	Draft	BE-1, FE-1	TEN-02		Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
TEN-07	D4	Platform Infrastructure	TEN	Tenant Management	Locale settings	As a tenant admin, I can set default currency, timezone, and locale so that amounts and timestamps display correctly for my market.	S	P0	V2	Draft	BE-1			Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
TEN-08	D4	Platform Infrastructure	TEN	Tenant Management	Entitlements	As a super admin, I can enable or disable modules per tenant so that each firm gets exactly the capabilities it purchased.	M	P0	V1-Core	Draft	BE-2			Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V1.0
TEN-09	D4	Platform Infrastructure	TEN	Tenant Management	Module lifecycle	As the platform, I track each tenant module as installed, enabled, suspended, or disabled so that UI and APIs respect the real state.	M	P1	V2	Draft	BE-2	TEN-08		Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
TEN-10	D4	Platform Infrastructure	TEN	Tenant Management	Feature flags	As a super admin or a scoped tenant admin, I can toggle feature flags per tenant so that rollout is controlled per firm.	M	P1	V2	Draft	BE-2	TEN-08		Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
TEN-11	D4	Platform Infrastructure	TEN	Tenant Management	Integration config	As a tenant admin, I can store my broker credentials, payment provider keys, KYC settings, and email sender config so that integrations run under my own accounts.	M	P0	V1-Core	Draft	BE-1	TEN-12		Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V1.0
TEN-12	D4	Platform Infrastructure	TEN	Tenant Management	Secrets handling	As the platform, I encrypt tenant integration secrets at rest and never return them in logs or API responses so that credentials stay safe.	M	P0	V1-Core	Draft	BE-1, DevOps	OPS-09		Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V1.0
TEN-13	D4	Platform Infrastructure	TEN	Tenant Management	Legal pages	As a tenant admin, I can set my terms, privacy policy, and risk disclosure so that my compliance text is displayed to my traders.	S	P1	V2	Draft	FE-1	TEN-02		Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
TEN-14	D4	Platform Infrastructure	TEN	Tenant Management	Email sender config	As a tenant admin, I can configure my sending domain and from-address so that transactional emails arrive from my brand.	M	P1	V2	Draft	BE-1	NOT-03		Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
TEN-15	D4	Platform Infrastructure	TEN	Tenant Management	Suspension cascade	As a super admin, I can suspend a tenant so that logins, new orders, and payouts stop immediately while all data is preserved.	M	P0	V1-Core	Draft	BE-1	AUTH-20		Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V1.0
TEN-16	D4	Platform Infrastructure	TEN	Tenant Management	Impersonation	As a super admin, I can impersonate a tenant admin with explicit consent and full audit so that support is possible without sharing passwords.	M	P1	V2	Draft	BE-2	AUTH-12, AUD-08		Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
TEN-17	D4	Platform Infrastructure	TEN	Tenant Management	Tenant context endpoint	As a frontend app, I can fetch one tenant context containing branding, entitlements, flags, and terminology at bootstrap so that the UI composes itself in a single call.	M	P0	V2	Draft	BE-1	TEN-04, TEN-06, TEN-08, TEN-10		Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
TEN-18	D4	Platform Infrastructure	TEN	Tenant Management	Storage scoping	As the platform, I profile every tenant file in object storage by tenant id so that documents and certificates never mix between firms.	S	P0	V1-Core	Draft	BE-1	OPS-02		Build	Cloudflare R2	salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V1.0
TEN-19	D4	Platform Infrastructure	TEN	Tenant Management	Tenant audit	As the platform, I log tenant creation, suspension, config changes, and entitlement changes with actor and timestamp so that platform-level changes are traceable.	S	P0	V2	Draft	BE-1	AUD-01		Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
TEN-20	D4	Platform Infrastructure	TEN	Tenant Management	Usage metering	As the platform, I record per-tenant usage counters for traders, accounts, orders, and API calls so that future billing has real data.	M	P2	V2	Draft	BE-2	TEN-01		Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
TEN-21	D4	Platform Infrastructure	TEN	Tenant Management	Tenant health view	As a super admin, I can see per-tenant error rates and broker sync health so that I spot a failing tenant before they report it.	M	P2	V2	Draft	BE-2	OPS-10		Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
TEN-22	D4	Platform Infrastructure	TEN	Tenant Management	Resource quotas	As a super admin, I set per-tenant limits on traders, accounts, and API calls so that resource abuse is prevented.	M	P1	V2	Draft	BE-2	TEN-20		Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
TEN-23	D4	Platform Infrastructure	TEN	Tenant Management	Usage alerts	As a super admin, I receive alerts when tenants approach quotas so that I can upsell or intervene before limits hit.	S	P1	V2	Draft	BE-2	TEN-22		Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
TEN-24	D4	Platform Infrastructure	TEN	Tenant Management	Data residency	As a tenant on regulated markets, I choose data residency region so that compliance requirements are met.	L	P2	V8	Draft	DevOps	OPS-02		Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V3.0
TEN-25	D4	Platform Infrastructure	TEN	Tenant Management	Integration connection test	As a tenant admin, I run a connection test per configured integration including broker, payment provider, KYC provider, and email sender, and see a clear pass or fail with the provider response, so that bad credentials surface at config time instead of at first payout.	S	P1	V2	Draft	BE-1	TEN-11		Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
TEN-26	D4	Platform Infrastructure	TEN	Tenant Management	Domain verification and SSL status	As a tenant admin, I see DNS verification status and SSL provisioning state for my custom domain with the exact reason, add, so that domain takeover is self-serve and delegable without support tickets.	S	P1	V2	Draft	BE-1, DevOps	TEN-05		Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
TEN-27	D4	Platform Infrastructure	TEN	Tenant Management	Config inheritance and effective value view	As a tenant admin or platform ops, I see which settings inherit platform defaults and which are tenant overrides, with the resolved effective value, so that config behavior is never a guess during support.	M	P1	V2	Draft	BE-1	CON-11, TEN-17		Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
TEN-28	D4	Platform Infrastructure	TEN	Tenant Management	Tenant config versioning and rollback	As a tenant admin, I see change history for branding, terminology, and settings with attr and can roll back to a prior version, so that a bad change is recoverable without engineering help.	M	P1	V2	Draft	BE-1	TEN-19		Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
TEN-29	D4	Platform Infrastructure	TEN	Tenant Management	Legal versioning and re-consent enforcement	As a tenant admin, when I publish a new terms or risk disclaimer version, traders must re-accept at least log or before they next request, and acceptance is logged per version, so that consent stays current and enforceable.	M	P1	V2	Draft	BE-2	TEN-13, AUTH-31		Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
TEN-30	D4	Platform Infrastructure	TEN	Tenant Management	Tenant setup checklist	As a tenant admin, I follow a setup checklist covering branding, domain, broker connection test, first challenge, payment test, payout methods, and KYC config, with visible completion status, so that launch readiness is explicit for me and for platform support.	M	P1	V2	Draft	FE-1	CON-03, ADM-19		Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
TEN-31	D4	Platform Infrastructure	TEN	Tenant Management	Notification channel policy	As a tenant admin, I enable or disable channels per tenant and set mandatory channels for critical events such as breach and payout, so that communication matches my operations and my compliance posture.	S	P2	V2	Draft	BE-2	NOT-02		Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
TEN-32	D4	Platform Infrastructure	TEN	Tenant Management	Staff access review	As a tenant admin, I see staff last active date, role, and 2FA status and can disable dormant accounts in one action so that stale access does not accumulate over months.	S	P2	V2	Draft	BE-2	AUTH-03, ADM-17		Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
TEN-33	D4	Platform Infrastructure	TEN	Tenant Management	Tenant offboarding export and termination	As platform ops, I execute a tenant offboarding that exports traders, accounts, ledger, and audit as a defined package, then terminates entitlements while retaining data per contract, so that exits are clean and contractual.	M	P2	V2	Draft	BE-2	AUD-09, LED-15		Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
TEN-34	D4	Platform Infrastructure	TEN	Tenant Management	Tenant config clone	As platform ops, I clone configuration from an existing tenant into a new tenant with explicit include and exclude choices, so that onboarding tenant two and beyond is fast and consistent.	M	P2	V2	Draft	BE-1	CON-03		Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
TEN-35	D4	Platform Infrastructure	TEN	Tenant Management	Entitlementment change impact preview	As a super admin, before disabling a module I see affected active entities such as pending commissions, open competitions, and scheduled payouts, so that destructive commercial changes are deliberate.	M	P2	V2	Draft	FE-2	TEN-08, CON-05		Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
TEN-36	D4	Platform Infrastructure	TEN	Tenant Management	Cross-tenant isolation testing	As the platform, I run automated tests that attempt cross-tenant data access across every module and fail the build on any leak, so that tenant isolation is proven continuously rather than assumed.	M	P0	V2	Draft	BE-1	TEN-03, AUD-05		Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
TEN-37	D4	Platform Infrastructure	TEN	Tenant Management	Data portability and export standards	As a tenant, I can export my complete tenant data in documented standard formats at any time, so that my data is never hostage to the platform and migration is always possible.	M	P1	V2	Draft	BE-2	TEN-33, AUD-09		Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
TEN-38	D4	Platform Infrastructure	TEN	Tenant Management	Archival versus hard deletion	As the platform, I distinguish soft archival from irreversible hard deletion with enforced retention windows and audit, so that offboarding meets both operational and legal requirements.	M	P1	V2	Draft	BE-2	TEN-33, AUD-10		Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
TEN-39	D4	Platform Infrastructure	TEN	Tenant Management	Config dry-run and preview	As a tenant admin, I can preview configuration changes in a dry-run mode before applying them to production, so that risky changes are validated without needing rollback.	M	P1	V2	Draft	BE-1	TEN-28, TEN-35		Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
TEN-40	D4	Platform Infrastructure	TEN	Tenant Management	Tenant targeted incident communication	As platform ops, I can publish incident and maintenance notices scoped to specific affected tenants rather than platform-wide, so that communication stays relevant and calm.	S	P2	V2	Draft	BE-2	TEN-14, NOT-14		Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
EVT-01	D4	Platform Infrastructure	EVT	Event Bus & Webhooks	Outbox write pattern	As a module developer, I write domain state and an outbox row in one database transaction so that even in a fork and no event is emitted for a rolled back transaction.	L	P0	V1-Core	Draft	BE-1	OPS-06		Build	Postgres (self-hosted)	salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
EVT-02	D4	Platform Infrastructure	EVT	Event Bus & Webhooks	Outbox relay	As the platform, a dedicated relay process polls the outbox and publishes events to Redis Streams so that delivery survives application restarts.	M	P0	V1-Core	Draft	BE-1	EVT-01, OPS-02		Build	Redis (self-hosted)	salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V1.0

Req ID	Domain ID	Domain Name	Module ID	Module	Feature Name	User Story	Complexity	Priority	Phase	Status	Owner	Depends On	🔗	Build Strategy	Notes	Proposed By	Proposed On	Team Comments	Comment Status	Last Reviewed By	Last Reviewed On	Release
EVT03	D4	Platform Infrastructure	EVT	Event Bus & Webhooks	Event envelope	As the platform, every event carries its type, version, tenant_id, occurred_at, and payload so that consumers can evolve safely and scope correctly.	M	P0	V1-Core	Draft	BE-1		Build			salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V1.0
EVT04	D4	Platform Infrastructure	EVT	Event Bus & Webhooks	Event catalog	As the platform, I maintain a versioned catalog of all domain events with producers and payload contracts so that modules agree on definitions before code is written.	M	P0	V2	Draft	BE-1, Tech Lead		Build			salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
EVT05	D4	Platform Infrastructure	EVT	Event Bus & Webhooks	Idempotent consumers	As a consumer module, I deduplicate by event so that redundancy never causes double emails, double payments, or double ledger entries.	M	P0	V1-Core	Draft	BE-2	EVT03	Build			salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V1.0
EVT06	D4	Platform Infrastructure	EVT	Event Bus & Webhooks	Consumer groups	As the platform, each consumer module subscribes with its own consumer group so that one slow consumer never blocks the others.	M	P0	V2	Draft	BE-2	EVT02	Build			salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
EVT07	D4	Platform Infrastructure	EVT	Event Bus & Webhooks	Dead letter stream	As the platform, I move events to a dead letter stream with error context after a maximum retry count so that poison events never stall a pipeline.	M	P0	V2	Draft	BE-2	EVT06	Build			salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
EVT08	D4	Platform Infrastructure	EVT	Event Bus & Webhooks	Append-only event log	As the platform, I persist every published event to an append-only log table so that replay and audit are always possible.	M	P0	V1-Core	Draft	BE-1	OPS-06	Build		Postgres (self-hosted)	salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
EVT09	D4	Platform Infrastructure	EVT	Event Bus & Webhooks	Replay and backfill	As the platform, I can replay events from the event log to rebuild a read model or recover a consumer so that recovery needs no production hacks.	M	P1	V2	Draft	BE-2	EVT08	Build			salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
EVT10	D4	Platform Infrastructure	EVT	Event Bus & Webhooks	Inbound webhook verification	As a module owner, I use shared utilities to verify provider signatures and deduplicate by provider event id so that payment and KYC webhooks are handled consistently and idempotently.	M	P0	V1-Core	Draft	BE-1	CHK-07, KYC-05	Build			salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V1.0
EVT11	D4	Platform Infrastructure	EVT	Event Bus & Webhooks	Outbound tenant webhooks	As a tenant admin, I can register webhook URLs per event type so that my external checkout, CRM, or affiliate system reacts to platform events.	M	P1	V2	Draft	BE-2	TEN-08, TEN-11	Build			salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
EVT12	D4	Platform Infrastructure	EVT	Event Bus & Webhooks	Webhook signing	As the platform, I sign every outbound webhook with HMAC using a per-tenant secret so that receivers can verify authenticity.	S	P0	V2	Draft	BE-2	EVT-11	Build			salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
EVT13	D4	Platform Infrastructure	EVT	Event Bus & Webhooks	Webhook retry	As the platform, I retry failed webhook deliveries with exponential backoff and a maximum attempt count so that transient receiver outages do not lose events.	M	P0	V2	Draft	BE-2	EVT-11	Build			salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
EVT14	D4	Platform Infrastructure	EVT	Event Bus & Webhooks	Webhook delivery logs	I, response codes, and payloads so that I can debug.	M	P1	V2	Draft	BE-2, FE-1	EVT-13	Build			salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
EVT15	D4	Platform Infrastructure	EVT	Event Bus & Webhooks	Webhook test tool	As a tenant admin, I can send a test event to my endpoint so that I can validate my integration before going live.	S	P1	V2	Draft	BE-2, FE-1	EVT-11	Build			salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
EVT16	D4	Platform Infrastructure	EVT	Event Bus & Webhooks	Delivery throttling	As the platform, I throttle deliveries per endpoint and open a circuit breaker on repeated failures so that one broken endpoint cannot consume all workers.	M	P1	V2	Draft	BE-2	EVT-13	Build			salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
EVT17	D4	Platform Infrastructure	EVT	Event Bus & Webhooks	Notification hookup	As the notifications module, I consume lifecycle events so that emails and in-app alerts fire without any producer calling me directly.	M	P0	V2	Draft	BE-2	NOT-01	Build			salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
EVT18	D4	Platform Infrastructure	EVT	Event Bus & Webhooks	Read model hookup	As the reports module, I consume events to maintain read models so that analytics never query operational tables.	M	P1	V2	Draft	BE-2	ANA-01	Build			salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
EVT19	D4	Platform Infrastructure	EVT	Event Bus & Webhooks	Tenant-scoped events	As the platform, every event carries tenant_id and every consumer enforces tenant scope so that cross-tenant leakage through events is impossible.	S	P0	V2	Draft	BE-1	EVT-03	Build			salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
EVT20	D4	Platform Infrastructure	EVT	Event Bus & Webhooks	Command queue separation	As the platform, I keep broker commands in a separate Postgres command table with retry and backoff so that commands, which are requests, are never confused with events, which are facts.	M	P0	V1-Core	Draft	BE-1	OPS-06	Build		Postgres (self-hosted)	salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V1.0
EVT21	D4	Platform Infrastructure	EVT	Event Bus & Webhooks	Bus observability	As ops, I get alerts on outbox lag, consumer lag, and dead-letter growth so that pipeline problems surface before traders notice.	M	P0	V2	Draft	DevOps	OPS-10	Build			salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
EVT22	D4	Platform Infrastructure	EVT	Event Bus & Webhooks	Retention and archival	As the platform, I age out Redis Streams and archive the event log so that storage stays bounded without hitting noisy neighbor.	S	P2	V2	Draft	DevOps	EVT-08	Build			salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
EVT23	D4	Platform Infrastructure	EVT	Event Bus & Webhooks	Event schema registry	As the platform, I maintain a versioned schema registry with validation so that event contracts are enforced.	M	P1	V2	Draft	BE-1	EVT-04	Build			salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
EVT24	D4	Platform Infrastructure	EVT	Event Bus & Webhooks	Event filtering	As a consumer, I subscribe to filtered event streams so that I only receive relevant events.	M	P2	V2	Draft	BE-2	EVT-06	Build			salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
EVT25	D4	Platform Infrastructure	EVT	Event Bus & Webhooks	Event ordering guarantees	As the platform, I guarantee that all events for a single entity (account, order, payment) are processed by consumers in emission order, so that state transitions never race (e.g., breach processed before account created).	M	P0	V2	Draft	BE-1	EVT-03, EVT-06	Build			salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
EVT26	D4	Platform Infrastructure	EVT	Event Bus & Webhooks	Webhook replay attack protection	As the platform, I validate inbound webhook timestamps (reject if older than 5 minutes) and track processed event IDs to reject duplicates, so that captured webhooks/payloads cannot be replayed by attackers.	S	P0	V2	Draft	BE-1	EVT-10, OW-12	Build			salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
EVT27	D4	Platform Infrastructure	EVT	Event Bus & Webhooks	Dead letter inspection and reprocessing UI	As ops, I can view dead-letter events with error context, filter by consumer group and error type, and selectively retry or discard them so that poison events are diagnosed and recovered without production hacks.	M	P1	V2	Draft	BE-1, FE-2	EVT-07, ADM-01	Build			salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
EVT28	D4	Platform Infrastructure	EVT	Event Bus & Webhooks	Event chain tracing	As ops, given a triggering event ID, I can trace every downstream consumer that processed it, their processing duration, and success or failure, so that multi-hop event flows are debuggable end-to-end.	M	P1	V2	Draft	BE-1	EVT-03, OW-09	Build			salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
EVT29	D4	Platform Infrastructure	EVT	Event Bus & Webhooks	Consumer processing SLA tracking	As ops, I track per-consumer-group latency from event emission to successful processing, with configurable SLA thresholds and alerts on breach, so that slow consumers are caught before they cascade.	S	P1	V2	Draft	BE-1	EVT-21, OPS-11	Build			salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
EVT30	D4	Platform Infrastructure	EVT	Event Bus & Webhooks	Event priority routing	As the platform, I route critical events (breach, enforcement, payout approval) through a high-priority stream that cannot be starved by analytical or notification events, so that money-impacting processing is never delayed by volume spikes.	M	P1	V2	Draft	BE-1	EVT-06, EVT-20	Build			salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
EVT31	D4	Platform Infrastructure	EVT	Event Bus & Webhooks	Webhook endpoint health monitoring	As the platform, I track per-endpoint success rate, average latency, and consecutive failures, auto-disable endpoints after sustained failure, and alert the tenant admin, so that broken integrations surface without manual checks.	M	P1	V2	Draft	BE-1	EVT-13, EVF-16	Build			salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
EVT32	D4	Platform Infrastructure	EVT	Event Bus & Webhooks	Event schema compatibility testing	As the platform, CI runs automated compatibility tests on every event schema change verifying no existing consumer breaks, so that schema evolution never silently breaks downstream modules.	S	P1	V2	Draft	BE-1	EVT-23, OPS-03	Build			salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
GW-01	D4	Platform Infrastructure	GW	API Gateway	Single entry point	As the platform, I expose one API with trader, admin, console, and webhook route groups so that surface separation is enforced at the routing layer.	M	P0	V1-Core	Draft	BE-1		Build		Cloudflare	salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V1.0
GW-02	D4	Platform Infrastructure	GW	API Gateway	Tenant resolution middleware	As the platform, I resolve the tenant from the request domain or subdomain and reject unknown hosts so that no request ever executes without tenant context.	M	P0	V1-Core	Draft	BE-1	TEN-02	Build			salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V1.0
GW-03	D4	Platform Infrastructure	GW	API Gateway	Authentication middleware	As the platform, I verify API keys or API keys on every protected route and reject invalid credentials so that anonymous access is impossible.	M	P0	V1-Core	Draft	BE-1	AUTH-07	Build			salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V1.0
GW-04	D4	Platform Infrastructure	GW	API Gateway	Authorization middleware	As the platform, I enforce module-declared permission keys per route so that a user only reaches routes their role allows.	M	P0	V1-Core	Draft	BE-2	AUTH-13	Build			salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V1.0
GW-05	D4	Platform Infrastructure	GW	API Gateway	Rate limiting	As the platform, I apply per-IP and per-user rate limits with clear 429 responses so that abuse and runaway clients cannot degrade the platform.	M	P0	V1-Core	Draft	BE-1	OPS-02	Build		Redis (self-hosted)	salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V1.0
GW-06	D4	Platform Infrastructure	GW	API Gateway	Per-tenant quotas	As the platform, I apply per-tenant API quotas so that one tenant cannot starve the others.	M	P2	V2	Draft	BE-2	GW-05	Build			salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
GW-07	D4	Platform Infrastructure	GW	API Gateway	CORS management	As the platform, I serve per-tenant CORS policies from tenant config so that only the tenant's own domains can call the API from a browser.	S	P0	V2	Draft	BE-1	TEN-02	Build			salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
GW-08	D4	Platform Infrastructure	GW	API Gateway	API versioning	As the platform, I version all routes under v1 so that breaking changes, ship or new versions without breaking existing tenants.	S	P0	V2	Draft	BE-1	GW-01	Build			salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
GW-09	D4	Platform Infrastructure	GW	API Gateway	Request correlation	As the platform, I assign a correlation id to every request and propagate it to logs, traces, and events so that any incident is traceable end-to-end.	S	P0	V2	Draft	BE-1	OPS-10	Build			salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0

Req ID	Domain ID	Domain Name	Module ID	Module	Feature Name	User Story	Complexity	Priority	Phase	Status	Owner	Depends On	🔗	Build Strategy	Notes	Proposed By	Proposed On	Team Comments	Comment Status	Last Reviewed By	Last Reviewed On	Release
GW-10	D4	Platform Infrastructure	GW	API Gateway	Structured request logging	As ops, I get structured logs with tenant id, user id, route, status, and duration, with PII excluded, so that debugging and audit are possible.	M	P0	V2	Draft	BE-1	OPS-10	Build			salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidation	Accepted	salmancodes@gmail.com	9/14/2026	V2.0
GW-11	D4	Platform Infrastructure	GW	API Gateway	Webhook ingress routing	As the platform, I expose dedicated webhook endpoints for payment and KYC providers, isolated from user routes, with signature verification delegated to module utilities.	M	P0	V2	Draft	BE-1	EVY-10	Build			salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidation	Accepted	salmancodes@gmail.com	9/14/2026	V2.0
GW-12	D4	Platform Infrastructure	GW	API Gateway	Idempotency keys	As a client, I can send an idempotency key on mutating requests so that a retry after a transient error doesn't create an order, payout, or account.	M	P0	V1-Core	Draft	BE-1	OPS-06	Build			salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidation	Accepted	salmancodes@gmail.com	9/14/2026	V1.0
GW-13	D4	Platform Infrastructure	GW	API Gateway	Request limits and timeouts	As the platform, I enforce maximum body size and per-route timeouts so that overloaded or slow requests cannot exhaust workers.	S	P0	V2	Draft	BE-1	GW-01	Build			salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidation	Accepted	salmancodes@gmail.com	9/14/2026	V2.0
GW-14	D4	Platform Infrastructure	GW	API Gateway	Health and readiness probes	As ops and the orchestrator, I can probe liveness and readiness so that deployment and restarts are safe, and traffic shifts only to healthy instances.	S	P0	V2	Draft	DevOps	OPS-02, OPS-16	Build			salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidation	Accepted	salmancodes@gmail.com	9/14/2026	V2.0
GW-15	D4	Platform Infrastructure	GW	API Gateway	OpenAPI documentation	As a developer or tenant integrator, I get an auto-generated OpenAPI spec per route group so that integration work is self-serve.	M	P1	V2	Draft	BE-1	GW-08	Build			salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidation	Accepted	salmancodes@gmail.com	9/14/2026	V2.0
GW-16	D4	Platform Infrastructure	GW	API Gateway	API key auth for integrations	As a tenant machine client, I authenticate with a tenant API key scoped to permitted routes so that integrations never use user sessions.	M	P1	V2	Draft	BE-2	AUTH-21	Build			salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidation	Accepted	salmancodes@gmail.com	9/14/2026	V2.0
GW-17	D4	Platform Infrastructure	GW	API Gateway	Sensitive route audit flag	As the platform, I mark sensitive routes such as payment approval, rule changes, and role changes for mandatory audit logging so that critical actions are always recorded.	S	P0	V2	Draft	BE-2	AUD-01	Build			salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidation	Accepted	salmancodes@gmail.com	9/14/2026	V2.0
GW-18	D4	Platform Infrastructure	GW	API Gateway	Error contract	As a client, I receive a consistent error envelope with code, message, and correlation id so that all three frontends handle failures uniformly.	S	P0	V1-Core	Draft	BE-1, FE-1	GW-01	Build			salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidation	Accepted	salmancodes@gmail.com	9/14/2026	V1.0
GW-19	D4	Platform Infrastructure	GW	API Gateway	Sandbox mode	As a tenant developer, I can call a sandbox tenant with test data so that I can integrate without touching production.	M	P2	V3	Draft	BE-2	SDK-05	Build			salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidation	Accepted	salmancodes@gmail.com	9/14/2026	V3.0
GW-20	D4	Platform Infrastructure	GW	API Gateway	Edge security handoff	As the platform, I rely on Cloudflare for WAF, DDoS, and bot mitigation and restrict origin access so that edge and app layers do not duplicate controls.	S	P0	V2	Draft	DevOps	OPS-02	Build			salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidation	Accepted	salmancodes@gmail.com	9/14/2026	V2.0
GW-21	D4	Platform Infrastructure	GW	API Gateway	Pagination standard	As a client, every list endpoint returns cursor-based pagination with a next cursor and consistent fields, so that trade, account, payout, and tolist lists paginate uniformly and no list grows unbounded.	S	P0	V2	Draft	BE-1	GW-01	Build			salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidation	Accepted	salmancodes@gmail.com	9/14/2026	V2.0
GW-22	D4	Platform Infrastructure	GW	API Gateway	Route gating by module entitlement	As the platform, I check the tenant's module entitlements before routing so that routes for disabled modules return a 404 and tenants only reach capabilities they purchased.	M	P0	V2	Draft	BE-1	TEN-08, TEN-09	Build			salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidation	Accepted	salmancodes@gmail.com	9/14/2026	V2.0
GW-23	D4	Platform Infrastructure	GW	API Gateway	Suspended tenant enforcement	As the platform, I reject all mutating requests from suspended tenants while allowing read-only access, so that the TEN-15 suspension cascade is enforced at the gateway and suspended tenants cannot write data.	S	P0	V2	Draft	BE-1	TEN-15	Build			salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidation	Accepted	salmancodes@gmail.com	9/14/2026	V2.0
GW-24	D4	Platform Infrastructure	GW	API Gateway	Response caching with invalidation	As the platform, I set cache headers on tenant content and challenge catalog responses and invalidates them when tenant config or entitlements change, so that bootstrapping is fast and never serves stale branding or state access.	M	P1	V2	Draft	BE-1	TEN-17, GW-02	Build			salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidation	Accepted	salmancodes@gmail.com	9/14/2026	V2.0
GW-25	D4	Platform Infrastructure	GW	API Gateway	Bulk and batch request contract	As a client, I submit batch mutations with a defined maximum size and receive partial failure responses with error items, so that bulk operations like payout approval and account actions are atomic per item and auditable.	M	P1	V2	Draft	BE-1	GW-13	Build			salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidation	Accepted	salmancodes@gmail.com	9/14/2026	V2.0
GW-26	D4	Platform Infrastructure	GW	API Gateway	File upload handling	As the platform, I provide a standardized multipart and streaming upload contract with size and type limits for KYC documents and support attachments, so that file endpoints are consistent and safe.	M	P1	V2	Draft	BE-1	GW-13	Build			salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidation	Accepted	salmancodes@gmail.com	9/14/2026	V2.0
GW-27	D4	Platform Infrastructure	GW	API Gateway	PII classification and log scrubbing	As ops, I define explicit PII fields per route and enforce scrubbing rules in request logs, so that GW-10 structured logging never leaks emails, identity data, or payment data.	M	P0	V2	Draft	BE-1	GW-10	Build			salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidation	Accepted	salmancodes@gmail.com	9/14/2026	V2.0
GW-28	D4	Platform Infrastructure	GW	API Gateway	API deprecation signaling	As the platform, I emit Sunset and Deprecation headers on versioned routes and publish a sunset schedule, so that integrators are warned before breaking changes and the SDK-15 changelog stays accurate.	S	P1	V3	Draft	BE-1	GW-08, SDK-15	Build			salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidation	Accepted	salmancodes@gmail.com	9/14/2026	V3.0
GW-29	D4	Platform Infrastructure	GW	API Gateway	Retry After and backoff headers	As the platform, I include Retry-After headers on 429 responses and document backoff behavior, so that clients and webhooks retry predictably instead of hammering the API.	S	P0	V2	Draft	BE-1	GW-05	Build			salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidation	Accepted	salmancodes@gmail.com	9/14/2026	V2.0
GW-30	D4	Platform Infrastructure	GW	API Gateway	Success response envelope	As a client, every successful response uses a consistent data envelope matching the error contract in GW-18, so that frontends and integrators parse responses uniformly.	S	P0	V2	Draft	BE-1	GW-18	Build			salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidation	Accepted	salmancodes@gmail.com	9/14/2026	V2.0
GW-31	D4	Platform Infrastructure	GW	API Gateway	Idempotency key TTL and scope	As the platform, I define idempotency keys every tenant scope, and storage, so that GW-12 idempotency keys do not grow unbounded and cannot collide across tenants.	S	P1	V2	Draft	BE-1	GW-12	Build			salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidation	Accepted	salmancodes@gmail.com	9/14/2026	V2.0
GW-32	D4	Platform Infrastructure	GW	API Gateway	Maintenance mode enforcement	As the platform, I return a branded maintenance response when CON-16 maintenance mode is active, with read-only pass-through where configured so that planned downtime is enforced at the gateway.	S	P1	V2	Draft	BE-1	CON-16	Build			salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidation	Accepted	salmancodes@gmail.com	9/14/2026	V2.0
OPS-01	D4	Platform Infrastructure	OPS	DevOps & Deployment	Containerization	As the platform, every service including api, workers, relay bot, and frontends runs as a Docker image built in CI so that all environments are identical.	M	P0	V1-Core	Draft	DevOps		Build/config	Docker		salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidation	Accepted	salmancodes@gmail.com	9/14/2026	V1.0
OPS-02	D4	Platform Infrastructure	OPS	DevOps & Deployment	Compose orchestration	As DevOps, I treat production as a defined Compose stack on Hetzner so that deployment is reproducible without Kubernetes overhead.	M	P0	V1-Core	Draft	DevOps	OPS-01	Build/config	Docker Compose		salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidation	Accepted	salmancodes@gmail.com	9/14/2026	V1.0
OPS-03	D4	Platform Infrastructure	OPS	DevOps & Deployment	CI pipeline	As a developer, every push runs lint, typecheck, unit tests, and image build so that broken code never reaches main.	M	P0	V1-Core	Draft	DevOps	OPS-01	Build/config	GitHub Actions		salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidation	Accepted	salmancodes@gmail.com	9/14/2026	V1.0
OPS-04	D4	Platform Infrastructure	OPS	DevOps & Deployment	CD pipeline	As DevOps, mapping to main deploys to staging automatically and production deploys only via manual approval so that releases are controlled.	M	P0	V1-Core	Draft	DevOps	OPS-03	Build/config	GitHub Actions		salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidation	Accepted	salmancodes@gmail.com	9/14/2026	V1.0
OPS-05	D4	Platform Infrastructure	OPS	DevOps & Deployment	Environment parity	As the team, I have dev, staging, and production with identical configuration shape so that bugs surface before production.	M	P0	V2	Draft	DevOps	OPS-02	Build/config			salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidation	Accepted	salmancodes@gmail.com	9/14/2026	V2.0
OPS-06	D4	Platform Infrastructure	OPS	DevOps & Deployment	Database migrations	As the platform, I run versioned migrations with expand-contract discipline so that schema changes never cause downtime.	M	P0	V1-Core	Draft	DevOps, BE-1	OPS-04	Build/config	Drizzle ORM (primary), Prisma		salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidation	Accepted	salmancodes@gmail.com	9/14/2026	V1.0
OPS-07	D4	Platform Infrastructure	OPS	DevOps & Deployment	Postgres backups	As DevOps, I take daily backups plus WAL archiving and rehearse a restore monthly so that data loss is bounded and proven recoverable.	M	P0	V1-Core	Draft	DevOps	OPS-02	Build/config	Hetzner		salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidation	Accepted	salmancodes@gmail.com	9/14/2026	V1.0
OPS-08	D4	Platform Infrastructure	OPS	DevOps & Deployment	Object storage protection	As DevOps, I enable versioning and off-host copies for KYC documents and certificates so that files are recoverable.	S	P1	V2	Draft	DevOps	TEN-18	Build/config			salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidation	Accepted	salmancodes@gmail.com	9/14/2026	V2.0
OPS-09	D4	Platform Infrastructure	OPS	DevOps & Deployment	Secrets management	As DevOps, I keep secrets out of code and inject them at runtime from an encrypted store so that a repository leak is not a production leak.	M	P0	V1-Core	Draft	DevOps		Build/config	SOPS		salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidation	Accepted	salmancodes@gmail.com	9/14/2026	V1.0
OPS-10	D4	Platform Infrastructure	OPS	DevOps & Deployment	Observability stack	As ops, I run Prometheus, Grafana, Loki, and Open Telemetry collector so that metrics, logs, and traces live in one place.	M	P0	V2	Draft	DevOps	OPS-02	Build/config			salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidation	Accepted	salmancodes@gmail.com	9/14/2026	V2.0
OPS-11	D4	Platform Infrastructure	OPS	DevOps & Deployment	Alerting	As ops, I get alerts on outbox lag, dead letter growth, reconciliation mismatch, broker queue failure, and host saturation so that we know before leaders do.	M	P0	V2	Draft	DevOps	EVY-21, BRG-16	Build/config	Sentry		salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidation	Accepted	salmancodes@gmail.com	9/14/2026	V2.0
OPS-12	D4	Platform Infrastructure	OPS	DevOps & Deployment	Business dashboards	As ops and tech lead, I use Grafana dashboards for ops log, breach rate, payout queue depth, and API latency so that system health is visible at a glance.	M	P1	V2	Draft	DevOps	OPS-10	Build/config			salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidation	Accepted	salmancodes@gmail.com	9/14/2026	V2.0
OPS-13	D4	Platform Infrastructure	OPS	DevOps & Deployment	Host hardening	As DevOps, I enforce SSH keys only, host firewall, SELinux, and unshared security upgrades so that the attack surface stays small.	S	P0	V2	Draft	DevOps	OPS-02	Build/config			salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidation	Accepted	salmancodes@gmail.com	9/14/2026	V2.0
OPS-14	D4	Platform Infrastructure	OPS	DevOps & Deployment	Image and dependency scanning	As DevOps, CI scans images and dependencies for vulnerabilities so that known CVEs do not slip to production.	S	P1	V2	Draft	DevOps	OPS-03	Build/config			salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidation	Accepted	salmancodes@gmail.com	9/14/2026	V2.0
OPS-15	D4	Platform Infrastructure	OPS	DevOps & Deployment	TLS and origin protection	As DevOps, I terminate TLS at Cloudflare and restrict origin access so that traffic cannot bypass the edge.	S	P0	V2	Draft	DevOps	GW-20	Build/config			salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidation	Accepted	salmancodes@gmail.com	9/14/2026	V2.0

Req ID	Domain ID	Domain Name	Module ID	Module	Feature Name	User Story	Complexity	Priority	Phase	Status	Owner	Depends On	Build Strategy	Notes	Proposed By	Proposed On	Team Comments	Comment Status	Last Reviewed By	Last Reviewed On	Release
OPS-16	D4	Platform Infrastructure	OPS	DevOps & Deployment	Worker topology	As DevOps, I deploy api, worker-realtime, worker-batch, custom-retry, and telegram-bot so separate services with restart policies so that a stuck job cannot take down the API.	M	P0	V2	Draft	DevOps	OPS-02	Build/config		salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancodes@gmail.com	9/14/2026	V2.0
OPS-17	D4	Platform Infrastructure	OPS	DevOps & Deployment	Job scheduling	As the platform, I run scheduled jobs for sync, reconciliation, reports, and SLA check through a defined scheduler with logs and alerts on misad runs.	M	P0	V2	Draft	BE-1	OPS-16	Build/config		salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancodes@gmail.com	9/14/2026	V2.0
OPS-18	D4	Platform Infrastructure	OPS	DevOps & Deployment	Zero-downtime deploys	As DevOps, I deploy with proxy-level switching and health gates so that traders see no interruption during releases.	M	P1	V2	Draft	DevOps	OPS-04	Build/config		salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancodes@gmail.com	9/14/2026	V2.0
OPS-19	D4	Platform Infrastructure	OPS	DevOps & Deployment	Staging broker sandbox	As the team, staging connects to a broker sandbox so that trading flows are testable and to end before production.	M	P1	V2	Draft	BE-1, DevOps	BRG-23	Build/config		salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancodes@gmail.com	9/14/2026	V2.0
OPS-20	D4	Platform Infrastructure	OPS	DevOps & Deployment	Prod access control	As DevOps, I limit production access to named people with an audited break-glass procedure so that prod access is exceptional and logged.	S	P0	V2	Draft	DevOps	OPS-13	Build/config		salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancodes@gmail.com	9/14/2026	V2.0
OPS-21	D4	Platform Infrastructure	OPS	DevOps & Deployment	Migration tooling	As the migration team, I have import pipelines with check-sums and reconciliation reports so that TTS data moves verifiably and privately.	M	P1	V2	Draft	BE-1, DevOps	MIG-01	Build/config		salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancodes@gmail.com	9/14/2026	V2.0
OPS-22	D4	Platform Infrastructure	OPS	DevOps & Deployment	DR runbook	As DevOps, I maintain a disaster recovery runbook with defined RPO and RTO and rehearse it twice a year so that recovery is practiced, not improvised.	S	P1	V2	Draft	DevOps	OPS-07	Build/config		salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancodes@gmail.com	9/14/2026	V2.0
OPS-23	D4	Platform Infrastructure	OPS	DevOps & Deployment	Cost monitoring	As the business, I get alerts on Hetzner and provision spend anomalies so that infrastructure cost stays visible.	S	P2	V2	Draft	DevOps	OPS-10	Build/config		salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancodes@gmail.com	9/14/2026	V2.0
OPS-24	D4	Platform Infrastructure	OPS	DevOps & Deployment	Deploy viability	As the team, I can see deploy history and the current version per environment so that which version is live is never a guess.	S	P1	V2	Draft	DevOps	OPS-04	Build/config		salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancodes@gmail.com	9/14/2026	V2.0
OPS-25	D4	Platform Infrastructure	OPS	DevOps & Deployment	Connection pooling	As the platform, I run PgBouncer in front of Postgres with per-service pool sizing so that the API and workers never exhaust connections during sync bursts or deploy spikes.	S	P1	V1-Core	Draft	DevOps	OPS-02	Build/config		salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancodes@gmail.com	9/14/2026	V1.0
OPS-26	D4	Platform Infrastructure	OPS	DevOps & Deployment	Redis durability and eviction	As the platform, I configure Redis with AOF persistence for Streams and maintain memory eviction for cache use so that a restart never loses queued events or breaks stateful logging.	S	P1	V1-Core	Draft	DevOps	OPS-02	Build/config		salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancodes@gmail.com	9/14/2026	V1.0
OPS-27	D4	Platform Infrastructure	OPS	DevOps & Deployment	Job single-execution lock	As the platform, scheduled jobs acquire a distributed lock so that reconciliation, reports, and detectors run exactly once across worker instances.	S	P1	V2	Draft	BE-1	OPS-17	Build/config		salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancodes@gmail.com	9/14/2026	V2.0
OPS-28	D4	Platform Infrastructure	OPS	DevOps & Deployment	Incident response process	As the team, I follow a documented incident process with severity definitions, an on-call on-call communication page, and mandatory postmortems for SEV-1 and SEV-2 so that incidents are handled consistently instead of ad hoc.	M	P1	V2	Draft	DevOps	OPS-11	Build/config		salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancodes@gmail.com	9/14/2026	V2.0
OPS-29	D4	Platform Infrastructure	OPS	DevOps & Deployment	Pre-launch load testing	As the team, I run load tests against checkout, sync, evaluation, and payout paths at target volumes before cutover so that bottlenecks surface before real traders hit them.	M	P1	V2	Draft	BE-1, DevOps	OPS-05	Build/config		salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancodes@gmail.com	9/14/2026	V2.0
OPS-30	D4	Platform Infrastructure	OPS	DevOps & Deployment	Rollback procedure	As DevOps, I maintain a tested rollback path for every deploy with automatic rollback on failed health gates so that a bad release recovers in minutes.	S	P1	V2	Draft	DevOps	OPS-18	Build/config		salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancodes@gmail.com	9/14/2026	V2.0
OPS-31	D4	Platform Infrastructure	OPS	DevOps & Deployment	External uptime monitoring	As ops, I run independent uptime probes against API and frontend endpoints outside the platform so that a total outage is detected even when the platform itself is down.	S	P1	V2	Draft	DevOps		Build/config		salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancodes@gmail.com	9/14/2026	V2.0
OPS-32	D4	Platform Infrastructure	OPS	DevOps & Deployment	Log retention and access	As ops, I enforce log retention windows, access control, and periodic PII reduction checks so that logs stay useful, bounded, and safe.	S	P1	V2	Draft	DevOps	OPS-10	Build/config		salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancodes@gmail.com	9/14/2026	V2.0
OPS-33	D4	Platform Infrastructure	OPS	DevOps & Deployment	Postgres failover strategy	As DevOps, I decide and document the failover approach, single instance plus rehearsed restore versus warm standby, and rehearse switchover so that database loss recovery is lowest rather than assumed.	M	P2	V2	Draft	DevOps	OPS-07	Build/config		salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancodes@gmail.com	9/14/2026	V2.0
OPS-34	D4	Platform Infrastructure	OPS	DevOps & Deployment	Staging data management	As the team, I generate synthetic traders, accounts, and orders for staging and never copy production PII so that staging is realistic and safe.	M	P2	V2	Draft	BE-1, DevOps	OPS-05	Build/config		salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancodes@gmail.com	9/14/2026	V2.0
OPS-35	D4	Platform Infrastructure	OPS	DevOps & Deployment	Domain and certificate expiry monitoring	As ops, I monitor custom domain DNS and SSL expiry per tenant and alert before expiry so that no tenant goes dark silently.	S	P2	V2	Draft	DevOps	TEN-05	Build/config		salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancodes@gmail.com	9/14/2026	V2.0
BRG-01	D1	Core Trading Engine	BRG	Trading Platform Bridge	Capability interface	As the platform, I define one broker capability interface covering create, state, positions, close, disable, enable, leverage, and password so that domain code never branches per platform.	L	P0	V1-Core	Draft	BE-1		Build	MetaApi	salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancodes@gmail.com	9/14/2026	V1.0
BRG-02	D1	Core Trading Engine	BRG	Trading Platform Bridge	MTS adapter	As the platform, I implement an MTS adapter through MetaApi or Brokerage so that MTS accounts are managed without building a new Manager API stack.	L	P0	V1-Core	Draft	BE-1	BRG-01	Build	MetaApi	salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancodes@gmail.com	9/14/2026	V1.0
BRG-03	D1	Core Trading Engine	BRG	Trading Platform Bridge	MatchTrader adapter	As the platform, I implement a MatchTrader adapter through its REST and WebSocket APIs so that a second trading platform is supported.	L	P1	V2	Draft	BE-1	BRG-01	Build		salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancodes@gmail.com	9/14/2026	V2.0
BRG-04	D1	Core Trading Engine	BRG	Trading Platform Bridge	Capability declaration	As the platform, each adapter declares which capabilities it supports, such as streaming, credit operations, and password reset, so that the platform degrades gracefully per provider.	M	P0	V2	Draft	BE-1	BRG-01	Build		salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancodes@gmail.com	9/14/2026	V2.0
BRG-05	D1	Core Trading Engine	BRG	Trading Platform Bridge	Account creation	As the account lifecycle, I create a broker account with group, leverage, and initial balance using an idempotency key so that there never exists duplicate accounts.	M	P0	V1-Core	Draft	BE-1	BRG-01	Build	MetaApi	salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancodes@gmail.com	9/14/2026	V1.0
BRG-06	D1	Core Trading Engine	BRG	Trading Platform Bridge	Credential storage and delivery	As the platform, I store broker credentials encrypted and deliver them to the trader through the portal and email so that traders can log in to their terminal.	M	P0	V1-Core	Draft	BE-1	TEN-12	Build		salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancodes@gmail.com	9/14/2026	V1.0
BRG-07	D1	Core Trading Engine	BRG	Trading Platform Bridge	Balance and equity sync	As the sync worker, I poll balance and equity for active accounts at a configurable interval and emit timestamped snapshots so that rules evaluate fresh data.	M	P0	V1-Core	Draft	BE-1	BRG-01	Build	MetaApi	salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancodes@gmail.com	9/14/2026	V1.0
BRG-08	D1	Core Trading Engine	BRG	Trading Platform Bridge	Position and trade sync	As the sync worker, I poll open positions and closed trades and normalize them into a unified schema so that risk and reports work on consistent data.	M	P0	V1-Core	Draft	BE-1	BRG-01	Build	MetaApi	salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancodes@gmail.com	9/14/2026	V1.0
BRG-09	D1	Core Trading Engine	BRG	Trading Platform Bridge	On-demand sync	As ops or the payout flow, I can trigger an on-demand sync for a single account so that eligibility checks never run on stale data.	S	P0	V1-Core	Draft	BE-1	BRG-07	Build		salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancodes@gmail.com	9/14/2026	V1.0
BRG-10	D1	Core Trading Engine	BRG	Trading Platform Bridge	Enforcement execution	As the enforcement worker, I restrict disable then-close commands from the command table with reruns and backoff so that a breach stops exposure quickly.	M	P0	V1-Core	Draft	BE-1	EV1-20	Build	MetaApi	salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancodes@gmail.com	9/14/2026	V1.0
BRG-11	D1	Core Trading Engine	BRG	Trading Platform Bridge	Command confirmation	As the platform, I write broker confirmations back to the command and the account state so that FAILED is only recorded after a real closure.	M	P0	V1-Core	Draft	BE-1	BRG-10	Build	MetaApi	salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancodes@gmail.com	9/14/2026	V1.0
BRG-12	D1	Core Trading Engine	BRG	Trading Platform Bridge	Leverage and group configuration	As the platform, I set leverage and the MTS group per phase config at creation and at phase change so that accounts match product rules.	M	P0	V1-Core	Draft	BE-1	EVL-01	Build		salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancodes@gmail.com	9/14/2026	V1.0
BRG-13	D1	Core Trading Engine	BRG	Trading Platform Bridge	Trading password reset	As a trader or admin, I can reset the trading account password through the bridge so that terminal access can be recovered.	S	P1	V2	Draft	BE-1	BRG-01	Build		salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancodes@gmail.com	9/14/2026	V2.0
BRG-14	D1	Core Trading Engine	BRG	Trading Platform Bridge	Enable and disable trading	As the platform, I can disable and re-enable trading on an account so that suspension and appeals take effect at the broker.	S	P0	V1-Core	Draft	BE-1	BRG-01	Build	MetaApi	salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancodes@gmail.com	9/14/2026	V1.0
BRG-15	D1	Core Trading Engine	BRG	Trading Platform Bridge	Reconciliation job	As ops, a daily and on-demand job compares business state against broker reality for login data, open positions, and balance, and opens ops cases on mismatch so that discrepancies never slip silent.	M	P0	V2	Draft	BE-2	LCD-01, BRG-07			salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancodes@gmail.com	9/14/2026	V2.0
BRG-16	D1	Core Trading Engine	BRG	Trading Platform Bridge	Provider health monitoring	As ops, I get heartbeats, latency, and error rates per broker server with alerts so that provider outages are detected immediately.	M	P0	V2	Draft	BE-1, DevOps	OPS-11	Build		salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancodes@gmail.com	9/14/2026	V2.0
BRG-17	D1	Core Trading Engine	BRG	Trading Platform Bridge	Provider rate limiting	As the platform, I throttle calls per provider API so that mass spams never hit vendor throttling.	S	P0	V2	Draft	BE-1	BRG-07	Build		salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancodes@gmail.com	9/14/2026	V2.0
BRG-18	D1	Core Trading Engine	BRG	Trading Platform Bridge	Reconnect and circuit breaker	As the platform, I handle provider disconnects with exponential backoff and circuit breakers so that transient failures do not cascade into the workers.	M	P0	V2	Draft	BE-1	BRG-01	Build		salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancodes@gmail.com	9/14/2026	V2.0
BRG-19	D1	Core Trading Engine	BRG	Trading Platform Bridge	Data normalization	As the platform, I normalize symbols, digits, volume units, and broker server time to UTC so that rules and reports are consistent across platforms.	M	P0	V2	Draft	BE-1	BRG-08	Build		salmancodes@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmancodes@gmail.com	9/14/2026	V2.0

Req ID	Domain ID	Domain Name	Module ID	Module	Feature Name	User Story	Complexity	Priority	Phase	Status	Owner	Depends On	🔗	Build Strategy	Notes	Proposed By	Proposed On	Team Comments	Comment Status	Last Reviewed By	Last Reviewed On	Release
BRG-20	D1	Core Trading Engine	BRG	Trading Platform Bridge	Multi-server support	As the platform, I connect to multiple broker servers per tenant with per-server configuration so that a firm can spread accounts across servers.	M	P1	V2	Draft	BE-1	TEN-11		Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
BRG-21	D1	Core Trading Engine	BRG	Trading Platform Bridge	Optional streaming	As the platform, if an adapter supports trade streaming I consume it for faster real-time evaluation while polling remains the reconciliation baseline.	M	P2	V3	Draft	BE-1	BRG-04		Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
BRG-22	D1	Core Trading Engine	BRG	Trading Platform Bridge	Audited credit operations	As an admin, I can apply audited credit or debit adjustments to a broker account balance so that support can correct provider errors without touching the broker manager.	M	P2	V2	Draft	BE-2	AUD-01		Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
BRG-23	D1	Core Trading Engine	BRG	Trading Platform Bridge	Sandbox mode	As the team, adapters run against broker or vendor sandboxes in staging so that flows are testable without production risk.	M	P1	V2	Draft	BE-1	OPS-19		Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
BRG-24	D1	Core Trading Engine	BRG	Trading Platform Bridge	cTrader adapter	As the platform, I integrate cTrader Open API so that a third trading platform is supported.	L	P2	V3	Draft	BE-1	BRG-01		Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
BRG-25	D1	Core Trading Engine	BRG	Trading Platform Bridge	DXtrade adapter	As the platform, I integrate DXtrade REST API for futures prep firms.	L	P2	V3	Draft	BE-1	BRG-01		Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
BRG-26	D1	Core Trading Engine	BRG	Trading Platform Bridge	Trade server failover	As the platform, I detect broker server failures and route to backup servers so that availability is maintained.	M	P2	V3	Draft	BE-1	BRG-16		Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
BRG-27	D1	Core Trading Engine	BRG	Trading Platform Bridge	Broker group catalog sync	As the platform, I fetch and cache available group and leverage options per broker server so that challenge configuration only offers groups that actually exist at the broker.	M	P1	V2	Draft	BE-1	BRG-12, BRG-20		Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
BRG-28	D1	Core Trading Engine	BRG	Trading Platform Bridge	Broker server time drift detection	As the platform, I detect when a broker server's reported time drifts beyond a configurable threshold from UTC and alert ops, so that daily rule resets and trading day counting stay consistent across servers.	S	P1	V2	Draft	BE-1	BRG-07		Build	Complements BRG-19 (data norma	salmarcode@gmail.com	9/16/2026	Added to close the BRG-28 gap		salmarcode@gmail.com	9/14/2026	V2.0
BRG-29	D1	Core Trading Engine	BRG	Trading Platform Bridge	Runtime property change	As the platform, I change an existing account's group or swap settings at runtime so that ads on fulfillment such as swap-free upgrades works after account creation.	M	P1	V2	Draft	BE-1	BRG-01, CHK-13		Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
BRG-30	D1	Core Trading Engine	BRG	Trading Platform Bridge	Investor password support	As the platform, I generate, deliver, and reset the read-only investor password alongside the master password so that traders can connect trading tools and daily reports.	S	P1	V2	Draft	BE-1	BRG-06		Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
BRG-31	D1	Core Trading Engine	BRG	Trading Platform Bridge	Command escalation	As the platform, after enforcement command retries are exhausted I raise an urgent ops alert with account and command context so that a failed close never leaves exposure open and unwise.	M	P0	V2	Draft	BE-1	BRG-10, OPS-11		Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
BRG-32	D1	Core Trading Engine	BRG	Trading Platform Bridge	Symbol mapping management	As ops, I maintain the broker symbol to normalized symbol mapping with automatic discovery and manual override so that new broker symbols do not silently break rules and reports.	M	P1	V2	Draft	BE-1	BRG-19		Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
BRG-33	D1	Core Trading Engine	BRG	Trading Platform Bridge	Sync gap detection and backfill	As the platform, I detect gaps in sync coverage and backfill trade history from the broker so that late evaluation and reports never run on incomplete data after an outage.	M	P1	V2	Draft	BE-1	BRG-08, BRG-15		Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
BRG-34	D1	Core Trading Engine	BRG	Trading Platform Bridge	Slot capacity alerts	As ops, I receive alerts when broker server account slots approach their limit so that provisioning never fails silently during a sales push.	S	P1	V2	Draft	BE-1	BRG-27, OPS-11		Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
BRG-35	D1	Core Trading Engine	BRG	Trading Platform Bridge	Broker-side account archival	As ops, I archive or disable terminal accounts at the broker to reclaim slots so that long-running tenants do not exhaust server capacity.	M	P2	V2	Draft	BE-1	BRG-14, LCC-21		Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
BRG-36	D1	Core Trading Engine	BRG	Trading Platform Bridge	Provider usage metering	As the platform, I record per-tenant bridge API calls and archive account counts so that provider costs can be passed through in future billing.	M	P2	V3	Draft	BE-1	TEN-20, BIL-17		Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
EVL-01	D1	Core Trading Engine	EVL	Evaluation Engine	Challenge template builder	As a tenant admin, I can define a challenge with type, account sizes, pricing phases, and per-phase rules so that products match my business without code changes.	L	P0	V1-Core	Draft	BE-2, FE-1	TEN-01		Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
EVL-02	D1	Core Trading Engine	EVL	Evaluation Engine	Rule set versioning	As the platform, I version every rule set and bind each account to the version active at creation so that rule edits never retroactively alter in-flight accounts except by defined policy.	M	P0	V1-Core	Draft	BE-1	EVL-01		Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V1.0
EVL-03	D1	Core Trading Engine	EVL	Evaluation Engine	Rule change propagation policy	As a tenant admin, I get documented and enforced behavior for when rules take effect, meaning next sync for trading rules, next eligibility check for payout rules, and new accounts only for group and leverage, so that changes are predictable.	M	P0	V2	Draft	BE-1	EVL-02		Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
EVL-04	D1	Core Trading Engine	EVL	Evaluation Engine	Pure evaluation function	As the platform, evaluation is a pure function of snapshot plus rule set version returning per-rule results with observed values and reasons so that decisions are deterministic and testable.	L	P0	V1-Core	Draft	BE-1	EVL-02		Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V1.0
EVL-05	D1	Core Trading Engine	EVL	Evaluation Engine	Evaluation triggers	As the platform, I evaluate rules on sync snapshots, on trade close on a daily schedule, and on admin demand so that no rule window is missed.	M	P0	V1-Core	Draft	BE-1	BRG-07		Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V1.0
EVL-06	D1	Core Trading Engine	EVL	Evaluation Engine	Profit target rule	As the platform, I check target profits against the configured basis so that passes are detected.	S	P0	V1-Core	Draft	BE-1	EVL-04		Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V1.0
EVL-07	D1	Core Trading Engine	EVL	Evaluation Engine	Daily drawdown rule	As the platform, I check the daily loss limit using a daily starting balance that resets at the configured time, on an equity or balance basis per config, so that daily breaches are caught.	M	P0	V1-Core	Draft	BE-1	EVL-04		Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V1.0
EVL-08	D1	Core Trading Engine	EVL	Evaluation Engine	Max drawdown rule	As the platform, I check maximum loss with static or trailing semantics, where trailing catches only upward and locks per account at creation, so that drawdown breaches are caught correctly.	M	P0	V1-Core	Draft	BE-1	EVL-04		Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V1.0
EVL-09	D1	Core Trading Engine	EVL	Evaluation Engine	Trading days rule	As the platform, I count qualifying trading days where daily profit meets the configured threshold so that minimum day requirements are enforced.	M	P0	V2	Draft	BE-1	EVL-04		Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
EVL-10	D1	Core Trading Engine	EVL	Evaluation Engine	Time limit rule	As the platform, I flag accounts that do not reach target within the configured calendar limit so that time-limited products expire correctly.	S	P0	V2	Draft	BE-1	EVL-04		Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
EVL-11	D1	Core Trading Engine	EVL	Evaluation Engine	Consistency rule	As the platform, I check that no single day exceeds the configured share of total profit on funded phases, enforced as a payout requirement, so that consistency policies hold.	M	P1	V2	Draft	BE-1	EVL-04		Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
EVL-12	D1	Core Trading Engine	EVL	Evaluation Engine	Floating PnL rule	As the platform, I check open loss against a configured limit on funded accounts so that catastrophic open exposure is caught between syncs.	M	P1	V2	Draft	BE-1	EVL-04		Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
EVL-13	D1	Core Trading Engine	EVL	Evaluation Engine	Weekend holding detection	As the platform, I detect positions held across the weekend window per challenge toggle and flag them for review so that weekend policies are observable without auto-fails.	M	P1	V2	Draft	BE-1	EVL-04		Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
EVL-14	D1	Core Trading Engine	EVL	Evaluation Engine	News trading detection	As the platform, I detect trades inside the configured window around high-impact news and flag them, enforcing only a payout eligibility check when enabled, so that news policy is observable without false auto-fails.	M	P1	V2	Draft	BE-1	RSK-01		Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
EVL-15	D1	Core Trading Engine	EVL	Evaluation Engine	Lot size detection	As the platform, I detect trades exceeding configured lot limits and flag them as soft breaches so that size policies are observable while broker groups enforce hard limits.	M	P2	V2	Draft	BE-1	EVL-04		Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
EVL-16	D1	Core Trading Engine	EVL	Evaluation Engine	Evaluation audit	As the platform, I save every evaluation with inputs, hash, rule version, observed values, thresholds, and results so that day trades can be replayed and defended in a dispute.	M	P0	V1-Core	Draft	BE-1	AUD-01		Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V1.0
EVL-17	D1	Core Trading Engine	EVL	Evaluation Engine	Hard breach action	As the platform, a hard breach transitions the account to BREACH_CONDITION and enforces disabling then close commands so that exposure stops immediately.	M	P0	V1-Core	Draft	BE-1	LCC-01, BRG-10		Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V1.0
EVL-18	D1	Core Trading Engine	EVL	Evaluation Engine	Soft breach warning	As the platform, a soft breach emits a warning event and flags the account without failing it so that admins can review marginal cases.	S	P1	V2	Draft	BE-1	EVL-04		Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V1.0
EVL-19	D1	Core Trading Engine	EVL	Evaluation Engine	Pass detection and auto-pass	As the platform, when all objectives and day requirements are met I mark the account PASS_PENDING and other auto-advance queue it for verification per config so that progression matches firm policy.	M	P0	V1-Core	Draft	BE-1	LCC-01		Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V1.0
EVL-20	D1	Core Trading Engine	EVL	Evaluation Engine	Manual override	As a tenant admin with permission, I can manually pass, fail, or reset an account with a recorded reason so that support can correct edge cases.	M	P0	V1-Plus	Draft	BE-2	AUD-01		Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V1.1

EVL-25	D1	Core Trading Engine	EVL	Evaluation Engine	Multi-asset rule sets	As the platform, I apply different rules per asset class (Forex, crypto, futures) within the same challenge.	M	P2	V3	Draft	BE-1	EVL-04	Build	salmarcode@gmail.com		9/14/2026 Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com		9/14/2026	V3.0	
EVL-26	D1	Core Trading Engine	EVL	Evaluation Engine	Evaluation latency SLA	As the platform, I define and enforce a maximum latency between a triggering event and breach detection and enforcement, so that a trader cannot keep trading after breaching during a sync delay and dispute the breach later.	M	P0	V2	Draft	BE-1	EVL-05, BRG-07	Build	salmarcode@gmail.com		9/14/2026 Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com		9/14/2026	V2.0	
EVL-27	D1	Core Trading Engine	EVL	Evaluation Engine	Daily reset timezone semantics	As the platform, I define explicitly when the 'day' resets for daily rules, using broker server time or tenant configured time, documented and visible to traders, so that daily loss disputes have a single defensible answer.	S	P0	V2	Draft	BE-1	EVL-07, TEN-07	Build	salmarcode@gmail.com		9/14/2026 Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com		9/14/2026	V2.0	
EVL-28	D1	Core Trading Engine	EVL	Evaluation Engine	Rule conflict validation	As a tenant admin, when I author a rule set the system validates for conflicting or impossible rules before saving, so that I cannot ship a challenge that cannot be passed.	M	P1	V2	Draft	BE-2	EVL-01	Build	salmarcode@gmail.com		9/14/2026 Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com		9/14/2026	V2.0	
EVL-29	D1	Core Trading Engine	EVL	Evaluation Engine	Trailing drawdown high-water mark mechanics	As the platform, I persist the trailing drawdown high-water mark per account and define explicitly whether it reverts on balance or equity, so that trailing drawdown disputes have one defensible answer.	M	P0	V1-Core	Draft	BE-1	EVL-08	Build	salmarcode@gmail.com		9/14/2026 Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com		9/14/2026	V1.0	
EVL-30	D1	Core Trading Engine	EVL	Evaluation Engine	Threshold tolerance buffers	As a tenant admin, I can configure optional tolerance buffers on rule thresholds, so that minor rounding or spiking errors do not cause unfair breaches.	S	P2	V2	Draft	BE-2	EVL-04	Build	salmarcode@gmail.com		9/14/2026 Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com		9/14/2026	V2.0	
LCC-01	D1	Core Trading Engine	LCC	Account Lifecycle	TradingAccount aggregate	As the platform, I use one authoritative account record with business status, phase, rule set trading, payout terms, and observed snapshot so that no other component inherits account state. As the platform, I enforce the guarded state machine covering CREATED, ACTIVE, BREACH, DETECTED, CLOSING, FAILED, PENDING, VERIFICATION, SUSPENDED, and TERMINATED so that invalid states are impossible.	L	P0	V1-Core	Draft	BE-1	TEN-01, BRG-01	Build	salmarcode@gmail.com		9/14/2026 Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com		9/14/2026	V1.0	
LCC-02	D1	Core Trading Engine	LCC	Account Lifecycle	State machine		L	P0	V1-Core	Draft	BE-1	LCC-01	Build	salmarcode@gmail.com		9/14/2026 Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com		9/14/2026	V1.0	
LCC-03	D1	Core Trading Engine	LCC	Account Lifecycle	State history and audit	As the platform, I record every transition with prior state, new state, trigger, action and inputs so that any account can be reconstructed at any point in time.	M	P0	V1-Core	Draft	BE-1	AUD-01	Build	salmarcode@gmail.com		9/14/2026 Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com		9/14/2026	V1.0	
LCC-04	D1	Core Trading Engine	LCC	Account Lifecycle	Optimistic concurrency	As the platform, I use a state version on every transition so that concurrent syncs and admin actions cannot race into inconsistent states.	M	P0	V2	Draft	BE-1	LCC-01	Build	salmarcode@gmail.com		9/14/2026 Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com		9/14/2026	V2.0	
LCC-05	D1	Core Trading Engine	LCC	Account Lifecycle	Provisioning on purchase	As the platform, on payment completed I create the phase 1 account through the bridge with group, leverage, and balance, then deliver credentials so that traders can start trading.	M	P0	V1-Core	Draft	BE-1	CHK-09, BRG-05	Build	salmarcode@gmail.com		9/14/2026 Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com		9/14/2026	V1.0	
LCC-06	D1	Core Trading Engine	LCC	Account Lifecycle	Provisioning on phase pass	As the platform, on verification approval I create the next phase account and link it into the phase lineage so that progression is traceable end to end.	M	P0	V1-Core	Draft	BE-1	EVL-19, BRG-05	Build	salmarcode@gmail.com		9/14/2026 Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com		9/14/2026	V1.0	
LCC-07	D1	Core Trading Engine	LCC	Account Lifecycle	KYC-gated funding	As the platform, I gate funded account creation on KYC status according to the challenge KYC timing config so that compliance holds per product.	M	P0	V1-Core	Draft	BE-1	KYC-07	Build	salmarcode@gmail.com		9/14/2026 Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com		9/14/2026	V1.0	
LCC-08	D1	Core Trading Engine	LCC	Account Lifecycle	Activation fee flow	As the platform, when a challenge has an activation fee I hold the passed account in AWAITING_ACTIVATION, email the payment link, and provision the funded account on payment so that payer's products work.	M	P1	V2	Draft	BE-1	CHK-08, NOT-05	Build	salmarcode@gmail.com		9/14/2026 Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com		9/14/2026	V2.0	
LCC-09	D1	Core Trading Engine	LCC	Account Lifecycle	Auto-upgrade on KYC	As the platform, when configured, accounts pending KYC auto-upgrade to the next KYC clears so that manual verification work is reduced.	S	P1	V2	Draft	BE-1	KYC-01	Build	salmarcode@gmail.com		9/14/2026 Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com		9/14/2026	V2.0	
LCC-10	D1	Core Trading Engine	LCC	Account Lifecycle	Phase lineage	As the platform and as an admin, I maintain the chain of related accounts per trader per challenge so that history and audits follow the whole journey. As a tenant admin, I can suspend and resume an account with a recorded reason so that investigations pause trading safely.	M	P0	V2	Draft	BE-1	LCC-01	Build	salmarcode@gmail.com		9/14/2026 Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com		9/14/2026	V2.0	
LCC-11	D1	Core Trading Engine	LCC	Account Lifecycle	Suspension and resume	As a tenant admin with permission, I can force pause, force fail, or reactivate an account with an audited reason so that support can resolve edge cases.	M	P0	V2	Draft	BE-2	BRG-14	Build	salmarcode@gmail.com		9/14/2026 Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com		9/14/2026	V1.1	
LCC-12	D1	Core Trading Engine	LCC	Account Lifecycle	Manual override transitions	As the platform, on a reset add-on purchase or free relate eligibility I create a new account for the same challenge and mark the old one RESET so that retries stay clean.	M	P1	V2	Draft	BE-1	CHK-12	Build	salmarcode@gmail.com		9/14/2026 Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com		9/14/2026	V2.0	
LCC-13	D1	Core Trading Engine	LCC	Account Lifecycle	Reset and retry	As the platform, on an extension add-on I extend the account end date so that time-limited products can be extended without manual hacks.	S	P1	V2	Draft	BE-1	CHK-12, CHK-13	Build	salmarcode@gmail.com		9/14/2026 Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com		9/14/2026	V2.0	
LCC-14	D1	Core Trading Engine	LCC	Account Lifecycle	Time extension	As a tenant admin, I can create labeled accounts for giveaways, partners, and imports without payment so that non-standard accounts exist clearly.	M	P1	V2	Draft	BE-2	BRG-01	Build	salmarcode@gmail.com		9/14/2026 Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com		9/14/2026	V2.0	
LCC-15	D1	Core Trading Engine	LCC	Account Lifecycle	Manual account creation	As the platform, I tag accounts with labels such as giveaways, partners, and third-party import so that reporting and payout rules can treat them differently.	S	P1	V2	Draft	BE-2	LCC-15	Build	salmarcode@gmail.com		9/14/2026 Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com		9/14/2026	V2.0	
LCC-16	D1	Core Trading Engine	LCC	Account Lifecycle	Account labels		S	P1	V2	Draft	BE-2	LCC-15	Build	salmarcode@gmail.com		9/14/2026 Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com		9/14/2026	V2.0	
LCC-17	D1	Core Trading Engine	LCC	Account Lifecycle	Credential resend	As a trader or admin, I can resend trading credentials so that lost credentials are recoverable without support tickets.	S	P1	V2	Draft	BE-1	NOT-01	Build	salmarcode@gmail.com		9/14/2026 Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com		9/14/2026	V2.0	
LCC-18	D1	Core Trading Engine	LCC	Account Lifecycle	Equity snapshots and daily summaries	As the platform, I store periodic equity snapshots and generate daily summaries per account so that charts, reports, and rule history have durable data.	M	P1	V2	Draft	BE-1	BRG-07	Build	salmarcode@gmail.com		9/14/2026 Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com		9/14/2026	V2.0	
LCC-19	D1	Core Trading Engine	LCC	Account Lifecycle	Trade history storage	As the platform, I store normalized closed trades per account so that trader history and reports never depend on broker retention.	M	P0	V2	Draft	BE-1	BRG-08	Build	salmarcode@gmail.com		9/14/2026 Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com		9/14/2026	V2.0	
LCC-20	D1	Core Trading Engine	LCC	Account Lifecycle	Payout terms at funding	As the platform, I set profit split, payout frequency, first withdrawal delay, and next withdrawal date at funded creation per challenge config so that payout eligibility is deterministic.	M	P0	V1-Core	Draft	BE-1	PAY-38	Build	salmarcode@gmail.com		9/14/2026 Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com		9/14/2026	V1.0	
LCC-21	D1	Core Trading Engine	LCC	Account Lifecycle	Archive	As a tenant admin, I can archive terminal accounts to cold storage while retaining audit so that operational tables stay fast.	M	P2	V2	Draft	BE-2	OPS-07	Build	salmarcode@gmail.com		9/14/2026 Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com		9/14/2026	V2.0	
LCC-22	D1	Core Trading Engine	LCC	Account Lifecycle	Migration import	As the migration team, I can import accounts from TTS with original status, dates, and lineage so that cutover preserves full history.	M	P1	V2	Draft	BE-1	OPS-21	Build	salmarcode@gmail.com		9/14/2026 Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com		9/14/2026	V2.0	
LCC-23	D1	Core Trading Engine	LCC	Account Lifecycle	Lifecycle events	As the platform, I emit AccountCreated, PhaseAdvanced, AccountPassed, AccountBreached, AccountFailed, FundedCreated, Suspended, and Resumed events through the audios so that other modules react without coupling.	M	P0	V1-Core	Draft	BE-1	EVT-01	Build	salmarcode@gmail.com		9/14/2026 Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com		9/14/2026	V1.0	
LCC-24	D1	Core Trading Engine	LCC	Account Lifecycle	Account transfer	As a tenant admin, I transfer an account between traders with full audit so that ownership changes are tracked.	M	P2	V2	Draft	BE-2	LCC-01	Build	salmarcode@gmail.com		9/14/2026 Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com		9/14/2026	V1.0	
LCC-25	D1	Core Trading Engine	LCC	Account Lifecycle	Account merging	As the platform, I merge multiple accounts for scaling plans so that traders can consolidate state capital.	L	P2	V2	Draft	BE-2	LCC-01	Build	salmarcode@gmail.com		9/14/2026 Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com		9/14/2026	V2.0	
LCC-26	D1	Core Trading Engine	LCC	Account Lifecycle	Pre-expiry warning	As the platform, I notify a trader a configurable number of days before their challenge time limit expires, so that traders are not surprised by expiry and disputes drop.	S	P1	V2	Draft	BE-1	EVL-10, NOT-05	Build	salmarcode@gmail.com		9/14/2026 Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com		9/14/2026	V2.0	
LCC-27	D1	Core Trading Engine	LCC	Account Lifecycle	Terminal state cleanup	As the platform, when an account reaches a terminal state such as FAILED or TERMINATED, I close any open positions and disable the account at the broker, with audit, so that no orphaned open position is left live after the account is dead.	M	P1	V1-Core	Draft	BE-1	BRG-10, LCC-02	Build	salmarcode@gmail.com		9/14/2026 Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com		9/14/2026	V1.0	

Req ID	Domain ID	Domain Name	Module ID	Module	Feature Name	User Story	Complexity	Priority	Phase	Status	Owner	Depends On	Build Strategy	Notes	Proposed By	Proposed On	Team Comments	Comment Status	Last Reviewed By	Last Reviewed On	Release
LCC-28	D1	Core Trading Engine	LCC	Account Lifecycle	Snapshot staleness detection	As the platform, flag accounts whose observed snapshot has not refreshed within a threshold, and block rule evaluation and price eligibility on stale data, so the stale broker data never drives a breach or a payout.	M	P1	V2	Draft	BE-1	BRG-15, PAY-02	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
CHK-01	D2	Trader Experience	CHK	Checkout & Billing	Catalog consumption	As a trader, I see available challenges with sizes and prices from my tenant's catalog so that I can choose a product.	M	P0	V1-Core	Draft	FE-1, BE-2	EVL-01	Build flow, integrate providers		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcode@gmail.com	9/14/2026	V1.0
CHK-02	D2	Trader Experience	CHK	Checkout & Billing	Checkout session	As a trader, I start a checkout session that reserves price and coupon for a limited window so that mid-flow price changes cannot corrupt my order.	M	P0	V1-Core	Draft	BE-2	CHK-01	Build flow, integrate providers		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcode@gmail.com	9/14/2026	V1.0
CHK-03	D2	Trader Experience	CHK	Checkout & Billing	Trader account linkage	As the platform, checkout creates or links the trader account under the tenant so that every purchase attaches to an identity.	M	P0	V2	Draft	BE-2	AUTH-01	Build flow, integrate providers	NOWPayments	salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
CHK-04	D2	Trader Experience	CHK	Checkout & Billing	Payment provider adapters	As the platform, I integrate Match2Pay, Interkassa, and crypto rails behind one payment interface so that providers are swappable per tenant.	L	P0	V1-Core	Draft	BE-2	TEN-11	Build flow, integrate providers	Match2Pay	salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcode@gmail.com	9/14/2026	V1.0
CHK-05	D2	Trader Experience	CHK	Checkout & Billing	Local payment methods	As a trader in Pakistan or India, I can pay with local methods offered by my tenant's providers so that I can buy without international cards or crypto.	M	P0	V2	Draft	BE-2	CHK-04	Build flow, integrate providers	Interkassa	salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
CHK-06	D2	Trader Experience	CHK	Checkout & Billing	Hosted payment flow	As a trader, I complete payment on the provider's hosted page or embedded flow so that card data never touches our servers and we stay out of PCI scope.	M	P0	V1-Core	Draft	BE-2, FE-1	CHK-04	Build flow, integrate providers	Match2Pay	salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcode@gmail.com	9/14/2026	V1.0
CHK-07	D2	Trader Experience	CHK	Checkout & Billing	Payment webhook handling	As the platform, I process provider webhooks idempotently by provider event id and transaction payment state so that duplicate webhooks never double-charge orders.	M	P0	V1-Core	Draft	BE-2	EVT-10	Build flow, integrate providers	Match2Pay	salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcode@gmail.com	9/14/2026	V1.0
CHK-08	D2	Trader Experience	CHK	Checkout & Billing	Order creation	As the platform, on payment captured I create an order record with type, amount, currency, coupon, customer IP, and UTM so that revenue is trackable and to exit.	M	P0	V1-Core	Draft	BE-2	CHK-07	Build flow, integrate providers	Match2Pay	salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcode@gmail.com	9/14/2026	V1.0
CHK-09	D2	Trader Experience	CHK	Checkout & Billing	Provisioning trigger	As the platform, payment captured emits an event that triggers account provisioning so that traders receive accounts without manual steps.	S	P0	V1-Core	Draft	BE-2	CHK-08, EVT-01	Build flow, integrate providers		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcode@gmail.com	9/14/2026	V1.0
CHK-10	D2	Trader Experience	CHK	Checkout & Billing	Coupon engine	As a tenant admin, I create coupon codes with parameters or fixed discount, usage limits, and expiry so that promotions run without code changes.	M	P0	V2	Draft	BE-2, FE-1	TEN-01	Build flow, integrate providers		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
CHK-11	D2	Trader Experience	CHK	Checkout & Billing	Coupon validation	As the platform, I validate coupons at checkout against limits, expiry, and tenant scope so that coupon abuse is prevented.	M	P0	V2	Draft	BE-2	CHK-10	Build flow, integrate providers		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
CHK-12	D2	Trader Experience	CHK	Checkout & Billing	Add-ons and upsell	As a trader, I can add reser protection, swap-flow, or time extension at checkout so that optional value is captured at purchase time.	M	P1	V2	Draft	FE-1, BE-2	CHK-02	Build flow, integrate providers		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
CHK-13	D2	Trader Experience	CHK	Checkout & Billing	Add-on fulfillment	As the platform, purchased add-ons attach to the account and deliver their effect, such as swap-free group or extended end date, so that what was paid for is actually delivered.	M	P1	V2	Draft	BE-2	LCC-13, LCC-14	Build flow, integrate providers		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
CHK-14	D2	Trader Experience	CHK	Checkout & Billing	Activation fee order	As the platform, I create activation fee orders for paylater challenges and provision the funded account on payment so that the pay-later model works.	M	P1	V2	Draft	BE-2	LCC-08	Build flow, integrate providers		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
CHK-15	D2	Trader Experience	CHK	Checkout & Billing	Refund processing	As a tenant admin, I can issue refunds per provider with a recorded reason and a ledger entry so that refunds are auditable and revenue stays honest.	M	P0	V2	Draft	BE-2	CHK-08, CHK-20	Build flow, integrate providers		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
CHK-16	D2	Trader Experience	CHK	Checkout & Billing	Failed payment handling	As the platform, I record failed payments, notify the trader, and allow retry so that recoverable revenue is not lost.	M	P1	V1-Plus	Draft	BE-2	NOT-05	Build flow, integrate providers		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
CHK-17	D2	Trader Experience	CHK	Checkout & Billing	Receipt generation	As a trader, I receive a receipt for every order so that I have proof of purchase.	S	P1	V1-Plus	Draft	BE-2	DCC-01	Build flow, integrate providers		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcode@gmail.com	9/14/2026	V1.1
CHK-18	D2	Trader Experience	CHK	Checkout & Billing	BYO checkout webhook	As a tenant running an external checkout, I can POST payment completed with a signed payload so that my own checkout provisions accounts on the platform.	M	P1	V2	Draft	BE-2	EVT-10, QW-16	Build flow, integrate providers		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcode@gmail.com	9/14/2026	V1.0
CHK-19	D2	Trader Experience	CHK	Checkout & Billing	Attribution capture	As a tenant, checkout captures UTM parameters and stores them on the order so that marketing attribution works without extra tooling.	S	P1	V2	Draft	BE-2, FE-1	CHK-08	Build flow, integrate providers		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
CHK-20	D2	Trader Experience	CHK	Checkout & Billing	Payment state machine	As the platform, I track payment states including initiated, succeeded, failed, refunded, and chargeback so that payment trail is explicit and queryable.	M	P0	V2	Draft	BE-2	CHK-07	Build flow, integrate providers		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
CHK-21	D2	Trader Experience	CHK	Checkout & Billing	Provider evidence storage	As the platform, I store provider transaction ids and raw webhook payloads so that reconciliation and disputes have primary evidence.	S	P0	V2	Draft	BE-2	LED-04	Build flow, integrate providers		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
CHK-22	D2	Trader Experience	CHK	Checkout & Billing	Chargeback recording	As a tenant admin, I can record chargebacks from providers with a ledger reversal so that revenue reports stay honest.	M	P2	V2	Draft	BE-2	CHK-20	Build flow, integrate providers		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
CHK-23	D2	Trader Experience	CHK	Checkout & Billing	Local currency display	As a trader, I see an indicative price in my local currency while paying in USD so that pricing is understandable in my market.	M	P2	V2	Draft	FE-1	CHK-01	Build flow, integrate providers		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
CHK-24	D2	Trader Experience	CHK	Checkout & Billing	Funnel events	As the platform, I emit checkout started, abandoned, and completed events so that funnel analytics work from day one.	S	P1	V2	Draft	BE-2	EVT-01	Build flow, integrate providers		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
CHK-25	D2	Trader Experience	CHK	Checkout & Billing	Subscription billing	As a trader, I subscribe to monthly challenge access with auto-renewal so that recurring revenue is captured.	L	P2	V3	Draft	BE-2	CHK-08	Build flow, integrate providers		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
CHK-26	D2	Trader Experience	CHK	Checkout & Billing	Tax calculation	As the platform, I calculate VAT/GST per jurisdiction and include it in invoices so that tax compliance is automated.	M	P2	V2	Draft	BE-2	CHK-08	Build flow, integrate providers		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
CHK-27	D2	Trader Experience	CHK	Checkout & Billing	Installment payments	As a trader, I pay for challenges in installments so that high-ticket products are accessible.	M	P2	V3	Draft	BE-2	CHK-08	Build flow, integrate providers		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
CHK-28	D2	Trader Experience	CHK	Checkout & Billing	Offer entity and price override	As a marketing user, I can create an offer that overrides challenge price for a targeted segment with validity and stacking rules, so that targeted promotions run without code.	M	P1	V2	Draft	BE-2	CHK-02, CRM-03	Build flow, integrate providers	Note: CRM 04 already references o	salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
CHK-29	D2	Trader Experience	CHK	Checkout & Billing	Admin order management UI	As an ops or finance user, I can list, filter, search, and open any order with its trader, challenge, add-on, payment method, status, and full event history, and process refunds from there, so that order operations happen in one place instead of in the database.	M	P0	V2	Draft	BE-2, FE-1	CHK-08, CHK-15	Build flow, integrate providers		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
CHK-30	D2	Trader Experience	CHK	Checkout & Billing	Duplicate payment protection	As the platform, I detect when the same trader attempts to pay for the same challenge while an order is already pending or recently paid, and block or flag the duplicate, so that a trader is never charged twice for one account.	M	P0	V2	Draft	BE-2	CHK-07, CHK-20	Build flow, integrate providers		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
CHK-31	D2	Trader Experience	CHK	Checkout & Billing	Payment provisioning reconciliation	As the platform, a scheduled job verifies every paid order produced exactly one account and every active account traces back to a paid or free order, and opens a reconciliation case on any mismatch, so that money and accounts never silently diverge.	M	P0	V2	Draft	BE-2	CHK-08, LCC-05, EVT-01	Build flow, integrate providers		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
CHK-32	D2	Trader Experience	CHK	Checkout & Billing	Payment provider fallback	As the platform, when a payment provider fails or is unreachable, I fall back to a configured alternate provider or queue for retry, so that a single provider outage does not stop sales.	M	P1	V2	Draft	BE-2	CHK-04, TEN-11	Build flow, integrate providers		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
CHK-33	D2	Trader Experience	CHK	Checkout & Billing	Checkout session expiry	As the platform, I expire abandoned checkout sessions after a configured window and mark them abandoned, so that reserved price and coupon holds are released and abandoned state is trackable.	S	P0	V2	Draft	BE-2	CHK-02, CHK-24	Build flow, integrate providers		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
CHK-34	D2	Trader Experience	CHK	Checkout & Billing	Free and zero-value orders	As the platform, I handle zero-value orders for giveaways, free retries, and manual grants without requiring a payment provider, so that free accounts flow through the same order and provisioning path.	S	P0	V2	Draft	BE-2	CHK-08, LCC-15	Build flow, integrate providers		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
CHK-35	D2	Trader Experience	CHK	Checkout & Billing	Refund account disposition	As an ops or finance user, when I refund a paid challenge (I choose the disposition of any already-provisioned account (terminate, keep, or flag for review), so that a refund does not leave a live account that was paid back.	M	P0	V2	Draft	BE-2	CHK-15, LCC-02	Build flow, integrate providers		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
PAY-01	D1	Core Trading Engine	PAY	Payout System	Payout request	As a funded trader, I can request a payout of my available profit so that I receive my earnings.	M	P0	V1-Core	Draft	BE-2, FE-1	LCC-20	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcode@gmail.com	9/14/2026	V1.0
PAY-02	D1	Core Trading Engine	PAY	Payout System	Available profit calculation	As the platform, I compute available profit from balance and equity minus initial balance and prior payouts, respecting partial payout rules, so that requests are bounded correctly.	M	P0	V1-Core	Draft	BE-2	BRG-07	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcode@gmail.com	9/14/2026	V1.0
PAY-03	D1	Core Trading Engine	PAY	Payout System	Eligibility engine	As the platform, I check KYC status, minimum trading days, consistency trading day threshold, first withdrawal delay, new withdrawal date, minimum and maximum payout limits, and account status so that only eligible requests proceed.	L	P0	V1-Core	Draft	BE-2	KYC-08, EVL-16, LCC-20	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcode@gmail.com	9/14/2026	V1.0

PAY-05	D1	Core Trading Engine	PAY	Payout System	Payout method management	As a trader, I can save and confirm my crypto wallet or bank details so that payouts go to the right destination.	M	P0	V1-Plus	Draft	BE-2, FE-1	AUTH-01, AUTH-12	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V1.1
PAY-06	D1	Core Trading Engine	PAY	Payout System	Method change cooldown	As the platform, I enforce a cooldown and re-confirmation when a payout method changes so that a taken-over account cannot redirect payments.	M	P0	V2	Draft	BE-2	PAY-05	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
PAY-07	D1	Core Trading Engine	PAY	Payout System	Name match control	As an approver, I see the KYC-verified name next to the payout destination so that I can reject mismatched destinations before paying.	M	P0	V2	Draft	BE-2	KYC-09	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
PAY-08	D1	Core Trading Engine	PAY	Payout System	Approval queue	As a finance approver, I see a queue of eligible payout requests with full context including account, profit, sales, KYC, and risk so that I can decide with evidence.	M	P0	V1-Core	Draft	BE-2, FE-1	PAY-03	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V1.0
PAY-09	D1	Core Trading Engine	PAY	Payout System	Approve and reject with reason	As a finance approver, I can approve or reject with a recorded reason so that decisions are auditable and traders get explanations.	M	P0	V1-Core	Draft	BE-2	AUD-01, NOT-01	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V1.0
PAY-10	D1	Core Trading Engine	PAY	Payout System	Threshold second approval	As the platform, requests above a configured amount require a second approver so that large payouts have dual controls.	M	P1	V2	Draft	BE-2	PAY-09	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
PAY-11	D1	Core Trading Engine	PAY	Payout System	Auto-approve toggle	As a tenant admin, I can enable auto-approve for requests that pass all checks so that payout latency drops once trust is established.	M	P1	V2	Draft	BE-2	PAY-03	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
PAY-12	D1	Core Trading Engine	PAY	Payout System	Manual execution recording	As the COO, I record the executed payout with provider reference, amount, and timestamp, and the platform emits a PayoutPaid event through the outbox so that LED-08 settles the obligation and downstream modules react without coupling, even though sending is manual in V1.	M	P0	V1-Core	Draft	BE-2, FE-1	PAY-09	Manual for V1		salmarcodez@gmail.com	9/14/2026	Amended by Decision 6 (Payor Accepted)		salmarcodez@gmail.com	9/16/2026	V1.0
PAY-13	D1	Core Trading Engine	PAY	Payout System	Payout state machine	As the platform, I track states including requested, eligibility checked, pending approval, approved, rejected, processing, paid, failed, and cancelled so that payout truth is explicit.	M	P0	V1-Core	Draft	BE-2	PAY-01	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V1.0
PAY-14	D1	Core Trading Engine	PAY	Payout System	Ledger integration	As the platform, approval creates a payout obligation entry and payment creates a settled entry so that the ledger always balances.	M	P0	V1-Core	Draft	BE-2	LED-07, LED-08	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V1.0
PAY-15	D1	Core Trading Engine	PAY	Payout System	Post-payout account actions	As the platform, after a paid payout, I apply configured post-payout actions including drawdown lock and next withdrawal date update so that account terms stay correct.	M	P0	V2	Draft	BE-2	LOC-20, EVL-21	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
PAY-16	D1	Core Trading Engine	PAY	Payout System	Receipts and history	As a trader, I see my payout history and download receipts so that I have proof of earnings.	S	P1	V2	Draft	BE-2	DOC-01	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
PAY-17	D1	Core Trading Engine	PAY	Payout System	Trader cancellation	As a trader, I can cancel my pending request before approval so that mistakes are recoverable.	S	P1	V2	Draft	BE-2	PAY-13	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
PAY-18	D1	Core Trading Engine	PAY	Payout System	Failure and retry	As an ops, I can mark a payout failed with reason and retry as a new execution so that provider failures recover clearly.	M	P1	V2	Draft	BE-2	PAY-13	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
PAY-19	D1	Core Trading Engine	PAY	Payout System	Batch approval	As a finance approver, I can approve multiple eligible requests in one action so that payout day is efficient.	M	P1	V2	Draft	BE-2, FE-1	PAY-08	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
PAY-20	D1	Core Trading Engine	PAY	Payout System	Payment forecast	As a trader, I see upcoming eligible payouts for the next cycles so that treasury can plan liquidity.	M	P1	V2	Draft	BE-2	PAY-03	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
PAY-21	D1	Core Trading Engine	PAY	Payout System	Scheduling enforcement	As the platform, I enforce payout frequency and next withdrawal date per account terms so that traders cannot request early.	M	P0	V1-Core	Draft	BE-2	LOC-20	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V1.0
PAY-22	D1	Core Trading Engine	PAY	Payout System	Dispute note	As a trader, I can attach a dispute note to a merchant payout that opens a support ticket so that disagreements have a channel.	S	P2	V2	Draft	BE-2	SUP-06	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
PAY-23	D1	Core Trading Engine	PAY	Payout System	Payout audit	As the platform, I log every payout action with actor, timestamp, and payload so that money movements are fully traceable.	S	P0	V2	Draft	BE-2	AUD-01	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
PAY-24	D1	Core Trading Engine	PAY	Payout System	Automated provider execution	As the platform, I send payouts through provider APIs automatically so that manual sending is removed once volume justifies it.	L	P2	V2	Draft	BE-2	PAY-12	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
PAY-25	D1	Core Trading Engine	PAY	Payout System	Multi-currency payouts	As a trader, I request payouts in my local currency with automatic conversion so that I receive funds in my preferred currency.	M	P2	V2	Draft	BE-2	PAY-01	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
PAY-26	D1	Core Trading Engine	PAY	Payout System	Payout method catalog configuration	As a tenant admin, I configure which payout rails are offered to traders with per-method maximums, maximums, fees, and processing estimates, so that trader choices match my real operations.	M	P0	V2	Draft	BE-2	TEN-11, PAY-05	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
PAY-27	D1	Core Trading Engine	PAY	Payout System	Eligibility snapshot freeze	As the platform, when a trader submits a payout request, I freeze the eligibility calculation, account snapshot, rule results, and positions, KYC status, and available profit used at request time, so that later account changes do not rewrite the evidence behind the request.	M	P0	V2	Draft	BE-2	PAY-02, PAY-03, BRG-09, EVL-16	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
PAY-28	D1	Core Trading Engine	PAY	Payout System	One active payout request per account	As the platform, I block a funded account from creating a second payout request while another request is pending, approved, or processing, so that payout obligations cannot be duplicated.	S	P0	V2	Draft	BE-2	PAY-01, PAY-13	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
PAY-29	D1	Core Trading Engine	PAY	Payout System	Pre-payout forced broker sync	As the platform, I trigger an on-demand broker sync before creating or approving a payout request, so that payout eligibility and available profit are based on fresh balance, equity, and position data.	M	P0	V2	Draft	BE-2	BRG-09, PAY-02, PAY-03	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
PAY-30	D1	Core Trading Engine	PAY	Payout System	Payout amount adjustment	As a finance approver, I can approve a lower amount than requested with a mandatory reason and trader notification, so that partial eligibility or policy limits can be handled without rejecting the whole request.	M	P1	V2	Draft	BE-2, FE-1	PAY-08, PAY-09, PAY-13	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
PAY-31	D1	Core Trading Engine	PAY	Payout System	Segregation of duties	As the platform, I prevent the same staff user from both approving and recording execution of the same payout when dual control is required, so that one person cannot complete the full money movement alone.	M	P0	V2	Draft	BE-2	PAY-09, PAY-10, PAY-12, AUTH-13	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
PAY-32	D1	Core Trading Engine	PAY	Payout System	Payout execution proof upload	As finance staff, I attach screenshots, transaction receipts, or provider confirmations when recording manual payout execution, so that every paid payout has evidence beyond a ledger reference.	S	P1	V2	Draft	BE-2, FE-1	PAY-12, TEN-18	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
PAY-33	D1	Core Trading Engine	PAY	Payout System	Provider-formatted payout export	As finance staff, I export approved payouts into a provider-specific CSV or JSON format, so that manual bulk execution is faster and less error-prone.	M	P1	V2	Draft	BE-2, FE-1	PAY-08, PAY-12, PAY-26	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
PAY-34	D1	Core Trading Engine	PAY	Payout System	Payout reconciliation job	As the platform, I reconcile approved, processing, paid, and failed payouts against ledger entries and recorded execution references, and raise exceptions for mismatches, so that payout records and financial truth never diverge silently.	M	P0	V2	Draft	BE-2	PAY-12, PAY-14, LED-08	Manual for V1		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
PAY-35	D1	Core Trading Engine	PAY	Payout System	Payout method verification	As the platform, I verify payout destination ownership through confirmation flow, signed wallet confirmation, micro-deposit, or manual finance approval depending on method type, so that payouts are not sent to unverified destinations.	M	P1	V2	Draft	BE-2	PAY-05, PAY-06, KYC-09	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
PAY-36	D1	Core Trading Engine	PAY	Payout System	Sensitive account-change payout hold	As the platform, I place a temporary payout hold after sensitive account changes such as email change, password reset, 2FA, or payout method change, or suspicious login, so that account takeover cannot immediately drain funds.	M	P0	V2	Draft	BE-2	AUTH-28, AUTH-29, PAY-06, RSK-02	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
PAY-37	D1	Core Trading Engine	PAY	Payout System	Payout reserve and hold reason	As finance staff, I can place a manual payout hold on an account with reason, expiry, and reviewer, so that treasury, compliance, or risk concerns can pause payouts without suspending the whole account.	M	P1	V2	Draft	BE-2, FE-1	PAY-04, RSK-10, AUD-01	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
PAY-38	D1	Core Trading Engine	PAY	Payout System	Payout policy configuration	As a tenant admin, I configure minimum payout, maximum payout, first payout delay, payout frequency, profit split, partial payout rules, and post-payout balance behavior per challenge or funded account type, so that payout terms are productionized instead of hardcoded.	M	P0	V1-Core	Draft	BE-2	EVL-01	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V1.0
PAY-39	D1	Core Trading Engine	PAY	Payout System	Payout rejection reason catalog	As a tenant admin, I manage reusable rejection reasons for payout denial, so that trader communication is consistent and reporting on denial causes is possible.	S	P1	V2	Draft	BE-2, FE-1	PAY-09, NOT-01	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0

PAY-40	D1	Core Trading Engine	PAY	Payout System	Payout SLA tracking	As ops, I track time from request to decision and decision to execution, with SLA breach alerts, so that payout operations remain measurable and traders are not left waiting silently.	M	P1	V2	Draft	BE-2	PAY-13, OPS-11, NOT-02	Build		salmancodez@gmail.com	9/14/2026	Added in PRD(20) consolidates	Accepted	salmancodez@gmail.com	9/14/2026	V2.0
KYC-01	D2	Trader Experience	KYC	KYC / Verification	Provider adapter interface	As the platform, I define a KYC provider interface covering session creation, status retrieval, webhooks parsing, and document retrieval so that providers are swappable per tenant.	M	P0	V1-Core	Draft	BE-2		Integrate provider, Build gates	Veriff	salmancodez@gmail.com	9/14/2026	Added in PRD(20) consolidates	Accepted	salmancodez@gmail.com	9/14/2026	V1.0
KYC-02	D2	Trader Experience	KYC	KYC / Verification	Veriff adapter	As the platform, I integrate Veriff using the tenant's on contract keys so that Funderbit's existing contract carries over without renegotiation.	M	P0	V1-Core	Draft	BE-2	TEN-11	Integrate provider, Build gates	Veriff	salmancodez@gmail.com	9/14/2026	Added in PRD(20) consolidates	Accepted	salmancodez@gmail.com	9/14/2026	V1.0
KYC-03	D2	Trader Experience	KYC	KYC / Verification	KYC timing per challenge	As a tenant admin, I configure when KYC is required per challenge, meaning at account creation, after evaluation, at first payout, or skipped, so that products match compliance posture.	M	P0	V2	Draft	BE-2	EVL-01	Integrate provider, Build gates		salmancodez@gmail.com	9/14/2026	Added in PRD(20) consolidates	Accepted	salmancodez@gmail.com	9/14/2026	V2.0
KYC-04	D2	Trader Experience	KYC	KYC / Verification	Verification session start	As a trader, I can start a hosted verification session from my portal so that I complete KYC without emailing documents to support.	M	P0	V2	Draft	BE-2, FE-1	KYC-02	Integrate provider, Build gates		salmancodez@gmail.com	9/14/2026	Added in PRD(20) consolidates	Accepted	salmancodez@gmail.com	9/14/2026	V2.0
KYC-05	D2	Trader Experience	KYC	KYC / Verification	Webhook status handling	As the platform, I process provider webhooks idempotently, update KYC status through the KYC-05 state machine, and emit kyc_submitted, kyc_approved, kyc_rejected, kyc_expired, and kyc_resubmission_requested events through the cubos so that decisions land exactly once and downstream modules react without coupling.	M	P0	V1-Core	Draft	BE-2	EVT-10	Integrate provider, Build gates		salmancodez@gmail.com	9/14/2026	Amended by Decision 5 (KYC) Accepted		salmancodez@gmail.com	9/16/2026	V1.0
KYC-06	D2	Trader Experience	KYC	KYC / Verification	KYC state machine	As the platform, I track NOT_STARTED, PENDING, IN_REVIEW, APPROVED, REJECTED, NEEDS_RESUBMISSION, and EXPIRED so that states is explicit and queryable.	M	P0	V1-Core	Draft	BE-2	KYC-05	Integrate provider, Build gates	Veriff	salmancodez@gmail.com	9/14/2026	Added in PRD(20) consolidates	Accepted	salmancodez@gmail.com	9/14/2026	V1.0
KYC-07	D2	Trader Experience	KYC	KYC / Verification	Funding gate	As the platform, I block funded account creation until KYC is approved when timing requires it so that compliance holds per product.	S	P0	V1-Core	Draft	BE-2	KYC-06	Integrate provider, Build gates	Veriff	salmancodez@gmail.com	9/14/2026	Added in PRD(20) consolidates	Accepted	salmancodez@gmail.com	9/14/2026	V1.0
KYC-08	D2	Trader Experience	KYC	KYC / Verification	Payout gate	As the platform, I block payout eligibility until KYC is approved when timing requires it so that money never leaves to an unvetted person.	S	P0	V1-Core	Draft	BE-2	KYC-06	Integrate provider, Build gates	Veriff	salmancodez@gmail.com	9/14/2026	Added in PRD(20) consolidates	Accepted	salmancodez@gmail.com	9/14/2026	V1.0
KYC-09	D2	Trader Experience	KYC	KYC / Verification	Verified identity record	As the platform, I store verified full name, date of birth, country, and provider reference so that payout name-match and audits have a single source.	M	P0	V1-Plus	Draft	BE-2	KYC-06	Integrate provider, Build gates		salmancodez@gmail.com	9/14/2026	Added in PRD(20) consolidates	Accepted	salmancodez@gmail.com	9/14/2026	V1.0
KYC-10	D2	Trader Experience	KYC	KYC / Verification	Re-initiation	As a tenant admin, I can re-initiate KYC for a trader with a recorded reason so that suspicious or stale verifications can be redone.	M	P0	V2	Draft	BE-2	AUD-01	Integrate provider, Build gates		salmancodez@gmail.com	9/14/2026	Added in PRD(20) consolidates	Accepted	salmancodez@gmail.com	9/14/2026	V1.1
KYC-11	D2	Trader Experience	KYC	KYC / Verification	Manual review fallback	As a tenant admin, I can review uploaded documents manually when the provider is unavailable or flags a case so that KYC never hardblocks operations.	M	P1	V1-Plus	Draft	BE-2, FE-1	KYC-12	Integrate provider, Build gates		salmancodez@gmail.com	9/14/2026	Added in PRD(20) consolidates	Accepted	salmancodez@gmail.com	9/14/2026	V2.0
KYC-12	D2	Trader Experience	KYC	KYC / Verification	Manual document upload	As a trader, I can upload my ID and proof of address through the portal for KYC verification so that the fallback path works end to end.	M	P1	V1-Plus	Draft	BE-2, FE-1	TEN-18	Integrate provider, Build gates		salmancodez@gmail.com	9/14/2026	Added in PRD(20) consolidates	Accepted	salmancodez@gmail.com	9/14/2026	V1.1
KYC-13	D2	Trader Experience	KYC	KYC / Verification	Country restrictions	As a tenant admin, I maintain a restricted country list so that registrations and verifications from prohibited jurisdictions are refused.	M	P1	V1-Plus	Draft	BE-2	TEN-01	Integrate provider, Build gates		salmancodez@gmail.com	9/14/2026	Added in PRD(20) consolidates	Accepted	salmancodez@gmail.com	9/14/2026	V1.1
KYC-14	D2	Trader Experience	KYC	KYC / Verification	Age verification	As the platform, I reject verifications where the verified age is under 18 so that minors cannot hold trading accounts.	S	P0	V1-Plus	Draft	BE-2	KYC-09	Integrate provider, Build gates		salmancodez@gmail.com	9/14/2026	Added in PRD(20) consolidates	Accepted	salmancodez@gmail.com	9/14/2026	V1.1
KYC-15	D2	Trader Experience	KYC	KYC / Verification	Resubmission flow	As a trader, I can resubmit after a NEEDS_RESUBMISSION decision within a limited attempt count so that trader failures recover without support tickets.	M	P1	V2	Draft	BE-2	KYC-06	Integrate provider, Build gates		salmancodez@gmail.com	9/14/2026	Added in PRD(20) consolidates	Accepted	salmancodez@gmail.com	9/14/2026	V2.0
KYC-16	D2	Trader Experience	KYC	KYC / Verification	KYC events	As the platform, I emit kyc_submitted, kyc_approved, kyc_rejected, kyc_expired, and kyc_resubmission_requested events so that lifecycle sub-graphs and payout eligibility react without coupling.	S	P0	V1-Core	Draft	BE-2	EVT-01	Integrate provider, Build gates		salmancodez@gmail.com	9/14/2026	Moved to V1.0 by Decision 5 (Accepted)		salmancodez@gmail.com	9/16/2026	V1.0
KYC-17	D2	Trader Experience	KYC	KYC / Verification	Admin queue and viewer	As a tenant admin, I see a KYC queue with status, provider result, and documents so that manual work is organized and fast.	M	P1	V2	Draft	FE-1	KYC-11	Integrate provider, Build gates		salmancodez@gmail.com	9/14/2026	Added in PRD(20) consolidates	Accepted	salmancodez@gmail.com	9/14/2026	V2.0
KYC-18	D2	Trader Experience	KYC	KYC / Verification	Status override	As a tenant admin with permission, I can override a KYC decision with an audited reason so that support is never stuck on a provider error.	M	P1	V2	Draft	BE-2	AUD-01	Integrate provider, Build gates		salmancodez@gmail.com	9/14/2026	Added in PRD(20) consolidates	Accepted	salmancodez@gmail.com	9/14/2026	V2.0
KYC-19	D2	Trader Experience	KYC	KYC / Verification	KYC audit	As the platform, I log every status change and override with actor and payload so that compliance history is complete.	S	P0	V2	Draft	BE-2	AUD-01	Integrate provider, Build gates		salmancodez@gmail.com	9/14/2026	Added in PRD(20) consolidates	Accepted	salmancodez@gmail.com	9/14/2026	V2.0
KYC-20	D2	Trader Experience	KYC	KYC / Verification	Trader status UI	As a trader, I see my KYC status and next steps so that I understand why funding or payouts are waiting.	S	P0	V2	Draft	FE-1	KYC-06	Integrate provider, Build gates		salmancodez@gmail.com	9/14/2026	Added in PRD(20) consolidates	Accepted	salmancodez@gmail.com	9/14/2026	V2.0
KYC-21	D2	Trader Experience	KYC	KYC / Verification	Re-verification triggers	As the platform, I trigger re-verification on document expiry or a risk flag so that identity stays current over time.	M	P2	V2	Draft	BE-2	KYC-06	Integrate provider, Build gates		salmancodez@gmail.com	9/14/2026	Added in PRD(20) consolidates	Accepted	salmancodez@gmail.com	9/14/2026	V2.0
KYC-22	D2	Trader Experience	KYC	KYC / Verification	Enhanced due diligence	As the platform, I trigger enhanced checks for high-value accounts so that risk is proportional to exposure.	M	P2	V2	Draft	BE-2	KYC-06	Integrate provider, Build gates		salmancodez@gmail.com	9/14/2026	Added in PRD(20) consolidates	Accepted	salmancodez@gmail.com	9/14/2026	V2.0
KYC-23	D2	Trader Experience	KYC	KYC / Verification	Corporate verification	As a tenant, I verify corporate entities for B2B accounts so that business accounts are compliant.	M	P2	V3	Draft	BE-2	KYC-01	Integrate provider, Build gates		salmancodez@gmail.com	9/14/2026	Added in PRD(20) consolidates	Accepted	salmancodez@gmail.com	9/14/2026	V3.0
KYC-24	D2	Trader Experience	KYC	KYC / Verification	KYC provider health monitoring	As the platform, I monitor Veriff API health and alert on degradation so that operations can switch to manual fallback before traders are blocked.	M	P1	V2	Draft	BE-2	OPS-11	Integrate provider, Build gates		salmancodez@gmail.com	9/14/2026	Added in PRD(20) consolidates	Accepted	salmancodez@gmail.com	9/14/2026	V2.0
KYC-25	D2	Trader Experience	KYC	KYC / Verification	KYC document expiry lifecycle	As the platform, I track document expiry dates and trigger re-verification workflow 30 days before expiry so that no trader operates on expired identity.	M	P1	V2	Draft	BE-2	KYC-09	Integrate provider, Build gates		salmancodez@gmail.com	9/14/2026	Added in PRD(20) consolidates	Accepted	salmancodez@gmail.com	9/14/2026	V2.0
KYC-26	D2	Trader Experience	KYC	KYC / Verification	KYC cost tracking	As the platform, I track cost per verification attempt and reconcile against provider invoice monthly so that KYC cost is visible and billable.	M	P1	V2	Draft	BE-2	KYC-02, LED-04	Integrate provider, Build gates		salmancodez@gmail.com	9/14/2026	Added in PRD(20) consolidates	Accepted	salmancodez@gmail.com	9/14/2026	V2.0
KYC-27	D2	Trader Experience	KYC	KYC / Verification	KYC consent management	As a trader, I provide explicit consent for identity verification processing, biometric data, and document storage before KYC initiation so that consent is provable and separate from general terms.	M	P0	V2	Draft	BE-2, FE-1	AUTH-31	Integrate provider, Build gates		salmancodez@gmail.com	9/14/2026	Added in PRD(20) consolidates	Accepted	salmancodez@gmail.com	9/14/2026	V2.0
KYC-28	D2	Trader Experience	KYC	KYC / Verification	KYC verification levels	As a tenant admin, I configure verification levels (Basic ID, ID plus proof of address, ID plus address plus selfie) per challenge type so that verification depth matches product risk.	M	P1	V2	Draft	BE-2	KYC-03	Integrate provider, Build gates		salmancodez@gmail.com	9/14/2026	Added in PRD(20) consolidates	Accepted	salmancodez@gmail.com	9/14/2026	V2.0
KYC-29	D2	Trader Experience	KYC	KYC / Verification	KYC initiation rate limiting	As the platform, I limit KYC initiation attempts per trader per time window so that abuse does not inflate provider costs.	S	P1	V2	Draft	BE-2	GW-05	Integrate provider, Build gates		salmancodez@gmail.com	9/14/2026	Added in PRD(20) consolidates	Accepted	salmancodez@gmail.com	9/14/2026	V2.0
KYC-30	D2	Trader Experience	KYC	KYC / Verification	KYC manual review SLA tracking	As a tenant admin, I see time-in-queue for manual KYC reviews and get alerts when SLA is breached so that manual review does not become a bottleneck.	M	P1	V2	Draft	BE-2	KYC-11, OPS-11	Integrate provider, Build gates		salmancodez@gmail.com	9/14/2026	Added in PRD(20) consolidates	Accepted	salmancodez@gmail.com	9/14/2026	V2.0
KYC-31	D2	Trader Experience	KYC	KYC / Verification	KYC data retention policy	As the platform, I enforce configurable retention periods for KYC documents and personal data so that privacy obligations are met without manual cleanup.	M	P1	V2	Draft	BE-2	AUD-10	Integrate provider, Build gates		salmancodez@gmail.com	9/14/2026	Added in PRD(20) consolidates	Accepted	salmancodez@gmail.com	9/14/2026	V2.0
KYC-32	D2	Trader Experience	KYC	KYC / Verification	KYC verification summary export	As a tenant admin, I export KYC verification records for compliance audits so that regulatory requests are answered without database access.	M	P1	V2	Draft	BE-2	AUD-09	Integrate provider, Build gates		salmancodez@gmail.com	9/14/2026	Added in PRD(20) consolidates	Accepted	salmancodez@gmail.com	9/14/2026	V2.0
KYC-33	D2	Trader Experience	KYC	KYC / Verification	KYC name mismatch resolution	As the platform, I detect when verified name does not match trader account name and flag for admin review so that identity fraud is caught before payouts.	M	P1	V2	Draft	BE-2	KYC-09, PAY-07	Integrate provider, Build gates		salmancodez@gmail.com	9/14/2026	Added in PRD(20) consolidates	Accepted	salmancodez@gmail.com	9/14/2026	V2.0
KYC-34	D2	Trader Experience	KYC	KYC / Verification	KYC provider fallback	As the platform, when the primary KYC provider fails beyond a threshold, I automatically route to manual review queue and alert ops so that traders are not blocked indefinitely.	M	P1	V2	Draft	BE-2	KYC-24, KYC-11	Integrate provider, Build gates		salmancodez@gmail.com	9/14/2026	Added in PRD(20) consolidates	Accepted	salmancodez@gmail.com	9/14/2026	V2.0
KYC-35	D2	Trader Experience	KYC	KYC / Verification	KYC document quality pre-check	As the platform, I perform basic quality checks (file size, format, minimum resolution) before submitting to provider so that obvious failures are caught before incurring provider cost.	S	P1	V2	Draft	BE-2, FE-1	KYC-04	Integrate provider, Build gates		salmancodez@gmail.com	9/14/2026	Added in PRD(20) consolidates	Accepted	salmancodez@gmail.com	9/14/2026	V2.0
NOT-01	D2	Trader Experience	NOT	Notification Service	Event consumer	As the platform, I consume domain events from the outbox relay so that notifications are triggered by state changes, not direct module calls.	M	P0	V1-Core	Draft	BE-2	EVT-01	Integrate provider, Build routing		salmancodez@gmail.com	9/14/2026	Added in PRD(20) consolidates	Accepted	salmancodez@gmail.com	9/14/2026	V1.0
NOT-02	D2	Trader Experience	NOT	Notification Service	Channel abstraction	As the platform, I route events to email, in-app, and Telegram channels independently so that adding a channel later requires no changes to producers.	M	P0	V2	Draft	BE-2		Integrate provider, Build routing		salmancodez@gmail.com	9/14/2026	Added in PRD(20) consolidates	Accepted	salmancodez@gmail.com	9/14/2026	V2.0

NOT03	D2	Trader Experience	NOT	Notification Service	Email provider adapter	As the platform, I integrate one email provider (Postmark, SendGrid or SES) behind an interface so that the provider is swappable per tenant.	M	P0	V1-Core	Draft	BE-2	TEN-11	Integrate provider, Build routing	Postmark	salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V1.0
NOT04	D2	Trader Experience	NOT	Notification Service	Template engine	As the platform, I render email and in-app content using a template engine with tenant-scoped variables so that branding and terminology are consistent.	M	P0	V2	Draft	BE-2	TEN-04, TEN-06	Integrate provider, Build routing	Postmark	salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
NOT05	D2	Trader Experience	NOT	Notification Service	Core transactional templates	As the platform, I ship 10 core templates: account created, phase passed, phase failed, breach, KYC invite, KYC result, payout requested, payout approved, payout rejected, certificate issued.	S	P0	V1-Core	Draft	BE-2		Integrate provider, Build routing	Postmark	salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V1.0
NOT06	D2	Trader Experience	NOT	Notification Service	Tenant branding in emails	As the platform, I inject tenant logo, colors, and from-address into every email so that traders see their prop firm's brand, not ours.	S	P0	V2	Draft	BE-2	TEN-04, TEN-14	Integrate provider, Build routing		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
NOT07	D2	Trader Experience	NOT	Notification Service	In-app notification store	As the platform, I persist in-app notifications with read/unread state so that traders see a history in their portal.	M	P0	V2	Draft	BE-2	AUTH-12	Integrate provider, Build routing		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
NOT08	D2	Trader Experience	NOT	Notification Service	In-app UI widget	As a trader, I see a bell icon with unread count and a dropdown list of recent notifications so that I stay informed without leaving the dashboard.	S	P1	V2	Draft	FE-1	NOT-07	Integrate provider, Build routing		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
NOT09	D2	Trader Experience	NOT	Notification Service	Telegram bot integration	As the platform, I run a Telegram bot worker that sends messages to traders who have linked their account so that critical alerts reach them instantly.	M	P1	V2	Draft	BE-2	AUTH-07	Integrate provider, Build routing		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
NOT10	D2	Trader Experience	NOT	Notification Service	Telegram account linking	As a trader, I can link my Telegram account to my trader profile via a one-time code so that the bot knows where to send messages.	M	P1	V2	Draft	BE-2, FE-1	AUTH-07	Integrate provider, Build routing		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
NOT11	D2	Trader Experience	NOT	Notification Service	Notification preferences	As a user, I can opt in or out of specific notification types per channel so that I am not spammed.	M	P1	V2	Draft	BE-2, FE-1	AUTH-07	Integrate provider, Build routing		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
NOT12	D2	Trader Experience	NOT	Notification Service	Delivery logs	As ops and support, I can view delivery elements, provider responses, and timestamps for any user so that I didn't get the email is deliverable.	M	P0	V2	Draft	BE-2, FE-1	NOT-03	Integrate provider, Build routing		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
NOT13	D2	Trader Experience	NOT	Notification Service	Idempotency and deduplication	As the platform, I deduplicate notifications by event id all channel so that event replay never spams a user.	M	P0	V1-Core	Draft	BE-2	EVT-05	Integrate provider, Build routing		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V1.0
NOT14	D2	Trader Experience	NOT	Notification Service	Broadcasts and banners	As a tenant admin, I can publish a banner or broadcast email to all active traders so that system announcements reach everyone.	M	P1	V2	Draft	BE-2, FE-1	AUTH-12	Integrate provider, Build routing		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
NOT15	D2	Trader Experience	NOT	Notification Service	Retry and dead letter for providers	As the platform, I retry failed email sends with backoff and log permanent failures so that tenant provider outages do not lose notifications.	S	P0	V2	Draft	BE-2	NOT-03	Integrate provider, Build routing		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
NOT16	D2	Trader Experience	NOT	Notification Service	Bounce and complaint handling	As the platform, I process provider webhooks for bounce and complaint and suppress future sends to those addresses so that sender reputation is protected.	M	P0	V2	Draft	BE-2	NOT-03, GW-11	Integrate provider, Build routing		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
NOT17	D2	Trader Experience	NOT	Notification Service	SMS notifications	As the platform, I send SMS via Twilio for critical alerts so that traders receive urgent messages.	M	P2	V2	Draft	BE-2	NOT-02	Integrate provider, Build routing		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
NOT18	D2	Trader Experience	NOT	Notification Service	WhatsApp Business	As the platform, I send notifications via WhatsApp Business API so that traders receive messages on their preferred channel.	M	P2	V2	Draft	BE-2	NOT-02	Integrate provider, Build routing		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
NOT19	D2	Trader Experience	NOT	Notification Service	Push notifications	As the platform, I send mobile push notifications so that traders receive alerts on their phones.	M	P2	V2	Draft	BE-2	NOT-02	Integrate provider, Build routing		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
NOT20	D2	Trader Experience	NOT	Notification Service	Template test send	As a tenant admin, I send a test render of any email template to myself with sample data so that template edits are verified before they reach traders.	S	P1	V2	Draft	FE-1	NOT-04, ADM-16	Integrate provider, Build routing		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
NOT21	D2	Trader Experience	NOT	Notification Service	Notification event mapping configuration	As a tenant admin, I configure which platform events trigger which notification types per tenant, so that notification behavior is configurable without code changes.	M	P1	V2	Draft	BE-2, FE-2	NOT-01, TEN-08	Integrate provider, Build routing		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
NOT22	D2	Trader Experience	NOT	Notification Service	Notification delivery dashboard	As a tenant admin, I see delivery success rates, failure rates, bounce rates, and delivery latency per channel at a glance so that notification health is visible.	M	P1	V2	Draft	BE-2, FE-2	NOT-12	Integrate provider, Build routing		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
NOT23	D2	Trader Experience	NOT	Notification Service	Notification escalation rules	As a tenant admin, I configure escalation rules that escalate notifications to another role after 3 hours of no response, so that critical items are not missed.	M	P1	V2	Draft	BE-2, FE-2	NOT-01, AUTH-14	Integrate provider, Build routing		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
NOT24	D2	Trader Experience	NOT	Notification Service	Notification quiet hours	As a tenant admin, I configure quiet hours per timezone where non-critical notifications are held until quiet hours end, so that traders are not disturbed at inappropriate times.	M	P1	V2	Draft	BE-2, FE-2	NOT-02, TEN-07	Integrate provider, Build routing		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
NOT25	D2	Trader Experience	NOT	Notification Service	Notification priority levels	As the platform, I support critical, high, normal, and low priority notifications where critical notifications bypass quiet hours and user preferences, so that critical alerts are always delivered.	M	P1	V2	Draft	BE-2	NOT-02	Integrate provider, Build routing		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
NOT26	D2	Trader Experience	NOT	Notification Service	Notification suppression rules	As a tenant admin, I configure system-level suppression rules (e.g., suppress duplicate breach alerts within 3 hours, suppress notifications during maintenance), so that traders are not spammed.	M	P1	V2	Draft	BE-2, FE-2	NOT-13	Integrate provider, Build routing		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
NOT27	D2	Trader Experience	NOT	Notification Service	Notification scheduling	As a tenant admin, I schedule notifications for future delivery (e.g., schedule a broadcast for tomorrow at 9am), so that time-sensitive communications are automated.	M	P1	V2	Draft	BE-2, FE-2	NOT-14	Integrate provider, Build routing		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
NOT28	D2	Trader Experience	NOT	Notification Service	Notification history in trader 360 view	As support staff, I see all notifications sent to a specific trader in their 360 view, so that I can troubleshoot communication issues.	M	P1	V2	Draft	BE-2, FE-2	NOT-12, ADM-03	Integrate provider, Build routing		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
NOT29	D2	Trader Experience	NOT	Notification Service	Notification consent tracking	As the platform, I track GDPR-style consent for each notification type per user, so that consent is provable and separate from general preferences.	M	P1	V2	Draft	BE-2	AUTH-31	Integrate provider, Build routing		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
NOT30	D2	Trader Experience	NOT	Notification Service	Notification rate limiting per tenant	As the platform, I enforce notification rate limits per tenant to prevent one tenant from flooding the notification system, so that system stability is protected.	M	P1	V2	Draft	BE-2	GW-05	Integrate provider, Build routing		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
NOT31	D2	Trader Experience	NOT	Notification Service	Notification localization	As the platform, I support multi-language notification templates per tenant locale, so that notifications are delivered in the trader's language.	M	P2	V2	Draft	BE-2, FE-2	TEN-07, NOT-04	Integrate provider, Build routing		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
NOT32	D2	Trader Experience	NOT	Notification Service	Notification delivery failure alerting	As an ops, I receive alerts when notification delivery failure rate exceeds threshold, so that provider issues are detected before traders notice.	M	P1	V2	Draft	BE-2	OPS-11, NOT-12	Integrate provider, Build routing		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
NOT33	D2	Trader Experience	NOT	Notification Service	Notification template versioning	As a tenant admin, I version notification templates and can rollback to previous versions, so that template changes are safe and reversible.	M	P1	V2	Draft	BE-2, FE-2	NOT-04	Integrate provider, Build routing		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
NOT34	D2	Trader Experience	NOT	Notification Service	Notification A/B testing	As a tenant admin, I test different notification subject lines or content variants to optimize open rates, so that notification effectiveness is measurable.	M	P2	V3	Draft	BE-2, FE-2	NOT-04, ANA-01	Integrate provider, Build routing		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
NOT35	D2	Trader Experience	NOT	Notification Service	Notification delivery failure investigation	As support staff, I investigate specific notification delivery failures with full context (event, template, provider response), so that delivery issues are diagnosable.	M	P1	V2	Draft	BE-2, FE-2	NOT-12	Integrate provider, Build routing		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
NOT36	D2	Trader Experience	NOT	Notification Service	Notification quiet hours override for critical	As the platform, critical notifications bypass quiet hours and user preferences, so that critical alerts are always delivered immediately.	S	P1	V2	Draft	BE-2	NOT-24, NOT-25	Integrate provider, Build routing		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
NOT37	D2	Trader Experience	NOT	Notification Service	Notification delivery SLA tracking	As an ops, I track notification delivery SLA (time from event to delivery per channel), so that delivery performance is measurable.	M	P1	V2	Draft	BE-2	NOT-12, OPS-10	Integrate provider, Build routing		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
NOT38	D2	Trader Experience	NOT	Notification Service	Notification webhook for external systems	As a tenant admin, I configure webhooks to notify external systems of notification events, so that external systems stay synchronized.	M	P2	V3	Draft	BE-2	EVT-11	Integrate provider, Build routing		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
DOC-01	D2	Trader Experience	DOC	Document Generation	PDF generation engine	As the platform, I render HTML templates to PDF using a reliable library so that certificates look exactly like the design.	M	P0	V1-Core	Draft	BE-2		Build	Puppeteer	salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V1.0
DOC-02	D2	Trader Experience	DOC	Document Generation	Tenant branding injection	As the platform, I inject tenant logo, colors, and fonts into the template so that certificates reflect the prop firm's brand. M	P1	V2	Draft	FE-1	CHK-10	Build		salmarcodes@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcodes@gmail.com	9/14/2026	V2.0
ADM-15	D3	Tenant Operations	ADM	Admin Panel	Broadcast and banner manager UI	As marketing staff, I schedule announcements and banners per segment so that campaigns run without engineering.	M	P1	V2	Draft	FE-1	NOT-14	Build		salmarcodes@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcodes@gmail.com	9/14/2026	V2.0
ADM-16	D3	Tenant Operations	ADM	Admin Panel	Email template editor	As a tenant admin, I edit the text and variables of the core email templates within a locked layout so that messaging matches my brand and policy.	M	P2	V2	Draft	FE-1	NOT-04	Build		salmarcodes@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcodes@gmail.com	9/14/2026	V2.0
ADM-17	D3	Tenant Operations	ADM	Admin Panel	Team and roles UI	As a tenant admin, I invite staff, create roles, and assign permission subsets so that access matches my org structure.	M	P0	V2	Draft	FE-1	AUTH-03, AUTH-14	Build		salmarcodes@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcodes@gmail.com	9/14/2026	V2.0
ADM-18	D3	Tenant Operations	ADM	Admin Panel	Audit log viewer	As a tenant admin, I search and filter audit events by actor, action, and entity so that accountability is visible to my team.	M	P1	V2	Draft	FE-1	AUD-06	Build		salmarcodes@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcodes@gmail.com	9/14/2026	V2.0
ADM-19	D3	Tenant Operations	ADM	Admin Panel	Settings pages	As a tenant admin, I manage branding, terminology, locale, legal pages, email sender, and integration credentials so that my tenant is self configured.	M	P0	V2	Draft	FE-1	TEN-04, TEN-06, TEN-07, TEN-11, TEN-13, TEN-14	Build		salmarcodes@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcodes@gmail.com	9/14/2026	V2.0
ADM-20	D3	Tenant Operations	ADM	Admin Panel	Webhook manager UI	As a tenant admin, I register outbound webhook endpoints, view delivery logs, and send test events so that my integrations are idempotent.	M	P1	V2	Draft	FE-1	EV1-11, EV1-14, EV1-15	Build		salmarcodes@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcodes@gmail.com	9/14/2026	V2.0
ADM-21	D3	Tenant Operations	ADM	Admin Panel	Certificate manager UI	As staff, I list generated certificates and regenerate on demand so that document issues are fixable.	S	P1	V2	Draft	FE-1	DOC-09	Build		salmarcodes@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcodes@gmail.com	9/14/2026	V2.0
ADM-22	D3	Tenant Operations	ADM	Admin Panel	Positions browser	As risk staff, I remove closed positions across accounts with filters so that trade-level investigation is possible.	M	P1	V2	Draft	FE-1	LOC-19	Build		salmarcodes@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcodes@gmail.com	9/14/2026	V2.0
ADM-23	D3	Tenant Operations	ADM	Admin Panel	News calendar UI	As risk staff, I add and edit economic news events with impact level and time so that news detection has reliable data.	M	P1	V2	Draft	FE-1	EVL-14	Build		salmarcodes@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcodes@gmail.com	9/14/2026	V2.0
ADM-24	D3	Tenant Operations	ADM	Admin Panel	Bulk operations	As staff, I apply bulk actions such as email or suspend to a filtered selection with confirmation so that mass operations are efficient and safe.	M	P2	V2	Draft	FE-1	ADM-05	Build		salmarcodes@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcodes@gmail.com	9/14/2026	V2.0
ADM-25	D3	Tenant Operations	ADM	Admin Panel	List exports	As staff, I export any managed list to CSV with current filters applied so that data leaves the system in a controlled way.	S	P1	V2	Draft	FE-1	ADM-03, ADM-05	Build		salmarcodes@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcodes@gmail.com	9/14/2026	V2.0
ADM-26	D3	Tenant Operations	ADM	Admin Panel	Broker management UI	As ops staff, I see each broker server with connection health, internal account slot usage, and group counts, and I can trigger a reconnect, so that broker problems are visible and actionable inside the admin panel.	M	P0	V2	Draft	FE-1	BRG-16, BRG-20	Build		salmarcodes@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcodes@gmail.com	9/14/2026	V2.0
ADM-27	D3	Tenant Operations	ADM	Admin Panel	Verification queue UI	As ops staff, I work a queue of PENDING accounts with full rule evidence and approve or reject with reasons, so that phase progression is controlled from one place.	M	P0	V2	Draft	FE-1	EVL-19, LOC-06	Build		salmarcodes@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcodes@gmail.com	9/14/2026	V2.0
ADM-28	D3	Tenant Operations	ADM	Admin Panel	Pending tasks overview	As a tenant admin, my operator dashboard shows one unified pending panel covering verifications, payouts, KYC, risk cases, and SLA breached tickets, so that nothing waits silently.	S	P0	V2	Draft	FE-1	ADM-02, ADM-27	Build		salmarcodes@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcodes@gmail.com	9/14/2026	V2.0
ADM-29	D3	Tenant Operations	ADM	Admin Panel	Trader communication composer	As staff, I send an email, in app message, or Telegram message to a trader from their last view using templates, and the send lands on the communication timeline, so that outreach happens inside the platform.	M	P1	V2	Draft	FE-1	CRM-02, NOT-02	Build		salmarcodes@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcodes@gmail.com	9/14/2026	V2.0
ADM-30	D3	Tenant Operations	ADM	Admin Panel	Live operations feed	As ops staff, I view a near real-time feed of provisioning, breaches, payouts, sync failures, and webhook failures filtered by my permissions, so that I see what is happening right now.	M	P1	V2	Draft	FE-1	EVT-01, ANA-01	Build		salmarcodes@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcodes@gmail.com	9/14/2026	V2.0
ADM-31	D3	Tenant Operations	ADM	Admin Panel	Payout batch export	As finance staff, I export approved payouts as a jsonder formatted batch file for bulk upload at the payout rat, so that manual execution is fast and error free.	M	P1	V2	Draft	FE-1	PAY-12	Build		salmarcodes@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcodes@gmail.com	9/14/2026	V2.0
ADM-32	D3	Tenant Operations	ADM	Admin Panel	Payout forecast view	As ops staff, I see upcoming eligible payouts per cycle with amounts, so that liquidity planning happens inside the panel.	S	P1	V2	Draft	FE-1	PAY-20	Build		salmarcodes@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcodes@gmail.com	9/14/2026	V2.0
ADM-33	D3	Tenant Operations	ADM	Admin Panel	SLA policy configuration	As a tenant admin, I configure first-response and resolution targets per priority plus business hours, so that SLA timers match my support promise.	S	P1	V2	Draft	FE-1	SUP-18	Build		salmarcodes@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcodes@gmail.com	9/14/2026	V2.0
ADM-34	D3	Tenant Operations	ADM	Admin Panel	Offer manager UI	As marketing staff, I create segment-targeted offers with discounted pricing and validity, separate from public coupons, so that targeted promotions run without code.	M	P1	V2	Draft	FE-1	CRM-03, CHK-28	Build		salmarcodes@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcodes@gmail.com	9/14/2026	V2.0
ADM-35	D3	Tenant Operations	ADM	Admin Panel	Global search	As staff, I search traders, accounts, payouts, tickets, and orders from one command box by email, id, or reference so that lookups don't depend on knowing which list to open.	M	P1	V2	Draft	FE-1	ADM-03, ADM-05	Build		salmarcodes@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcodes@gmail.com	9/14/2026	V2.0
ADM-36	D3	Tenant Operations	ADM	Admin Panel	Queue assignment	As a team lead, I assign verification and payout queue items to named staff so that mentoring is over layered support experts.	S	P1	V2	Draft	FE-1	ADM-27, ADM-09	Build		salmarcodes@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcodes@gmail.com	9/14/2026	V2.0
ADM-37	D3	Tenant Operations	ADM	Admin Panel	Ops alert routing preferences	As a tenant admin, I configure which roles receive which ops alerts such as sync failure, reconciliation mismatch, or breach alerts, by email or Telegram, so that alerts reach the right person.	M	P2	V2	Draft	FE-1	OPS-11	Build		salmarcodes@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcodes@gmail.com	9/14/2026	V2.0
ADM-38	D3	Tenant Operations	ADM	Admin Panel	Responsive admin layout	As on call ops staff, the admin panel works on tablet and phone for queue work and approvals so that I can act away from my desk.	M	P1	V2	Draft	FE-1	ADM-01	Build		salmarcodes@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcodes@gmail.com	9/14/2026	V2.0
RSK-01	D1	Core Trading Engine	RSK	Risk Management	Signal and case model	As the platform, I store signals with type, score, chance, evidence, and status, and group them into cases with linked accounts, traders, review actions, and final decision so that fraud review is structured and future proof.	L	P0	V1-Core	Draft	BE-2		Build		salmarcodes@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcodes@gmail.com	9/14/2026	V1.0
RSK-02	D1	Core Trading Engine	RSK	Risk Management	Fingerprint capture	As the platform, I capture IP device id, country, and proxy or hosting flags at login and at payout request so that identity signals have real data.	M	P0	V2	Draft	BE-2	AUTH-07	Build		salmarcodes@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcodes@gmail.com	9/14/2026	V2.0
RSK-03	D1	Core Trading Engine	RSK	Risk Management	IP overlap detector	As a batch job, I detect IP's shared across multiple active accounts beyond a threshold and raise signals so that multi-accounting surfaces.	M	P0	V2	Draft	BE-2	RISK-02	Build		salmarcodes@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcodes@gmail.com	9/14/2026	V2.0
RSK-04	D1	Core Trading Engine	RSK	Risk Management	Device overlap detector	As a batch job, I detect device ids shared across traders and raise signals so that device farms surface.	M	P1	V2	Draft	BE-2	RISK-02	Build		salmarcodes@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcodes@gmail.com	9/14/2026	V2.0
RSK-05	D1	Core Trading Engine	RSK	Risk Management	Copy trading detector	As a batch job, I detect account pairs with correlated trades on same symbol and direction with close open and close times, and raise signals with a correlation score so that copy rings surface.	L	P1	V2	Draft	BE-2	LOC-19	Build		salmarcodes@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcodes@gmail.com	9/14/2026	V2.0
RSK-06	D1	Core Trading Engine	RSK	Risk Management	Inverse trading detector	As a batch job, I detect account pairs holding opposite positions on the same symbol and raise signals so that hedging rings surface.	L	P1	V2	Draft	BE-2	LOC-19	Build		salmarcodes@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcodes@gmail.com	9/14/2026	V2.0
RSK-07	D1	Core Trading Engine	RSK	Risk Management	Rule flag ingestion	As the platform, I consume news trading and weekend hiding flags from the evaluation engine and convert them into risk signals, so that rule-adjacent behavior is reviewable.	M	P1	V2	Draft	BE-2	EVL-13, EVL-14	Build		salmarcodes@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmarcodes@gmail.com	9/14/2026	V2.0

Req ID	Domain ID	Domain Name	Module ID	Module	Feature Name	User Story	Complexity	Priority	Phase	Status	Owner	Depends On	🔗 Build Strategy	Notes	Proposed By	Proposed On	Team Comments	Comment Status	Last Reviewed By	Last Reviewed On	Release
RSK-08	D1	Core Trading Engine	RSK	Risk Management	KYC identity reuse detector	As a batch job, I detect the same verified identity across multiple trader accounts and raise signals so that identity sharing surfaces.	M	P1	V2	Draft	BE-2	KYC-09	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
RSK-09	D1	Core Trading Engine	RSK	Risk Management	Payment reuse detector	As a batch job, I detect shared payment references or wallets across traders and raise signals so that payment-level collusion surfaces.	M	P2	V3	Draft	BE-2	CHK-08	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V3.0
RSK-10	D1	Core Trading Engine	RSK	Risk Management	Case opening	As the platform, I open a risk case automatically when a signal score crosses a configured threshold, or manually by staff, so that review work is always queued.	M	P0	V1-Core	Draft	BE-2	RSK-01	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V1.0
RSK-11	D1	Core Trading Engine	RSK	Risk Management	Payout hold on open case	As the platform, I block payout eligibility while a case is open on the account so that money waits for review.	S	P0	V1-Plus	Draft	BE-2	PAY-04	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V1.1
RSK-12	D1	Core Trading Engine	RSK	Risk Management	Review queue	As risk staff, I get a queue of open cases with signals, evidence, linked accounts, and trader history so that review is fast and organized.	M	P0	V2	Draft	BE-2, FE-1	RSK-10			salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
RSK-13	D1	Core Trading Engine	RSK	Risk Management	Case decision workflow	As risk staff, I record decisions of releases, holds, recommend fail, or recommend block with notes so that outcomes are auditable and actionable.	M	P0	V2	Draft	BE-2	AUD-01	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
RSK-14	D1	Core Trading Engine	RSK	Risk Management	Action execution link	As the platform, a recommended fail or recommend block decision creates the corresponding admin action request with an audit link so that decisions execute only through controlled transitions.	M	P1	V2	Draft	BE-2	LCC-11, LCC-12	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
RSK-15	D1	Core Trading Engine	RSK	Risk Management	Two-account comparison tool	As risk staff, I view two accounts' trades side by side with time deltas so that copy suspicion can be confirmed or dismissed manually.	M	P1	V2	Draft	BE-2, FE-1	LCC-19	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
RSK-16	D1	Core Trading Engine	RSK	Risk Management	IP analysis view	As risk staff, I see accounts grouped per IP with counts and instances so that shared infrastructure is investigable.	M	P1	V2	Draft	BE-2, FE-1	RSK-02			salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
RSK-17	D1	Core Trading Engine	RSK	Risk Management	Device activity view	As risk staff, I see per-account device and login history so that session anomalies are visible.	M	P1	V2	Draft	BE-2, FE-1	RSK-02	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
RSK-18	D1	Core Trading Engine	RSK	Risk Management	Case alerts	As the platform, I notify risk staff when a high-score case opens so that urgent cases are never missed.	S	P1	V2	Draft	BE-2	NOT-05	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
RSK-19	D1	Core Trading Engine	RSK	Risk Management	Signal retention and audit	As the platform, I retain signals and case history immutably so that patterns and disputes have full history.	S	P0	V2	Draft	BE-2	AUD-01	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
RSK-20	D1	Core Trading Engine	RSK	Risk Management	Detector scheduling and tuning	As ops, I control detector run frequency and score thresholds per tenant so that sensitivity matches firm policy.	M	P1	V2	Draft	BE-2	TEN-01	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
RSK-21	D1	Core Trading Engine	RSK	Risk Management	Exposure monitoring dashboard	As risk staff, I see aggregate firm exposure by symbol and direction from synced positions so that concentrated risk is visible.	M	P2	V3	Draft	BE-2	BRG-07	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V3.0
RSK-22	D1	Core Trading Engine	RSK	Risk Management	Real-time exposure monitoring	As risk staff, I see live firm-wide exposure by symbol and direction so that concentrated risk is visible immediately.	L	P2	V3	Draft	BE-2	BRG-07	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V3.0
RSK-23	D1	Core Trading Engine	RSK	Risk Management	A-Book/B-Book integration	As the platform, I route profitable traders to A-Book (live market) and others to B-Book (internal) so that risk is managed.	L	P2	V3	Draft	BE-2	RSK-01	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V3.0
RSK-24	D1	Core Trading Engine	RSK	Risk Management	Liquidity provider routing	As the platform, I connect to liquidity providers for A-Book execution so that profitable trades are hedged.	L	P2	V3	Draft	BE-2	RSK-23	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V3.0
RSK-25	D1	Core Trading Engine	RSK	Risk Management	ML-based anomaly detection	As the platform, I use machine learning to detect unusual trading patterns so that sophisticated fraud is caught.	L	P2	V3	Draft	BE-2	RSK-01	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V3.0
RSK-26	D1	Core Trading Engine	RSK	Risk Management	Toxicity scoring	As the platform, I score traders on toxicity metrics so that problematic traders are identified early.	M	P2	V3	Draft	BE-2	RSK-01	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V3.0
RSK-27	D1	Core Trading Engine	RSK	Risk Management	Internal trade copier	As the platform, I copy funded account trades to live market accounts so that profitable strategies are executed in real markets.	L	P2	V3	Draft	BE-2	RSK-23	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V3.0
RSK-28	D1	Core Trading Engine	RSK	Risk Management	Signal scoring and dedup configuration	As ops, I configure per-detector score weights, case-opening thresholds, and a dedup window that merges repeated identical signals instead of stacking them, so that detector sensitivity is tunable and repeated detections do not spam the queue.	M	P1	V2	Draft	BE-2	RSK-01, RSK-10, RSK-20	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
RSK-29	D1	Core Trading Engine	RSK	Risk Management	Case SLA and aging escalation	As ops, I see case age in the review queue and get escalation alerts when a case sits open beyond a configured age, so that risk holds do not quietly strand traders for weeks.	M	P1	V2	Draft	BE-2	RSK-12, OPS-11	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
RSK-30	D1	Core Trading Engine	RSK	Risk Management	Allowlist management	As risk staff, I add traders (IPs, devices, or payment references) to an allowlist with reason and expiry, and allowlisted entities stop raising signals, so that confirmed false positives do not fire repeatedly.	M	P1	V2	Draft	BE-2	RSK-01, RSK-19	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
RSK-31	D1	Core Trading Engine	RSK	Risk Management	Payout hold expiry	As the platform, risk holds carry an expiry and require approval to extend, so that a hold never strands a trader's payout indefinitely without a decision.	S	P1	V2	Draft	BE-2	RSK-11	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
RSK-32	D1	Core Trading Engine	RSK	Risk Management	Pre-purchase risk screening	As the platform, I screen purchases against blacklisted traders, IPs, devices, and payment references at checkout and block or flag matches, so that stolen-card challenge purchases are stopped before provisioning.	M	P1	V2	Draft	BE-2	RSK-01, CHK-03, ADM-04	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
RSK-33	D1	Core Trading Engine	RSK	Risk Management	Case evidence attachments and notes	As risk staff, I attach evidence and collaboration notes to a case beyond auto-generated signals, so that investigation context lives with the case.	S	P1	V2	Draft	BE-2	RSK-01, TEN-18	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
RSK-34	D1	Core Trading Engine	RSK	Risk Management	Profit spike detector	As a batch job, I detect abnormal profit spikes shortly before payout requests and raise signals, so that profit-dump-thru-withdraw schemes surface before money leaves.	M	P2	V2	Draft	BE-2	RSK-01, PRY-01	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
RSK-35	D1	Core Trading Engine	RSK	Risk Management	Risk context on payout queue	As a finance approver, I see open risk signals and case status inline on each payout request in the approval queue, so that approval decisions include risk context without leaving the queue.	S	P1	V2	Draft	BE-2	PAY-08, RSK-12	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
ANA-01	D3	Tenant Operations	ANA	Analytics & BI	Read model foundation	As the platform, I maintain read model tables updated from domain events plus nightly aggregation so that reports never query operational tables.	L	P0	V1-Core	Draft	BE-2	EVT-01	Build core, integrate advanced		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V1.0
ANA-02	D3	Tenant Operations	ANA	Analytics & BI	Daily operations report	As a tenant admin, I view a daily report with revenue, volume, payouts, new traders, parent, fails, and breaches so that the daily standup runs on real numbers.	M	P0	V2	Draft	BE-2, FE-1	ANA-01	Build core, integrate advanced		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
ANA-03	D3	Tenant Operations	ANA	Analytics & BI	Monthly financial report	As a tenant admin and COO, I view monthly revenue, payouts, refunds, chargebacks, net, and margin so that month-end close happens inside the platform.	M	P0	V2	Draft	BE-2, FE-1	LED-01	Build core, integrate advanced		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
ANA-04	D3	Tenant Operations	ANA	Analytics & BI	Challenge performance report	As a tenant admin, I view sales, pass rate, fail rate, and average time to pass per challenge and size so that product and pricing decisions are data driven.	M	P1	V2	Draft	BE-2	ANA-01	Build core, integrate advanced		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
ANA-05	D3	Tenant Operations	ANA	Analytics & BI	Payout report	As finance staff, I view payouts by period, method, and status with average processing time so that payout operations are measurable.	M	P1	V2	Draft	BE-2	PAY-01	Build core, integrate advanced		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
ANA-06	D3	Tenant Operations	ANA	Analytics & BI	Geo report	As a tenant admin, I view revenue, payouts, and risk flags by country so that geo strategy and restriction policy are informed.	M	P1	V2	Draft	BE-2	ANA-01	Build core, integrate advanced		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
ANA-07	D3	Tenant Operations	ANA	Analytics & BI	Challenge versus payout risk report	As a tenant admin, I view payout ratio per challenge and size so that unprofitable products surface early.	M	P1	V2	Draft	BE-2	LED-01, PAY-01	Build core, integrate advanced		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
ANA-08	D3	Tenant Operations	ANA	Analytics & BI	Top earners and loss cohorts	As a tenant admin, I view top earning traders and cohorts where payouts exceed revenue so that risk review is targeted where money leaks.	M	P1	V2	Draft	BE-2	ANA-07	Build core, integrate advanced		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
ANA-09	D3	Tenant Operations	ANA	Analytics & BI	Funnel report	As a tenant admin, I view registration to purchase to phase pass to funded to payout conversion so that growth bottlenecks are visible.	M	P1	V2	Draft	BE-2	ANA-01	Build core, integrate advanced		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
ANA-10	D3	Tenant Operations	ANA	Analytics & BI	Operator KPI feed	As the admin dashboard, I consume KPI aggregates including revenue today and month to date, active accounts, and pending queues from read models so that the operator dashboard stays fast.	M	P0	V2	Draft	BE-2	ANA-01	Build core, integrate advanced		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
ANA-11	D3	Tenant Operations	ANA	Analytics & BI	CSV export	As staff, I export any report to CSV with applied filters so that data can leave the system for offline work in a controlled way.	S	P1	V2	Draft	FE-1	ANA-02, ANA-03, ANA-04, ANA-05, ANA-06, ANA-07, ANA-08, ANA-09	Build core, integrate advanced		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
ANA-12	D3	Tenant Operations	ANA	Analytics & BI	Scheduled email delivery	As a tenant admin, I subscribe roles to scheduled daily or monthly report emails so that numbers arrive without anyone logging in.	M	P2	V2	Draft	BE-2	NOT-03	Build core, integrate advanced		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
ANA-13	D3	Tenant Operations	ANA	Analytics & BI	Report permissions	As the platform, I gate reports behind permission keys such as analytics.read and analytics.financial.read so that sensitive financials are role limited.	S	P0	V2	Draft	BE-2	AUTH-13	Build core, integrate advanced		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0

ANA-28	D3	Tenant Operations	ANA	Analytics & BI	Platform-level cross-tenant analytics	As a platform owner, I view aggregate analytics across all tenants including total traders, revenue, breaches, and top tenants, so that I see platform-wide health.	M	P2	V3	Draft	BE-2	ANA-01	Build conc, Integrate advanced		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
AFF-01	D5	Ecosystem & Growth	AFF	Affiliate System	Registration and approval	As a trader or external partner, I can apply to become an affiliate, and as an admin I approve or reject applications so that the program stays controlled.	M	P1	V3	Draft	BE-2, FE-1	AUTH-01, AUTH-12	Integrate		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
AFF-02	D5	Ecosystem & Growth	AFF	Affiliate System	Referral link and code generation	As an affiliate, I get unique referral links and coupon codes so that my traffic is attributable to me.	M	P1	V3	Draft	BE-2	AFF-01	Integrate		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
AFF-03	D5	Ecosystem & Growth	AFF	Affiliate System	Attribution tracking	As the platform, I capture referral clicks with cookies, UTM, and sub-ID and attribute the signup and purchase to the affiliate so that commissions are fair.	M	P1	V3	Draft	BE-2	CHK-19	Integrate		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
AFF-04	D5	Ecosystem & Growth	AFF	Affiliate System	Coupon attribution	As the platform, I attribute purchases made with an affiliate coupon even without a cookie so that code-driven sales are counted.	S	P1	V3	Draft	BE-2	CHK-11	Integrate		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
AFF-05	D5	Ecosystem & Growth	AFF	Affiliate System	Commission rules engine	As a tenant admin, I define CPA flat fee, revenue share percentage, or hybrid per program with per-affiliate overrides so that deals match real agreements.	M	P1	V3	Draft	BE-2	AFF-01	Integrate		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
AFF-06	D5	Ecosystem & Growth	AFF	Affiliate System	Commission accrual	As the platform, I create pending commission entries on attributed paid orders so that earnings accumulate automatically without manual bookies.	M	P1	V3	Draft	BE-2	CHK-08	Integrate		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
AFF-07	D5	Ecosystem & Growth	AFF	Affiliate System	Refund and chargeback reversal	As the platform, I reverse pending or approved commissions when the attributed order is refunded or charged back so that affiliates never earn on lost revenue.	M	P1	V3	Draft	BE-2	CHK-15, CHK-22	Integrate		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
AFF-08	D5	Ecosystem & Growth	AFF	Affiliate System	Commission approval window	As the platform, I move commissions from pending to approved only after a configurable refund window so that payouts are safe.	M	P1	V3	Draft	BE-2	AFF-07	Integrate		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
AFF-09	D5	Ecosystem & Growth	AFF	Affiliate System	Affiliate dashboard	As an affiliate, I see clicks, signups, conversions, earnings, and payout history so that I can track my own business.	M	P1	V3	Draft	FE-1	AFF-06	Integrate		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
AFF-10	D5	Ecosystem & Growth	AFF	Affiliate System	Payout request and queue	As an affiliate, I request payout above a minimum threshold, and as finance I approve and record manual execution so that affiliates get paid with full control.	M	P1	V3	Draft	BE-2, FE-1	AFF-08	Integrate		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
AFF-11	D5	Ecosystem & Growth	AFF	Affiliate System	Payout history and receipts	As an affiliate, I see my payout history and download receipts so that my records are complete.	S	P2	V3	Draft	FE-1	AFF-10	Integrate		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
AFF-12	D5	Ecosystem & Growth	AFF	Affiliate System	Self-referral fraud detection	As the platform, I detect and flag self-referrals where the affiliate and the referred trader share the same IP, or device so that program abuse is caught.	M	P1	V3	Draft	BE-2	RSK-02, RSK-03, RSK-04	Integrate		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
AFF-13	D5	Ecosystem & Growth	AFF	Affiliate System	Affiliate management admin	As a tenant admin, I list affiliates, approve or reject, set custom rates, and blacklist so that program operations are manageable.	M	P1	V3	Draft	FE-1	AFF-01	Integrate		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
AFF-14	D5	Ecosystem & Growth	AFF	Affiliate System	Affiliate reports	As a tenant admin, I view conversions, earnings, and top affiliates so that program return on investment is visible.	M	P2	V3	Draft	BE-2	ANA-01	Integrate		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
AFF-15	D5	Ecosystem & Growth	AFF	Affiliate System	Conversion workbook for BPO affiliate	As a tenant using an external affiliate tool, I receive signed conversion workbooks so that my external tool can attribute and pay instead of the built-in module.	M	P2	V3	Draft	BE-2	EVT-11	Integrate		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
AFF-16	D5	Ecosystem & Growth	AFF	Affiliate System	Marketing materials library	As an affiliate, I access banners and copy provided by the tenant so that promotion is easy and on-brand.	S	P2	V3	Draft	FE-1	TEN-04	Integrate		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
AFF-17	D5	Ecosystem & Growth	AFF	Affiliate System	Affiliate events	As the platform, I emit referred, commission earned, commission approved, and commission paid events so that notifications and reports react without coupling.	S	P1	V3	Draft	BE-2	EVT-01	Integrate		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
AFF-18	D5	Ecosystem & Growth	AFF	Affiliate System	Multi-tier commissions	As a tenant admin, I configure multi-tier (MLM-style) commissions so that affiliates earn from sub-affiliates.	M	P2	V3	Draft	BE-2	AFF-05	Integrate		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
AFF-19	D5	Ecosystem & Growth	AFF	Affiliate System	Affiliate API	As an affiliate, I access my data via API so that I can build custom dashboards and tools.	M	P2	V3	Draft	BE-2	SDK-01	Integrate		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
AFF-20	D5	Ecosystem & Growth	AFF	Affiliate System	Attribution window and model configuration	As a tenant admin, I configure the cookie window duration and the attribution model (first-click vs last-click) so that attribution is fair and matches my program rules.	M	P1	V3	Draft	BE-2	AFF-03	Integrate		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
AFF-21	D5	Ecosystem & Growth	AFF	Affiliate System	Affiliate payout method management	As an affiliate, I can save and confirm my payout method (crypto wallet, bank, or other) so that approved payments go to the right destination.	M	P0	V3	Draft	BE-2	AFF-10	Integrate		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
AFF-22	D5	Ecosystem & Growth	AFF	Affiliate System	Affiliate tax form collection	As a tenant admin, I can require affiliates to submit W-9 or W-8BEN forms before payout approval so that affiliate payouts are tax-compliant.	M	P1	V3	Draft	BE-2	AFF-10, DOC-11	Integrate		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
AFF-23	D5	Ecosystem & Growth	AFF	Affiliate System	Affiliate notification templates	As the platform, I send affiliates notifications when commissions are accrued, approved, and paid, using tenant-branded templates, so that affiliates are informed at each step.	S	P1	V3	Draft	BE-2	NOT-04, AFF-17	Integrate		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
AFF-24	D5	Ecosystem & Growth	AFF	Affiliate System	Conversion tracking postback	As an affiliate running paid ads, I can configure a postback URL that fires on conversion so that I can track which ads drive conversions.	M	P1	V3	Draft	BE-2	AFF-03	Integrate		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
AFF-25	D5	Ecosystem & Growth	AFF	Affiliate System	Affiliate deep links	As an affiliate, I can generate tracked links to specific challenges or landing pages with sub-ID tracking so that I can promote specific products.	S	P1	V3	Draft	BE-2	AFF-02	Integrate		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
AFF-26	D5	Ecosystem & Growth	AFF	Affiliate System	Affiliate tier system	As a tenant admin, I can define affiliate tiers (e.g. Standard, Gold, VIP) with escalating commission rates so that top affiliates are rewarded automatically.	M	P2	V3	Draft	BE-2	AFF-05	Integrate		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
AFF-27	D5	Ecosystem & Growth	AFF	Affiliate System	Commission cap	As a tenant admin, I can set a maximum total commission per affiliate or per period so that commission exposure is bounded.	S	P2	V3	Draft	BE-2	AFF-06	Integrate		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0

CRM-06	D3	Tenant Operations	CRM	CRM & Communications	Automated sequences	As marketing staff, I configure simple drip sequences such as welcome series, cart abandonment, very reminder, and re-engagement, triggered by events with delays, so that lifecycle marketing runs without manual work.	L	P2	V3	Draft	BE-2	CRM-05, NOT-01	Integrate		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V3.0
CRM-07	D3	Tenant Operations	CRM	CRM & Communications	Suppression and preferences	As the platform, I honor unsubscribe links and notification preferences and suppress sequences for blocked or suspended traders so that we never spam people we should not be emailing.	M	P1	V2	Draft	BE-2	NOT-11	Integrate		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
CRM-08	D3	Tenant Operations	CRM	CRM & Communications	Campaign performance metrics	As marketing staff, I see sends, opens, clicks, and conversions per campaign so that campaign value is measurable.	M	P2	V3	Draft	BE-2	NOT-12	Integrate		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V3.0
CRM-09	D3	Tenant Operations	CRM	CRM & Communications	Discord community integration	As the platform, I assign and remove Discord roles on funded and payout events so that community status matches account status automatically.	M	P2	V3	Draft	BE-2	EVT-01	Integrate		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V3.0
CRM-10	D3	Tenant Operations	CRM	CRM & Communications	Unsubscribe and compliance management	As the platform, I process unsubscribe links and maintain suppression lists per tenant so that email compliance holds across campaigns.	M	P1	V2	Draft	BE-2	NOT-16	Integrate		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
CRM-11	D3	Tenant Operations	CRM	CRM & Communications	Marketing consent capture	As the platform, I capture marketing consent registration where required so that consented-only sends are enforceable per jurisdiction.	M	P2	V3	Draft	BE-2, FE-1	AUTH-01, AUTH-12	Integrate		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V3.0
CRM-12	D3	Tenant Operations	CRM	CRM & Communications	Lead scoring	As marketing staff, I score leads based on behavior so that sales focuses on high-value prospects.	M	P2	V3	Draft	BE-2	CRM-05	Integrate		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V3.0
CRM-13	D3	Tenant Operations	CRM	CRM & Communications	Multi-channel campaigns	As marketing staff, I orchestrate email, SMS, and push in coordinated campaigns so that messaging is consistent.	L	P2	V3	Draft	BE-2	CRM-06	Integrate		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V3.0
AUD-01	D4	Platform Infrastructure	AUD	Audit & Compliance	Audit event schema	As the platform, every audit entry records actor, role, tenant, action, entity type and id, before and after payload, IP, user agent, correlation id, and timestamp so that any actor is fully reconstructable.	M	P0	V1-Core	Draft	BE-1		Build	Prostiges (self-hosted)	salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V1.0
AUD-02	D4	Platform Infrastructure	AUD	Audit & Compliance	Mandatory coverage via gateway flags	As the platform, nodes flagged sensitive, including payout approval, rule changes, role changes, refunds, and overrides, always write audit entries so that coverage can never be forgotten per feature.	M	P0	V2	Draft	BE-1	GW-17	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
AUD-03	D4	Platform Infrastructure	AUD	Audit & Compliance	Single audit service API	As a module developer, I emit audit entries through one shared audit service so that format, storage, and retention stay consistent across all modules.	M	P0	V1-Core	Draft	BE-1	AUD-01	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V1.0
AUD-04	D4	Platform Infrastructure	AUD	Audit & Compliance	Append-only storage	As the platform, audit entries are immutable with no update or delete path in the application so that the log is trustworthy by construction.	M	P0	V1-Core	Draft	BE-1	AUD-01	Build	Prostiges (self-hosted)	salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V1.0
AUD-05	D4	Platform Infrastructure	AUD	Audit & Compliance	Account replay chain	As an investigator, I reconstruct the full chain for any account: broker reports, imbalances, rule evaluations, decisions, commands, broker confirmations, and final state, so that disputes resolve with evidence.	L	P0	V2	Draft	BE-1	LDC-03, DVL-16, BRP-11	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
AUD-06	D4	Platform Infrastructure	AUD	Audit & Compliance	Admin audit viewer	As a tenant admin, I search and filter audit events by action, actor, entity, and date range so that accountability is self-serve inside the panel.	M	P0	V2	Draft	FE-1	ADM-18	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
AUD-07	D4	Platform Infrastructure	AUD	Audit & Compliance	Platform-level audit	As a platform owner, I view platform-level audit including tenant creation, entitlement changes, and impersonation, kept separate from tenant data, so that our own actions are accountable too.	M	P1	V2	Draft	FE-1	TEN-19	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
AUD-08	D4	Platform Infrastructure	AUD	Audit & Compliance	Impersonation audit	As the platform, I record every impersonation session with scope and duration and attribute actions to both the super admin and the session so that support access is never anonymous.	M	P0	V2	Draft	BE-1	TEN-16	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
AUD-09	D4	Platform Infrastructure	AUD	Audit & Compliance	Audit export	As a compliance owner, I export filtered audit ranges to CSV or JSON so that evidence can be handed to auditors or regulators without database access.	M	P1	V2	Draft	BE-2, FE-1	AUD-06	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
AUD-10	D4	Platform Infrastructure	AUD	Audit & Compliance	Retention and archival policy	As the platform, I retain audit records per configured retention, for example seven years for financial actions, and archive old partitions to object storage so that storage stays bounded without losing evidence.	M	P1	V2	Draft	DevOps	OPS-08	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
AUD-11	D4	Platform Infrastructure	AUD	Audit & Compliance	Critical action alerts	As ops, I receive alerts on defined critical actions such as payout approval above threshold, production rule changes, and bulk suspensions so that dangerous actions get immediate human eyes.	M	P2	V2	Draft	BE-2	NOT-02	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
AUD-12	D4	Platform Infrastructure	AUD	Audit & Compliance	Data subject export	As a compliance owner, I export all personal data held for a trader including profile, KYC references, tokens, and logs so that data subject requests can be answered completely.	M	P2	V2	Draft	BE-2	AUD-03	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
AUD-13	D4	Platform Infrastructure	AUD	Audit & Compliance	Anonymization after retention	As a compliance owner, I anonymize a trader's personal data after retention expiry while preserving financial audit integrity so that privacy and audit coexist.	L	P2	V2	Draft	BE-2	AUD-10	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
AUD-14	D4	Platform Infrastructure	AUD	Audit & Compliance	Integrity hash chain	As the platform, I hash-chain audit entries so that tampering in the database level is detectable rather than silent.	M	P2	V2	Draft	BE-1	AUD-04	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
AUD-15	D4	Platform Infrastructure	AUD	Audit & Compliance	SIEM integration	As ops, I stream audit logs to Splunk/Stacking so that security monitoring is centralized.	M	P2	V2	Draft	DevOps	AUD-01	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
AUD-16	D4	Platform Infrastructure	AUD	Audit & Compliance	Compliance reporting	As a compliance owner, I generate SOX/ISO27001 reports so that audits are streamlined.	M	P2	V2	Draft	BE-2	AUD-01	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
CON-01	D4	Platform Infrastructure	CON	Platform Console	Console auth realm	As platform staff, I log in through a separate console realm with mandatory 2FA so that platform power is isolated from tenant identities.	M	P0	V1-Core	Draft	BE-1, FE-2	AUTH-12, AUTH-16	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V1.0
CON-02	D4	Platform Infrastructure	CON	Platform Console	Tenant list and search	As a super admin, I list and search all tenants with status, plan, label, trader counts, and health so that the portfolio is visible in one place.	M	P0	V2	Draft	FE-2	TEN-01	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
CON-03	D4	Platform Infrastructure	CON	Platform Console	Tenant provisioning wizard	As a super admin, I create a tenant with subdomain or domain, default roles, entitlements, and a first admin invite in one flow under 10 minutes so that onboarding needs no code deploy.	M	P0	V2	Draft	FE-2, BE-1	TEN-01	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
CON-04	D4	Platform Infrastructure	CON	Platform Console	Tenant detail view	As a super admin, I open a tenant detail with configuration, entitlements, integrations, single, health, and audit so that support and operators have full context.	M	P0	V2	Draft	FE-2	TEN-01	Build	Tenant detail must link to entitlements	salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
CON-05	D4	Platform Infrastructure	CON	Platform Console	Entitlement management UI	As a super admin, I enable or disable modules and feature flags per tenant with immediate effect and audit so that commercial decisions apply without a deploy.	M	P0	V2	Draft	FE-2	TEN-08, TEN-10	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
CON-06	D4	Platform Infrastructure	CON	Platform Console	Suspension and termination UI	As a super admin, I suspend or terminate a tenant with a cascade preview and explicit confirmation so that destructive actions are deliberate.	M	P1	V2	Draft	FE-2	TEN-15	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
CON-07	D4	Platform Infrastructure	CON	Platform Console	Impersonation control	As a super admin, I start and end audited impersonation sessions with a defined scope so that tenant support is possible without sharing passwords.	M	P0	V2	Draft	FE-2	TEN-16, AUD-08	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0
CON-08	D4	Platform Infrastructure	CON	Platform Console	Platform health dashboard	As a super admin, I see per-tenant and platform-wide sync health, outbox lag, dead letters, error rates, and broker connection status so that problems surface before tenants report them.	M	P1	V2	Draft	FE-2	OPS-10, OPS-11, BRP-10	Build		salmarcodez@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcodez@gmail.com	9/14/2026	V2.0

CON-09	D4	Platform Infrastructure	CON	Platform Console	Platform audit view	As a super admin, I view platform-level audit including tenant changes, entitlement changes, and impersonation so that our own actions are accountable.	M	P1	V2	Draft	FE-2	AUD-07	Build				salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
CON-10	D4	Platform Infrastructure	CON	Platform Console	Usage metering view	As a super admin, I see per-tenant usage counters for traders, accounts, orders, and API calls so that future billing and capacity decisions have real data.	M	P2	V2	Draft	FE-2	TEN-20	Build				salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
CON-11	D4	Platform Infrastructure	CON	Platform Console	Global defaults configuration	As a super admin, I set platform-wide defaults such as default email provider, sync internal bounds, and retention baselines so that tenants inherit sane settings.	M	P1	V2	Draft	FE-2	TEN-01	Build				salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
CON-12	D4	Platform Infrastructure	CON	Platform Console	Deploy and version visibility	As a super admin, I see the current version per environment and recent deploy history so that support always knows what is live.	S	P1	V2	Draft	FE-2	OPS-24	Build				salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
CON-13	D4	Platform Infrastructure	CON	Platform Console	Cross-tenant abuse signals	As platform staff, I see identity, device, and payment issue signals across tenants with strict privacy boundaries so that a trader banned in one tenant cannot quietly restart in another.	L	P1	V2	Draft	BE-2	RSK-08, KYC-09	Build				salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
CON-14	D4	Platform Infrastructure	CON	Platform Console	Platform-to-tenant announcements	As platform staff, I publish maintenance windows and platform notices to tenant admins in-console and by email so that tenants hear about changes from us first.	S	P2	V2	Draft	FE-2	NOT-14	Build				salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
CON-15	D4	Platform Infrastructure	CON	Platform Console	Incident controls	As platform ops, I can pause broker sync, enforcement, payouts, or checkout platform-wide or per tenant with a banner and audit, so an incident is contained without a deploy.	M	P0	V2	Draft	BE-1	OPS-17, EVT-20	Build				salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
CON-16	D4	Platform Infrastructure	CON	Platform Console	Maintenance mode	As platform ops, I enable platform-wide or per-tenant maintenance mode with a branded banner and read-only API so planned work is communicated and safe.	S	P1	V2	Draft	BE-1	CON-15	Build				salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
CON-17	D4	Platform Infrastructure	CON	Platform Console	Global entity search	As platform staff, I search traders, emails, wallets, IP, and account IDs across all tenants with built-in abuse investigations and support do not require impersonation.	M	P1	V2	Draft	FE-2	AUD-01	Build				salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
CON-18	D4	Platform Infrastructure	CON	Platform Console	Console role management	As platform owner, I manage platform staff accounts and console roles such as owner, ops, finance, and support, with enforced 2FA and recorded access reviews, so god view access is governed.	M	P0	V2	Draft	BE-1	CON-01	Build				salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
CON-19	D4	Platform Infrastructure	CON	Platform Console	Platform financial overview	As platform owner, I see aggregate and per-tenant order volume, payment volume, and provider pass-through costs so platform, margin is visible without entering tenant data.	M	P1	V2	Draft	BE-2	LED-01, ANA-01	Build				salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
CON-20	D4	Platform Infrastructure	CON	Platform Console	Broker and provider registry	As platform ops, I manage the catalog of broker adapters, payment providers, KYC providers, and email providers with version, status, and per-tenant usage so the integration plane is controlled from one place.	M	P1	V2	Draft	BE-1	BRG-04, TEN-11	Build				salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
CON-21	D4	Platform Infrastructure	CON	Platform Console	Job and scheduler observability	As platform ops, I see sync, reconciliation, detector, and report jobs run per tenant with last run, duration, and missed runs so silent job failures surface.	M	P1	V2	Draft	FE-2	OPS-17	Build				salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
CON-22	D4	Platform Infrastructure	CON	Platform Console	Security overview	As platform ops, I see login failure spikes, API key anomalies, active impersonation sessions, and suppression list growth across tenants so attacks on the platform surface fast.	M	P1	V2	Draft	BE-2	AUD-01, RSK-01	Build				salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
CON-23	D4	Platform Infrastructure	CON	Platform Console	Master reference data	As platform ops, I maintain the master news calendar, default rate catalog, and default email and certificate templates that tenants inherit or clone so tenants start from a maintained baseline.	M	P1	V2	Draft	BE-2	EVL-01, ADM-23, NOT-04	Build				salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
CON-24	D4	Platform Infrastructure	CON	Platform Console	Subscription and contract view	As platform owner, I see each tenant plan or manual contract, add-ons, trial date, and payment status so commercial state is visible before billing automation exists.	M	P1	V3	Draft	FE-2	BIL-03, BL-16	Build				salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
CON-25	D4	Platform Infrastructure	CON	Platform Console	Global queue overview	As platform ops, I see cross-tenant counts and ages of pending verifications, payouts, risk cases, and SLA-breached tickets so capacity and support gaps surface early.	M	P2	V2	Draft	FE-2	ADM-28	Build				salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
CON-26	D4	Platform Infrastructure	CON	Platform Console	Retention and residency controls	As platform compliance, I configure retention per data class and data residency per tenant where supported, with audit, so privacy obligations are enforced platform-wide.	M	P2	V3	Draft	BE-1	AUD-10, TEN-24	Build				salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
CON-27	D4	Platform Infrastructure	CON	Platform Console	Cross-tenant support assist	As platform support, with recorded tenant consent I get read-only visibility into a tenant support queue and metrics so escalated support does not require full impersonation.	M	P2	V2	Draft	FE-2	CON-07, SUP-06	Build				salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
CON-28	D4	Platform Infrastructure	CON	Platform Console	Tenant contact registry	As platform ops, I maintain technical and business contacts per tenant with escalation preferences so incidents and invoices reach the right people.	S	P2	V2	Draft	FE-2	CON-14	Build				salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
LED-01	D4	Platform Infrastructure	LED	Ledger & Accounting	Chart of accounts	As the platform, I maintain a fixed V1 chart of accounts per tenant covering customer payments, provider settlement, refunds, fees, payment obligations, payouts paid, and adjustments so that every entry has a home.	M	P0	V1-Core	Draft	BE-2	Build	Postgres (self-hosted)				salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V1.0
LED-02	D4	Platform Infrastructure	LED	Ledger & Accounting	Journal entry model	As the platform, I record every money event as a balanced set of immutable journal entries carrying a source event ID so that the ledger is double-entry and replay-safe.	L	P0	V1-Core	Draft	BE-2	LED-01	Build				salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V1.0
LED-03	D4	Platform Infrastructure	LED	Ledger & Accounting	Idempotent posting	As the platform, I deduplicate postings by source event ID so that event replay never double-posts money.	M	P0	V1-Core	Draft	BE-2	EVT-05	Build				salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V1.0
LED-04	D4	Platform Infrastructure	LED	Ledger & Accounting	Payment capture posting	As the platform, on payment captured I post customer payment credit and settlement receivable so that revenue enters the ledger at the source.	M	P0	V1-Core	Draft	BE-2	CHK-08	Build				salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V1.0
LED-05	D4	Platform Infrastructure	LED	Ledger & Accounting	Refund and chargeback posting	As the platform, on refund or chargeback I post reversing entries so that revenue reports stay honest.	M	P0	V2	Draft	BE-2	CHK-15, CHK-22	Build				salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
LED-06	D4	Platform Infrastructure	LED	Ledger & Accounting	Fee posting	As the platform, I post provider fees from payment data so that net revenue is real instead of gross.	M	P1	V2	Draft	BE-2	LED-12	Build				salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
LED-07	D4	Platform Infrastructure	LED	Ledger & Accounting	Payout obligation posting	As the platform, on payout approval I post a payout obligation so that money owed is visible before it moves.	M	P0	V1-Core	Draft	BE-2	Build	Postgres (self-hosted)				salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V1.0
LED-08	D4	Platform Infrastructure	LED	Ledger & Accounting	Payout settlement posting	As the platform, on recorded payout execution I settle the obligation so that paid and owed always reconcile.	M	P0	V1-Core	Draft	BE-2	PAY-12	Build				salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V1.0
LED-09	D4	Platform Infrastructure	LED	Ledger & Accounting	Adjustment entries	As finance staff with permission, I post audited adjustment entries with a reason so that corrections are visible instead of silent edits.	M	P1	V2	Draft	BE-2	AUD-01	Build				salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
LED-10	D4	Platform Infrastructure	LED	Ledger & Accounting	Derived balances	As the platform, I maintain materialized balances per ledger account updated transactionally with entries so that queries read balances without scanning the journal.	M	P0	V2	Draft	BE-2	LED-02	Build				salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
LED-11	D4	Platform Infrastructure	LED	Ledger & Accounting	Zero-sum invariant check	As the platform, I assert in automated tests and a nightly job that every transactions' entries sum to zero so that ledger corruption is caught immediately.	M	P0	V2	Draft	BE-2	OPS-17	Build				salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
LED-12	D4	Platform Infrastructure	LED	Ledger & Accounting	Provider settlement import	As finance, I import provider settlement reports by CSV or API and match them against payment transactions so that what the provider settled is provable against what we recorded.	M	P1	V2	Draft	BE-2	CHK-21	Manual for V1				salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
LED-13	D4	Platform Infrastructure	LED	Ledger & Accounting	Reconciliation exception queue	As finance, I work a queue of unmatched payments, settlements, and payouts with full evidence so that discrepancies get resolved instead of buried.	M	P1	V2	Draft	BE-2, FE-1	LED-12	Build				salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
LED-14	D4	Platform Infrastructure	LED	Ledger & Accounting	Payout reconciliation report	As finance, I reconcile recorded payout executions against ledger settlements and provider statements monthly so that the payout flow is provable end-to-end.	M	P1	V2	Draft	BE-2	PAY-12, LED-08	Build				salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
LED-15	D4	Platform Infrastructure	LED	Ledger & Accounting	Journal export	As finance, I export the journal and balances to CSV for the external accountant so that statutory books live outside the platform too.	M	P1	V2	Draft	BE-2, FE-1	LED-10	Build				salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
LED-16	D4	Platform Infrastructure	LED	Ledger & Accounting	Affiliate commission posting	As the platform, on commission approved and commission paid I post entries so that affiliate costs land in the same ledger.	M	P2	V3	Draft	BE-2	AFF-08, AFF-10	Build				salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
LED-17	D4	Platform Infrastructure	LED	Ledger & Accounting	Recognition metadata	As the platform, I tag revenue entries with capture date, product, and tenant so that a future recognition policy can be applied without re-posting history.	S	P2	V2	Draft	BE-2	LED-04	Build				salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
LED-18	D4	Platform Infrastructure	LED	Ledger & Accounting	Immutability enforcement	As the platform, journal entries expose no update or delete path in the application so that the ledger is trustworthy by construction.	S	P0	V1-Core	Draft	BE-2	AUD-04	Build				salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V1.0

CMP-09	D5	Ecosystem & Growth	CMP	Competition / Gamification	Badges and achievements	As the platform, I grant badges on milestone events such as funded, first payout, payout streak, and competition win, and display them in the trader portal so that achievement is visible.	M	P1	V3	Draft	BE-2, FE-1	EVT-01	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
CMP-10	D5	Ecosystem & Growth	CMP	Competition / Gamification	Trader levels and XP	As the platform, I maintain simple activity tiers so that long-term engagement has visible progression.	M	P2	V3	Draft	BE-2	CMP-09	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
CMP-11	D5	Ecosystem & Growth	CMP	Competition / Gamification	Public trader profiles	As a trader, I can opt in to a public profile with stats and badges so that community recognition exists with privacy defaults to off.	M	P2	V3	Draft	BE-2, FE-1	CMP-09	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
CMP-12	D5	Ecosystem & Growth	CMP	Competition / Gamification	Competition notifications	As the platform, I notify participants on start, end, prize award, and optional rank milestones so that engagement is event-driven.	S	P1	V3	Draft	BE-2	NOT-05	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
CMP-13	D5	Ecosystem & Growth	CMP	Competition / Gamification	Competition admin UI	As a tenant admin, I manage competitions, live standings, moderate entries, and approve prize distribution so that operations stay controlled.	M	P0	V3	Draft	FE-1	CMP-01	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
CMP-14	D5	Ecosystem & Growth	CMP	Competition / Gamification	Multi-entry limits	As the platform, I enforce per-trader entry limits and detect multi-account entries so that competitions cannot be farmed by one person.	M	P1	V3	Draft	BE-2	RSK-01	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
BL-01	D5	Ecosystem & Growth	BL	Tenant Billing	Plan catalog	As a super admin, I define plans such as Basic, Professional, and Enterprise with included modules, limits, and prices so that the commercial offer is configurable without code.	M	P0	V3	Draft	BE-2, FE-2	TEN-01	Integrate		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
BL-02	D5	Ecosystem & Growth	BL	Tenant Billing	Add-on catalog	As a super admin, I define à la carte module add-ons and usage rates with price so that modular pricing works per tenant.	M	P0	V3	Draft	BE-2	BLI-01	Integrate		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
BL-03	D5	Ecosystem & Growth	BL	Tenant Billing	Subscription record	As the platform, I maintain a per-tenant subscription with plan, add-ons, billing period, and status including trial, active, past due, suspended, and cancelled, so that commercial status is explicit.	M	P0	V3	Draft	BE-2	TEN-01	Integrate		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
BL-04	D5	Ecosystem & Growth	BL	Tenant Billing	Entitlement sync	As the platform, on any subscription change I update tenant entitlements automatically so that access always matches what is paid for.	M	P0	V3	Draft	BE-2	TEN-08	Integrate		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
BL-05	D5	Ecosystem & Growth	BL	Tenant Billing	Recurring invoicing	As the platform, I generate an invoice each billing cycle from plan, add-ons, and usage so that billing runs without manual work.	M	P0	V3	Draft	BE-2	TEN-20	Integrate		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
BL-06	D5	Ecosystem & Growth	BL	Tenant Billing	Usage charge computation	As the platform, I compute usage charges from metering counters such as trades, accounts, orders, and API calls against included allowances so that usage-based pricing works.	M	P1	V3	Draft	BE-2	TEN-20	Integrate		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
BL-07	D5	Ecosystem & Growth	BL	Tenant Billing	B2B payment collection	As the platform, I collect tenant payments by card, crypto, or bank transfer through existing payment adapters so that we do not build new rails for billing.	M	P1	V3	Draft	BE-2	CHK-04	Integrate		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
BL-08	D5	Ecosystem & Growth	BL	Tenant Billing	Dunning and grace period	As the platform, on payment failure I enter a grace period, notify tenant admin, then suspend per policy or if no payment is handled consistently and calmly.	M	P1	V3	Draft	BE-2	TEN-15, NOT-05	Integrate		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
BL-09	D5	Ecosystem & Growth	BL	Tenant Billing	Proration on plan change	As a super admin or tenant admin, I loggrade or downgrade a plan with multiple-grade proration so that changes are fair and predictable.	M	P1	V3	Draft	BE-2	BLI-03	Integrate		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
BL-10	D5	Ecosystem & Growth	BL	Tenant Billing	Swap discount rule	As a super admin, I configure discounts for tenants that types built in modules in favor of their own tooling so that the modular commercial model stays honest.	M	P2	V3	Draft	BE-2	BLI-02	Integrate		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
BL-11	D5	Ecosystem & Growth	BL	Tenant Billing	Trial periods	As a super admin, I create time-bound trials with full or partial entitlements so that sales can prove value before a contract is signed.	M	P1	V3	Draft	BE-2	BLI-03	Integrate		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
BL-12	D5	Ecosystem & Growth	BL	Tenant Billing	Invoice document and delivery	As a tenant admin, I receive branded invoices with line items and tax fields so that my finance team can book the cost properly.	M	P1	V3	Draft	BE-2	DOC-01	Integrate		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
BL-13	D5	Ecosystem & Growth	BL	Tenant Billing	Billing portal view	As a tenant admin, I see my current plan, add-ons, next invoice, payment history, and usage so that billing is transparent and support tickets are avoided.	M	P1	V3	Draft	FE-2	BLI-05	Integrate		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
BL-14	D5	Ecosystem & Growth	BL	Tenant Billing	Platform revenue reports	As a platform owner, I see MRR, ARR, churn, revenue per tenant, and add-on attach rates so that the business health is measurable.	M	P1	V3	Draft	BE-2	ANA-01	Integrate		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
BL-15	D5	Ecosystem & Growth	BL	Tenant Billing	Billing events and audit	As the platform, I emit subscription and payment events and audit every billing change so that commercial history is fully traceable.	S	P0	V3	Draft	BE-2	EVT-01, AUD-01	Integrate		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
BL-16	D5	Ecosystem & Growth	BL	Tenant Billing	Manual contract mode	As a super admin, I mark a tenant as a manual offline contract with custom pricing and offline invoicing so that enterprise deals never force automation they do not fit.	M	P1	V3	Draft	BE-2	BLI-03	Integrate		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
BL-17	D5	Ecosystem & Growth	BL	Tenant Billing	Pass-through cost billing	As a super admin, I bill pass-through costs such as KYC-checks per verified so that variable provider costs do not erode margin.	M	P2	V3	Draft	BE-2	KYC-01, TEN-20	Integrate		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
BL-18	D5	Ecosystem & Growth	BL	Tenant Billing	Self-serve signup with billing	As a new prep item, I can sign up, choose a plan, pay, and get a provisioned tenant without talking to sales so that acquisition scales beyond the sales team.	L	P2	V3	Draft	BE-2, FE-2	CON-03, BLI-07	Integrate		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
SDK-01	D5	Ecosystem & Growth	SDK	B/YO Integration SDK	Public API contract and versioning policy	As the platform, I publish a versioned public API contract with a written deprecation policy so that integrators can build with confidence.	M	P0	V3	Draft	BE-1	GW-08, GW-15	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
SDK-02	D5	Ecosystem & Growth	SDK	B/YO Integration SDK	Webhook event catalog	As an integrator, I get a documented catalog of all outbound events with schemas, versions, and example payloads so that I can consume events without guessing.	M	P0	V3	Draft	BE-2	EVT-04	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
SDK-03	D5	Ecosystem & Growth	SDK	B/YO Integration SDK	Signature verification helpers	As an integrator, I use official helper libraries for TypeScript and Python to verify webhook signatures so that my security implementation is correct by default.	S	P0	V3	Draft	BE-2	EVT-12	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
SDK-04	D5	Ecosystem & Growth	SDK	B/YO Integration SDK	Client SDK core	As an integrator, I use an official client SDK with authentication, pagination, idempotency keys, and error handling so that my integration code stays small and correct.	M	P1	V3	Draft	BE-1	SDK-01	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
SDK-05	D5	Ecosystem & Growth	SDK	B/YO Integration SDK	Sandbox tenant environment	As an integrator, I get a sandbox tenant with synthetic test data and simulated events so that I can build without touching production.	M	P0	V3	Draft	BE-2	GW-19, CON-03	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
SDK-06	D5	Ecosystem & Growth	SDK	B/YO Integration SDK	Sandbox event injection	As an integrator, I can trigger simulated lifecycle events such as payment captured, account opened, and payout approved in the sandbox so that I can test my consumers and to-and.	M	P1	V3	Draft	BE-2	SDK-05	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
SDK-07	D5	Ecosystem & Growth	SDK	B/YO Integration SDK	Webhook replay and testing tools	As an integrator, I can replay past webhook deliveries to my endpoint from the delivery log so that debugging is self-serve.	M	P1	V3	Draft	BE-2	EVT-14, EVT-15	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
SDK-08	D5	Ecosystem & Growth	SDK	B/YO Integration SDK	Developer portal docs	As an integrator, I read generated API reference plus integration guides for each unacceptable path including checkout, affiliates, KYC, CRM, and accounting so that onboarding is self-serve.	M	P0	V3	Draft	BE-1, FE-2	GW-15	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0

Req ID	Domain ID	Domain Name	Module ID	Module	Feature Name	User Story	Complexity	Priority	Phase	Status	Owner	Depends On	Build Strategy	Notes	Proposed By	Proposed On	Team Comments	Comment Status	Last Reviewed By	Last Reviewed On	Release
SDK-09	D5	Ecosystem & Growth	SDK	BYO Integration SDK	API key self-management	As a tenant admin or integrator, I create, revoke, rotate, and revoke API keys from the admin panel with audit so that machine access is controlled and visible.	M	P0	V3	Draft	FE-2	AUTH-21, ADM-20	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
SDK-10	D5	Ecosystem & Growth	SDK	BYO Integration SDK	Integration certification checklist	As the platform, I run an automated checklist against the sandbox verifying signature checks, idempotency handling, and retry behavior so that integrations are validated before going live.	M	P2	V3	Draft	BE-2	SDK-05, SDK-07	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
SDK-11	D5	Ecosystem & Growth	SDK	BYO Integration SDK	BYO KYC status API	As a tenant running external KYC, I push verification decisions through the API so that my external flow still gates funding and permits correctly.	M	P1	V3	Draft	BE-2	KYC-01	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
SDK-12	D5	Ecosystem & Growth	SDK	BYO Integration SDK	BYO accounting export	As a tenant running external accounting, I pull journal and settlement data through the API or scheduled exports so that their books stay authoritative outside our platform.	M	P2	V3	Draft	BE-2	LED-15	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
SDK-13	D5	Ecosystem & Growth	SDK	BYO Integration SDK	BYO CRM sync	As a tenant running an external CRM, I subscribe to trade and lifecycle events and pull trader profiles so that their CRM stays current without manual exports.	M	P2	V3	Draft	BE-2	CRM-01, CRM-02	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
SDK-14	D5	Ecosystem & Growth	SDK	BYO Integration SDK	Public API rate limits and quotas	As the platform, I enforce documented per-tenant quotas on public endpoints so that one integrator cannot degrade the platform for everyone else.	M	P1	V3	Draft	BE-1	GW-06	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
SDK-15	D5	Ecosystem & Growth	SDK	BYO Integration SDK	Changelog and deprecation channel	As an integrator, I get a changelog and advance notice of breaking changes so that my integration never breaks silently.	S	P1	V3	Draft	BE-1	SDK-01	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
DVP-01	D5	Ecosystem & Growth	DVP	Isolated API / Developer Ports	Public developer portal site	As an external developer, I land on a public portal with documentation, guides, API reference, and changelog so that I can evaluate the platform before becoming a tenant.	M	P0	V3	Draft	BE-1, FE-2	SDK-08	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
DVP-02	D5	Ecosystem & Growth	DVP	Isolated API / Developer Ports	Developer accounts	As an external developer, I create a developer account tied to a tenant or partner organization, separate from tenant user identities, so that portal access and keys are managed per organization.	M	P0	V3	Draft	BE-1	AUTH-01, AUTH-12, SDK-09	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
DVP-03	D5	Ecosystem & Growth	DVP	Isolated API / Developer Ports	API product subscription	As a developer, I subscribe to API products such as read-only reports, webhooks, and account management with plan-based quotas so that access is commercialized instead of hand-granted.	M	P1	V3	Draft	BE-2	BILL-01, GW-06	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
DVP-04	D5	Ecosystem & Growth	DVP	Isolated API / Developer Ports	Interactive API explorer	As a developer, I call endpoints from the portal against the sandbox using my own keys so that I can learn the API without writing code first.	M	P1	V3	Draft	BE-1, FE-2	SDK-05	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
DVP-05	D5	Ecosystem & Growth	DVP	Isolated API / Developer Ports	Webhook simulator in portal	As a developer, I register a test endpoint from the portal and receive simulated events so that event onboarding is instant.	M	P1	V3	Draft	BE-2	SDK-06	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
DVP-06	D5	Ecosystem & Growth	DVP	Isolated API / Developer Ports	Developer usage analytics	As a developer or tenant admin, I see call volume, error rates, and quota consumption per key so that I can debug and capacity-plan my integration.	M	P1	V3	Draft	BE-1	GW-06, SDK-09	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
DVP-07	D5	Ecosystem & Growth	DVP	Isolated API / Developer Ports	Public status page	As a developer, I check a status page with component health and incident history so that I can trust operations and plan around incidents.	S	P1	V3	Draft	DevOps, FE-2	OPS-10	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
DVP-08	D5	Ecosystem & Growth	DVP	Isolated API / Developer Ports	Changelog subscription	As a developer, I subscribe to changelog notifications by email or RSS so that I hear about changes before they affect me.	S	P1	V3	Draft	BE-1	SDK-15	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
DVP-09	D5	Ecosystem & Growth	DVP	Isolated API / Developer Ports	Low-code connectors	As an operations user, I use official Zapier and n8n connectors for common events such as payment captured and payout approved so that non-engineers can integrate.	M	P2	V3	Draft	BE-2	EVF-11	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
DVP-10	D5	Ecosystem & Growth	DVP	Isolated API / Developer Ports	Partner key delegation	As a tenant, I grant a partner organization scoped and time-bounded API access to my tenant so that agencies can build for me without handing my full keys.	M	P1	V3	Draft	BE-1	AUTH-21, SDK-09	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
DVP-11	D5	Ecosystem & Growth	DVP	Isolated API / Developer Ports	GraphQL query API	As a developer, I query nested tenant data through GraphQL so that complex reads take one call instead of many.	L	P2	V3	Draft	BE-1	SDK-01	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
DVP-12	D5	Ecosystem & Growth	DVP	Isolated API / Developer Ports	Streaming API	As a developer, I subscribe to near real-time account and event streams over WebSockets so that latency-sensitive integrations are possible.	L	P2	V3	Draft	BE-1	BRG-21	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
DVP-13	D5	Ecosystem & Growth	DVP	Isolated API / Developer Ports	Partner directory	As a tenant, I browse certified integration partners for KYC, payments, and CRM so that I can choose vetted vendors quickly.	M	P2	V3	Draft	BE-2	DVP-14	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
DVP-14	D5	Ecosystem & Growth	DVP	Isolated API / Developer Ports	Certification badge program	As a partner, I pass the certification checklist and receive a public badge and directory listing so that the ecosystem has quality signals.	M	P2	V3	Draft	BE-2	SDK-10	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
DVP-15	D5	Ecosystem & Growth	DVP	Isolated API / Developer Ports	Developer community space	As a developer, I ask questions and share wisdom in a community space so that peer support scales beyond our help desk.	S	P2	V3	Draft	Product, Market	DVP-01	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
PLT-01	D5	Ecosystem & Growth	PLT	Platform Operations	Multi-region deployment	As ops, I deploy to multiple regions for disaster recovery so that regional outages don't stop the platform.	L	P2	V3	Draft	DevOps	OPS-02	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
PLT-02	D5	Ecosystem & Growth	PLT	Platform Operations	Capacity planning	As ops, I forecast resource needs based on growth so that infrastructure scales ahead of demand.	M	P2	V3	Draft	DevOps	OPS-10	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
PLT-03	D5	Ecosystem & Growth	PLT	Platform Operations	Cost allocation	As the business, I see infrastructure cost per tenant so that profitability is measurable.	M	P2	V3	Draft	BE-2	TEN-20	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
PLT-04	D5	Ecosystem & Growth	PLT	Platform Operations	Performance benchmarking	As ops, I track p50/p95/p99 latencies per endpoint so that performance regressions are caught.	M	P1	V3	Draft	DevOps	OPS-10	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
CS-01	D5	Ecosystem & Growth	CS	Customer Success	NPS surveys	As a tenant admin, I send NPS surveys to traders so that satisfaction is measured.	M	P2	V3	Draft	BE-2	NOT-05	Buy		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
CS-02	D5	Ecosystem & Growth	CS	Customer Success	Customer health scoring	As the platform, I score tenant health based on usage, support tickets, and churn signals so that at-risk tenants are flagged.	M	P2	V3	Draft	BE-2	ANA-01	Buy		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
CS-03	D5	Ecosystem & Growth	CS	Customer Success	Churn prediction	As the platform, I predict trader churn using ML so that retention campaigns are targeted.	M	P2	V3	Draft	BE-2	ANA-19	Buy		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
CS-04	D5	Ecosystem & Growth	CS	Customer Success	Onboarding workflows	As the platform, I guide new tenants through setup with checklists and tutorials so that time-to-value is reduced.	L	P2	V3	Draft	BE-2, FE-2	CON-03	Buy		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
TRD-01	D5	Ecosystem & Growth	TRD	Advanced Trading	Copy trading marketplace	As a trader, I follow successful traders automatically so that I learn from proven strategies.	L	P2	V3	Draft	BE-2	BRG-01, LCC-01	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
TRD-02	D5	Ecosystem & Growth	TRD	Advanced Trading	Social trading feed	As a trader, I see a social feed of trades and insights so that I learn from the community.	M	P2	V3	Draft	BE-2, FE-1	AUTH-01, AUTH-12	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
TRD-03	D5	Ecosystem & Growth	TRD	Advanced Trading	Strategy marketplace	As a trader, I buy and sell trading strategies so that I can monetize my edge.	L	P2	V3	Draft	BE-2	CHK-01, CHK-08	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
TRD-04	D5	Ecosystem & Growth	TRD	Advanced Trading	Backtesting tools	As a trader, I backtest strategies on historical data so that I validate before risking capital. L	P1	V2	Draft	BE-1			Build	Wedge against TTS.	salmarcode@gmail.com	9/13/2026	Added by Step 8	Accepted	salmarcode@gmail.com	9/13/2026	V2.0
MIG-02	D3	Tenant Operations	MIG	Migration Tooling	Import from YourProgFirm	As a super admin, I can import a firm from YourProgFirm with the same fidelity as TTS so that any firm can switch.	L	P1	V2	Draft	BE-1			Build	Wedge against YourProgFirm.	salmarcode@gmail.com	9/13/2026	Added by Step 8	Accepted	salmarcode@gmail.com	9/13/2026	V2.0
MIG-03	D3	Tenant Operations	MIG	Migration Tooling	Import from PropAccount and other brokers	As a super admin, I can import a firm from PropAccount and other whitelisted platforms so that migration is universal.	L	P2	V3	Draft	BE-1			Build	Added in Step 8 – missing module.	salmarcode@gmail.com	9/13/2026	Added by Step 8	Accepted	salmarcode@gmail.com	9/13/2026	V3.0
MIG-04	D3	Tenant Operations	MIG	Migration Tooling	Import verification and reconciliation	As a super admin, I see checkmarks and reconciliation reports for every migration so that data integrity is possible before onboarding.	M	P1	V2	Draft	BE-1	MIG-01		Build	Added in Step 8 – missing module.	salmarcode@gmail.com	9/13/2026	Added by Step 8	Accepted	salmarcode@gmail.com	9/13/2026	V2.0
MIG-05	D3	Tenant Operations	MIG	Migration Tooling	Dual-run mode	As a super admin, I can run the old and new platform in parallel for a period with unified reporting so that outlier is low-risk.	L	P1	V2	Draft	BE-1	MIG-01		Build	Added in Step 8 – missing module.	salmarcode@gmail.com	9/13/2026	Added by Step 8	Accepted	salmarcode@gmail.com	9/13/2026	V2.0
MIG-06	D3	Tenant Operations	MIG	Migration Tooling	Migration concierge service	As a super admin, I have a rubrick and unified to write-give the first 10 tenants through migration so that early wins are guaranteed.	S	P1	V2	Draft	BE-1	MIG-04		Build	Operational, not code.	salmarcode@gmail.com	9/13/2026	Added by Step 8	Accepted	salmarcode@gmail.com	9/13/2026	V2.0
AUTH-39	D4	Platform Infrastructure	AUTH	Auth & Identity	Logout (current session)	As a user, I can log out of my current session so that my access token is revoked immediately.	S	P0	V1-Core	Draft	BE-1	AUTH-07		Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V1.0
AUTH-40	D4	Platform Infrastructure	AUTH	Auth & Identity	Change password (self service)	As a logged-in user, I can change my password by confirming my current password so that I can rotate credentials without going through the forgotten-password flow.	S	P0	V1-Core	Draft	BE-1	AUTH-04, AUTH-17		Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V1.0
AUTH-41	D4	Platform Infrastructure	AUTH	Auth & Identity	Resend email verification	As a trader, I can request a new verification email so that I am not locked out if the first email is lost or expires.	S	P1	V2	Draft	BE-1	AUTH-02		Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
AUTH-42	D4	Platform Infrastructure	AUTH	Auth & Identity	Account unlock after throttling	As a user, I can unlock my account after a login-throttling locked by completing an email challenge or waiting out a cooldown; as support I can unlock with audit.	S	P1	V2	Draft	BE-1	AUTH-18		Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
AUTH-43	D4	Platform Infrastructure	AUTH	Auth & Identity	Unsuspend user account	As a tenant admin, I can unsuspend a previously suspended user so that access is restored cleanly with audit.	S	P0	V1-Core	Draft	BE-1	AUTH-20		Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V1.0
TEN-41	D4	Platform Infrastructure	TEN	Tenant Management	Tenant admin invite email	As a new tenant admin, I receive a welcome email with a one-time link to set my password and enter the tenant admin panel, so that tenant onboarding completes without manual credential sharing.	S	P0	V2	Draft	BE-2	CON-03, NOT-03		Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
TEN-42	D4	Platform Infrastructure	TEN	Tenant Management	Subdomain availability and reservation	As a super admin creating a tenant, I get real-time validation that the requested subdomain is available and not on a pre-approved list (admin, api, console, app), so that tenant creation never produces a collision.	S	P0	V1-Core	Draft	BE-1	TEN-01		Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V1.0
TEN-43	D4	Platform Infrastructure	TEN	Tenant Management	Tenant subdomain change	As a super admin, I can change a tenant's platform subdomain with redline from the old subdomain and audit, so that firms that remain are not forced to rebuild their tenant.	M	P1	V2	Draft	BE-1	TEN-05, TEN-26		Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
TEN-44	D4	Platform Infrastructure	TEN	Tenant Management	Branding asset validation and limits	As the platform, I enforce file type, dimension, size, and SVG sanitization on tenant logos, favicon, and font uploads, so that tenant branding cannot introduce security or performance risk.	S	P0	V2	Draft	BE-1	TEN-04		Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
TEN-45	D4	Platform Infrastructure	TEN	Tenant Management	Tenant deactivation recovery window	As platform ops, I can restore a recently terminated tenant within a configurable grace period before hard deletion executes, so that accidental terminations are recoverable.	M	P1	V2	Draft	BE-2	TEN-33, TEN-38		Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
EVT-33	D4	Platform Infrastructure	EVT	Event Bus & Webhooks	Outbox table pruning and cleanup	As the platform, a scheduled job deletes outbox rows older than a configured retention window after they are confirmed published, so that the outbox table stays bounded and the relay poll stays fast.	S	P0	V2	Draft	BE-1	EVT-02, OPS-17		Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
EVT-34	D4	Platform Infrastructure	EVT	Event Bus & Webhooks	Webhook signing secret rotation	As a tenant admin, I can rotate the HMAC secret used to sign outbound webhooks with a dual-secret grace window so that receivers can roll new without missing events or accepting unsigned payloads.	S	P1	V2	Draft	BE-2	EVT-12, TEN-12		Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
EVT-35	D4	Platform Infrastructure	EVT	Event Bus & Webhooks	Command queue observability	As ops, I see broker command queue depth, retry counts per command, oldest pending command age, and oldest unacked command, so that I can monitor for backlogs, growth, and alerts on backlog growth, so that enforcement starts before before exposure days.	S	P0	V2	Draft	BE-1, DevOps	EVT-20, OPS-11		Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
EVT-36	D4	Platform Infrastructure	EVT	Event Bus & Webhooks	Event producer manifest validation in CI	As the platform, CI verifies that every event emitted by a module matches a declared event in the catalog with the correct payload shape, so that unregistered or malformed events never reach production.	S	P1	V2	Draft	BE-1	EVT-04, OPS-03		Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
EVT-37	D4	Platform Infrastructure	EVT	Event Bus & Webhooks	Event schema deprecation workflow	As the platform, I can mark an event version as deprecated with a sunset date, surface it to consumers and integrators via the schema registry, and warn before removal, so that breaking changes are announced in advance.	S	P1	V3	Draft	BE-1	EVT-23, SDK-15		Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
GW-33	D4	Platform Infrastructure	GW	API Gateway	Client IP extraction and trusted proxy policy	As the platform, I extract the real client IP from a documented trust chain (CF Connecting IP, if forwarded) and with a trusted trusted proxy allowlist, and expose it to rate limiting, throttling, and risk fingerprinting, so that client IP never resolves to an edge or proxy address.	S	P0	V2	Draft	BE-1	GW-01, OPS-15		Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
GW-34	D4	Platform Infrastructure	GW	API Gateway	Downstream circuit breaker and bulkhead	As the platform, I open a circuit breaker per downstream service and bound concurrent outbound requests per bulkhead, so that one slow downstream service cannot exhaust the gateway worker pool or cascade a partial outage into a full API outage.	M	P0	V2	Draft	BE-1	GW-13, OPS-10		Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
GW-35	D4	Platform Infrastructure	GW	API Gateway	Sensitive header and token reduction in logs	As ops, I define explicit reduction rules for sensitive headers (Authorization, Cookie, Set-Cookie, X-Api-Key, X-Audit-Token) and for sensitive query parameters, and the gateway scrubs them before any request is written to a log, so that secrets never leak through logging.	S	P0	V2	Draft	BE-1	GW-10		Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
GW-36	D4	Platform Infrastructure	GW	API Gateway	Correlation id propagation to downstream services	As ops, the gateway forwards the correlation id on every outbound request to downstream services and to the event bus, so that a single trace id follows a request from the edge through every internal hop.	S	P1	V2	Draft	BE-1	GW-09, EVT-08		Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
GW-37	D4	Platform Infrastructure	GW	API Gateway	Idempotency key conflict detection	As a client, when I retry a mutation with the same idempotency key but a different request body, the gateway returns 409 Conflict with the original request fingerprint, so that accidental body changes during retry cannot be silently masked.	S	P0	V2	Draft	BE-1	GW-12		Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
OPS-36	D4	Platform Infrastructure	OPS	DevOps & Deployment	Container image registry and immutable tagging	As DevOps, every CI build pushes a container image to a defined registry with an immutable tag (commit sha) alongside a moving tag (env), and production deploys reference the immutable tag, so that what is deployed is reproducible and rollback targets a specific image.	S	P0	V1-Core	Draft	DevOps	OPS-01, OPS-03		Build/config		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V1.0
OPS-37	D4	Platform Infrastructure	OPS	DevOps & Deployment	Container resource limits and host capacity plan	As DevOps, every service runs with explicit CPU and memory limits in the Compose block, and the host is sized with documented headroom for peak sync and async activity bursts, so that one runaway container cannot saturate the host and take down the API.	S	P0	V1-Core	Draft	DevOps	OPS-02		Build/config		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V1.0
OPS-38	D4	Platform Infrastructure	OPS	DevOps & Deployment	Backup integrity verification and automated restore drill	As DevOps, a scheduled job verifies last night's Postgres backup restores to a scratch environment within RTO, and alerts on failure, so that a silent corrupt backup never survives until a real incident.	M	P0	V1-Core	Draft	DevOps	OPS-07		Build/config		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V1.0
OPS-39	D4	Platform Infrastructure	OPS	DevOps & Deployment	Alert routing and escalation policy	As ops, every alert has a defined primary recipient, a defined escalation path, and an escalation timeout so that an unacknowledged alert during off-hours reaches a human instead of disappearing.	S	P1	V2	Draft	DevOps	OPS-11		Build/config		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
OPS-40	D4	Platform Infrastructure	OPS	DevOps & Deployment	SLO definitions and error budget tracking	As ops, I define SLOs for API availability, percent latency, and zero business with error budgets tracked against them, so that "healthy" has a measurable definition and V1.1 gate rules can be evaluated objectively.	M	P1	V2	Draft	DevOps	OPS-10, OPS-12		Build/config		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
AUD-20	D4	Platform Infrastructure	AUD	Audit & Compliance	Audit write failure alerting and fail-locked policy	As the platform, if the audit service cannot persist an entry for a sensitive action, the action fails or is queued and ops is alerted, so that no sensitive action can occur without an audit trail.	S	P0	V2	Draft	BE-1	AUD-01, OPS-11		Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
AUD-21	D4	Platform Infrastructure	AUD	Audit & Compliance	Audit log access and export audit	As the platform, every view, search, and export of audit logs is itself recorded with actor, filter, and result count, so that access to audit data is accountable.	S	P0	V1-Core	Draft	BE-1	AUD-01		Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V1.0

Req ID	Domain ID	Domain Name	Module ID	Module	Feature Name	User Story	Complexity	Priority	Phase	Status	Owner	Depends On	🔗 Build Strategy	Notes	Proposed By	Proposed On	Team Comments	Comment Status	Last Reviewed By	Last Reviewed On	Release
AUD-22	D4	Platform Infrastructure	AUD	Audit & Compliance	Legal hold and retention override	As a compliance owner, I can place a legal hold on trader or tenant audit records to prevent archival, anonymization, or deletion until the hold is released, so that evidence is preserved during investigations or regulatory requests.	M	P1	V2	Draft	BE-1	AUD-10	Build		salmancotez@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmancotez@gmail.com	9/14/2026	V2.0
AUD-23	D4	Platform Infrastructure	AUD	Audit & Compliance	Sensitive data access audit	As the platform, staff access to KYC documents, payout methods and personal data is audited with actor, reason, permission, and entity, so that sensitive data access is provable.	M	P0	V1-Plus	Draft	BE-1	AUD-01, KYC-01, PAY-05	Build		salmancotez@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmancotez@gmail.com	9/14/2026	V1.1
AUD-24	D4	Platform Infrastructure	AUD	Audit & Compliance	Audit integrity verification job and alerting	As ops, a scheduled job verifies the audit hash chain and append only integrity, alerts on any gap or failure, and reports the latest verified and, so that tampering is detected rather than missed.	S	P1	V2	Draft	BE-1	AUD-14, OPS-11	Build		salmancotez@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmancotez@gmail.com	9/14/2026	V2.0
CON-29	D4	Platform Infrastructure	CON	Platform Console	Console shell and navigation	As platform staff, I see a consistent console shell with navigation, layout, and routing for all platform console features so that I can access every console capability without ad-hoc pages.	M	P0	V1-Core	Draft	FE-2	CON-01	Build		salmancotez@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmancotez@gmail.com	9/14/2026	V1.0
CON-30	D4	Platform Infrastructure	CON	Platform Console	Console session management and security	As platform staff, my console session expires after inactivity, requires re-authentication for sensitive actions, and can be revoked by another super admin, so that a stolen console session cannot be used indefinitely.	S	P0	V1-Core	Draft	BE-1	CON-01, AUTH-07	Build		salmancotez@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmancotez@gmail.com	9/14/2026	V1.0
CON-31	D4	Platform Infrastructure	CON	Platform Console	Platform-wide feature flag management	As a super admin, I can toggle a feature flag globally across all tenants for gradual rollout or emergency disable, separately from per-tenant flags, so that platform-wide changes are controlled from one place.	M	P1	V2	Draft	BE-2	TEN-08, TEN-10	Build		salmancotez@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmancotez@gmail.com	9/14/2026	V2.0
CON-32	D4	Platform Infrastructure	CON	Platform Console	Console action approval workflow	As a super admin, high-risk console actions such as bulk suspension, production rule changes, or payout overrides require approval from a second super admin before execution, so that one compromised account cannot cause irreversible harm.	M	P1	V2	Draft	BE-1	CON-18, AUD-01	Build		salmancotez@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmancotez@gmail.com	9/14/2026	V2.0
CON-33	D4	Platform Infrastructure	CON	Platform Console	Console notification center and alert routing	As platform staff, I receive console notifications for alerts and events that concern me, and I can configure which alerts reach me by console, email, or Telegram, so that critical platform events are not missed.	M	P1	V2	Draft	BE-2	NOT-01, OPS-11	Build		salmancotez@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmancotez@gmail.com	9/14/2026	V2.0
LED-22	D4	Platform Infrastructure	LED	Ledger & Accounting	Period close and lock	As a finance user, I can close an accounting period so that no further entries can be posted to it, and I can lock closed periods to prevent adjustments without a controlled reopening workflow, so that prior period financials are stable and auditable.	M	P0	V2	Draft	BE-2	LED-10, LED-18	Build		salmancotez@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmancotez@gmail.com	9/14/2026	V2.0
LED-23	D4	Platform Infrastructure	LED	Ledger & Accounting	Trial balance and financial statements	As a finance user, I can generate a trial balance and standard financial statements (P&L, balance sheet, cash flow) from ledger balances, so that the ledger produces the accounting outputs the business needs.	M	P1	V2	Draft	BE-2	LED-10, LED-15	Build		salmancotez@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmancotez@gmail.com	9/14/2026	V2.0
LED-24	D4	Platform Infrastructure	LED	Ledger & Accounting	Journal entry reversal workflow	As a finance user with permission, I can reverse a posted journal entry with a linked reversal entry that references the original and carries a mandatory reason, so that corrections are traceable and the original entry remains immutable.	S	P1	V2	Draft	BE-2	LED-02, LED-09	Build		salmancotez@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmancotez@gmail.com	9/14/2026	V2.0
LED-25	D4	Platform Infrastructure	LED	Ledger & Accounting	Ledger posting failure handling	As the platform, if a ledger posting fails for a money event, the source action fails or is queued for retry, and ops is alerted, so that the ledger and operational state never silently diverge.	M	P0	V2	Draft	BE-2	LED-03, OPS-11	Build		salmancotez@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmancotez@gmail.com	9/14/2026	V2.0
LED-26	D4	Platform Infrastructure	LED	Ledger & Accounting	Opening balance and ledger migration	As the migration team, I can set opening balances per ledger account when importing from TTS so that the migrated financial TTS reconciles with the source system or culover.	M	P1	V2	Draft	BE-2	LED-01, MG-01	Build		salmancotez@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmancotez@gmail.com	9/14/2026	V2.0
BRG-43	D1	Core Trading Engine	BRG	Trading Platform Bridge	Adapter contract test suite	As the platform, every adapter passes a shared contract test that proves the capability interface is honored, so that incoming adapters is a verified operation, not a promise.	M	P0	V1-Core	Draft	BE-1	BRG-01	Build		salmancotez@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmancotez@gmail.com	9/14/2026	V1.0
BRG-44	D1	Core Trading Engine	BRG	Trading Platform Bridge	Broker credential encryption and rotation	As the platform, broker credentials are encrypted with a documented scheme and rotated on a defined schedule, so that a credential leak is bounded and recoverable.	M	P0	V1-Core	Draft	BE-1	BRG-06, OPS-09	Build		salmancotez@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmancotez@gmail.com	9/14/2026	V1.0
BRG-45	D1	Core Trading Engine	BRG	Trading Platform Bridge	Bridge follower and adapter unavailability handling	As ops, when a broker adapter is unavailable I see a degraded state, sync is paused, and alerts fire, so that a provider outage does not silently deplete accounts.	M	P1	V2	Draft	BE-1	BRG-18, OPS-11	Build		salmancotez@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmancotez@gmail.com	9/14/2026	V2.0
BRG-46	D1	Core Trading Engine	BRG	Trading Platform Bridge	Broker account state export for audit	As an auditor, I can export a stable, queryable snapshot of broker side account state at any point in time, so that audits do not rely on ad-hoc queries.	S	P1	V2	Draft	BE-1	BRG-07, BRG-08	Build		salmancotez@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmancotez@gmail.com	9/14/2026	V2.0
BRG-47	D1	Core Trading Engine	BRG	Trading Platform Bridge	Bridge provider cost tracking	As the platform, I track per-provider cost allocation so that pass-through billing can be computed accurately per tenant.	M	P2	V3	Draft	BE-1	BRG-36	Build		salmancotez@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmancotez@gmail.com	9/14/2026	V2.0
EVL-33	D1	Core Trading Engine	EVL	Evaluation Engine	Evaluation batch and backlog	As the platform, when a sync gap is repaired I receive evaluations for the backlog'd trades, so that rules never silently miss trades.	M	P0	V2	Draft	BE-1	BRG-33, EVL-04	Build		salmancotez@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmancotez@gmail.com	9/14/2026	V2.0
EVL-34	D1	Core Trading Engine	EVL	Evaluation Engine	Rule set migration for existing accounts	As a tenant admin, when I edit a rule set I see how in-flight accounts are affected and choose the migration policy, so that rule edits never retroactively alter accounts by accident.	M	P0	V1-Core	Draft	BE-1	EVL-02	Build		salmancotez@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmancotez@gmail.com	9/14/2026	V1.0
EVL-35	D1	Core Trading Engine	EVL	Evaluation Engine	Evaluation regression test suite	As the platform, a golden-case regression suite proves that evaluation decisions do not drift across releases, so that rule changes are safe.	M	P1	V1-Core	Draft	BE-1	EVL-04	Build		salmancotez@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmancotez@gmail.com	9/14/2026	V1.0
EVL-36	D1	Core Trading Engine	EVL	Evaluation Engine	Manual evaluation trigger for support	As support, I can force re-evaluation of a single account after a corrected snapshot, so that edge cases do not become engineering tickets.	S	P1	V1-Plus	Draft	BE-1	EVL-04, AUD-01	Build		salmancotez@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmancotez@gmail.com	9/14/2026	V1.1
EVL-37	D1	Core Trading Engine	EVL	Evaluation Engine	Rule breach evidence attachment	As the platform, I package and retain evidence artifacts (trades, snapshots, rule results) for every breach, so that the trader breach report is defensible.	M	P1	V2	Draft	BE-1	EVL-16	Build		salmancotez@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmancotez@gmail.com	9/14/2026	V2.0
LCC-32	D1	Core Trading Engine	LCC	Account Lifecycle	Account state export and audit	As an auditor, I can export the full account state at any point in time, so that audits do not depend on event replay alone.	M	P1	V2	Draft	BE-1	LCC-03	Build		salmancotez@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmancotez@gmail.com	9/14/2026	V2.0
LCC-33	D1	Core Trading Engine	LCC	Account Lifecycle	Broker-side account reconciliation	As ops, I see an authoritative reconciliation view between business state and broker state, and read or archive mismatches, so that discrepancies never sit silent.	M	P0	V2	Draft	BE-1	LCC-01, BRG-15	Build		salmancotez@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmancotez@gmail.com	9/14/2026	V2.0
LCC-34	D1	Core Trading Engine	LCC	Account Lifecycle	Bulk account operations	As staff with permission, I can bulk suspend, resume, or archive accounts with a confirmation step, so that incidents and migrations are fast and safe.	M	P1	V2	Draft	BE-2	LCC-11, ADM-24	Build		salmancotez@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmancotez@gmail.com	9/14/2026	V2.0
LCC-35	D1	Core Trading Engine	LCC	Account Lifecycle	Account cloning for giveaway/partner/import	As a tenant admin, I clone an existing account configuration (group, rules, payout method) to create a new account, so that non-standard accounts are created consistently.	S	P2	V2	Draft	BE-2	LCC-15	Build		salmancotez@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmancotez@gmail.com	9/14/2026	V2.0
LCC-36	D1	Core Trading Engine	LCC	Account Lifecycle	Account data retention and archival policy	As the platform, I define retention duration for account data and the restore point for the archival archive, so that archival is recoverable and compliant.	M	P2	V2	Draft	BE-2	LCC-21, AUD-10	Build		salmancotez@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmancotez@gmail.com	9/14/2026	V2.0
PAY-45	D1	Core Trading Engine	PAY	Payout System	Crypto address validation	As the platform, I validate chain-specific crypto address format before submission, so that payouts to invalid addresses are blocked before money leaves.	S	P0	V1-Plus	Draft	BE-2	PAY-05	Build		salmancotez@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmancotez@gmail.com	9/14/2026	V1.1
PAY-46	D1	Core Trading Engine	PAY	Payout System	Payout approval delegation	As a finance approver, I can delegate my approval authority for a defined period, so that payouts are not stalled during absence.	S	P1	V2	Draft	BE-2	PAY-09, AUTH-14	Build		salmancotez@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmancotez@gmail.com	9/14/2026	V2.0
PAY-47	D1	Core Trading Engine	PAY	Payout System	Payout notification templates	As the platform, payout-specific notification templates (approved, rejected, partial delay) are owned by the payout module, so that trader communication is consistent.	S	P1	V2	Draft	BE-2	NOT-05, PAY-09	Build		salmancotez@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmancotez@gmail.com	9/14/2026	V2.0
PAY-48	D1	Core Trading Engine	PAY	Payout System	Provider fee reconciliation	As finance, I reconcile provider-charged fees against ledger entries per payout, so that fee discrepancies are caught.	M	P2	V2	Draft	BE-2	LED-06, PAY-34	Build		salmancotez@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmancotez@gmail.com	9/14/2026	V2.0
PAY-49	D1	Core Trading Engine	PAY	Payout System	Payout method default and priority	As a trader, I set a default payout method and priority order, so that payout requests use the right destination by default.	S	P1	V2	Draft	BE-2	PAY-05	Build		salmancotez@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmancotez@gmail.com	9/14/2026	V2.0
RSK-40	D1	Core Trading Engine	RSK	Risk Management	Risk case assignment and routing	As a risk lead, I assign cases to named reviewers and route by type, so that every case has an owner.	S	P1	V2	Draft	BE-2	RSK-12, AUTH-14	Build		salmancotez@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmancotez@gmail.com	9/14/2026	V2.0
RSK-41	D1	Core Trading Engine	RSK	Risk Management	Risk case decision appeal workflow	As a trader, I can appeal a risk case decision through a formal workflow, so that adverse outcomes are reversible.	M	P2	V2	Draft	BE-2	RSK-13, SUP-01	Build		salmancotez@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmancotez@gmail.com	9/14/2026	V2.0
RSK-42	D1	Core Trading Engine	RSK	Risk Management	Risk report export	As a compliance owner, I export risk reports (signals, cases, outcomes) for audit requests, so that evidence is self-serve.	S	P1	V2	Draft	BE-2	RSK-19, AUD-09	Build		salmancotez@gmail.com	9/14/2026	Added in PRD(20) consolidatio	Accepted	salmancotez@gmail.com	9/14/2026	V2.0

JRN-07	D2	Trader Experience	JRN	Trading Journal	Journal export	As a trader, I can export my entire journal, so that my notes are portable.	S	P1	V2	Draft	FE-1	JRN-01	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
JRN-08	D2	Trader Experience	JRN	Trading Journal	Trade replay sharing	As a trader, I can share a trade replay with a mentor or support to get feedback if possible.	S	P2	V3	Draft	FE-1	JRN-06	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
MOB-07	D2	Trader Experience	MOB	Mobile App	Mobile onboarding	As a trader on mobile, I see a first-run onboarding flow (logn, permissions, tutorial) so that mobile can be clear.	S	P1	V2	Draft	FE-1	MOB-01, TD-01	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
MOB-08	D2	Trader Experience	MOB	Mobile App	Offline mode	As a trader, I can view cached account and rule data when offline, so that the app is useful without connectivity.	M	P2	V3	Draft	FE-1	MOB-01, TD-03	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
CHT-07	D2	Trader Experience	CHT	Community & Live Chat	Chat history persistence	As a trader, my chat history with support persists so that I can reference past conversations.	M	P1	V2	Draft	BE-2	CHT-01	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
CHT-08	D2	Trader Experience	CHT	Community & Live Chat	Chat moderation	As a tenant admin, I have moderation tools (ban, mute, report) so that community behavior is governed.	M	P2	V3	Draft	BE-2	CHT-03	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
ADM-39	D3	Tenant Operations	ADM	Admin Panel	Admin onboarding checklist	As new tenant staff, I see a guided first-run checklist inside the admin panel, so that I know what to configure before going live.	S	P2	V2	Draft	FE-1	ADM-01	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
ADM-40	D3	Tenant Operations	ADM	Admin Panel	Admin notification center	As tenant staff, I see a console feed of items requiring attention (pending verifications, SLA breaches, ops alerts), so that nothing waits silently.	M	P2	V2	Draft	FE-1	ADM-28, NOT-01	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
ADM-41	D3	Tenant Operations	ADM	Admin Panel	Admin panel keyboard shortcuts and command palette	As power users, we use keyboard shortcuts and a command palette to navigate and act quickly, so that queue work is efficient.	S	P2	V2	Draft	FE-1	ADM-01, ADM-35	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
SUP-30	D3	Tenant Operations	SUP	Support Inbox	Support ticket templates per category	As support staff, I use starter templates per ticket category, so that replies are consistent and fast.	S	P2	V2	Draft	FE-1	SUP-02, SUP-20	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
SUP-31	D3	Tenant Operations	SUP	Support Inbox	Support agent performance dashboard	As a support lead, I see per-agent tickets closed, average response, and resolution time, so that individual performance is measurable.	M	P2	V2	Draft	BE-2	SUP-25, ANA-01	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
SUP-32	D3	Tenant Operations	SUP	Support Inbox	Support satisfaction survey	As a tenant admin, I collect post-resolution CSAT from traders, so that support quality has a direct signal.	S	P2	V2	Draft	BE-2	SUP-02, NOT-01	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
ANA-33	D3	Tenant Operations	ANA	Analytics & BI	Read model health dashboard	As ops, I see read model freshness and drift metrics in one place, so that reconciliation failures surface immediately.	S	P1	V2	Draft	BE-2	ANA-21	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
ANA-34	D3	Tenant Operations	ANA	Analytics & BI	Custom KPI alerting	As a tenant admin, I configure alerts when a KPI crosses a threshold, so that I react before a metrics drift becomes an incident.	M	P2	V2	Draft	BE-2	ANA-23, NOT-01	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
ANA-35	D3	Tenant Operations	ANA	Analytics & BI	Report sharing (scheduled link)	As a tenant admin, I share a read-only link to a report, so that stakeholders who lack platform access can still view it.	S	P2	V2	Draft	BE-2	ANA-11, GW-08	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
CRM-14	D3	Tenant Operations	CRM	CRM & Communications	Contact scoring and engagement history	As marketing staff, I see an engagement history and score for each contact, so that outreach is prioritized.	M	P2	V3	Draft	BE-2	CRM-05, CRM-12	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
CRM-15	D3	Tenant Operations	CRM	CRM & Communications	Campaign email template management	As marketing staff, I manage templates for campaign emails, so that consistent copy is reusable.	M	P2	V3	Draft	BE-2	NOT-04, CRM-06	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
CRM-16	D3	Tenant Operations	CRM	CRM & Communications	CRM data export	As a tenant admin, I export CRM data, so that my records are portable.	S	P2	V2	Draft	BE-2	CRM-01, AUD-09	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
MIG-07	D3	Tenant Operations	MIG	Migration Tooling	Migration dry-run mode	As a super admin, I run a full migration rehearsal that validates data without committing to the target, so that cutover is low-risk.	M	P1	V2	Draft	BE-1	MIG-01, MIG-04	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
MIG-08	D3	Tenant Operations	MIG	Migration Tooling	Post-migration validation report	As a super admin, I receive a formal validation report after migration, so that sign-off is possible.	S	P1	V2	Draft	BE-1	MIG-04, AUD-09	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V2.0
AFF-28	D5	Ecosystem & Growth	AFF	Affiliate System	Affiliate coupon management	As a tenant admin, I create affiliate-specific coupons with limits, expiry, and stacking rules, so that affiliate promotions are controlled and measurable.	M	P2	V3	Draft	BE-2	AFF-02, CHK-11	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
AFF-29	D5	Ecosystem & Growth	AFF	Affiliate System	Affiliate payout method verification	As the platform, I verify affiliate payout destination ownership before paying, so that affiliate payouts are not sent to unverified destinations.	M	P2	V3	Draft	BE-2	AFF-21, PAY-35	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
AFF-30	D5	Ecosystem & Growth	AFF	Affiliate System	Affiliate fraud velocity checks	As the platform, I detect abnormal click, signup, and payment velocity across affiliate links, so that affiliate fraud is caught before payouts.	M	P1	V3	Draft	BE-2	AFF-12, RSK-02	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
CMS-13	D5	Ecosystem & Growth	CMS	Website / CMS	Media library and asset management	As marketing staff, I upload and reuse tenant-branded images and assets, so that page editing is efficient and consistent.	M	P1	V3	Draft	FE-1	CMS-01, TEN-18	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
CMS-14	D5	Ecosystem & Growth	CMS	Website / CMS	Page versioning and rollback	As a tenant admin, I see page change history and can roll back to a prior version, so that bad publishes are recoverable.	M	P1	V3	Draft	FE-1	CMS-05, AUD-01	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
CMS-15	D5	Ecosystem & Growth	CMS	Website / CMS	Scheduled publishing	As marketing staff, I schedule pages and posts for future publication, so that launches are timed without manual work.	S	P1	V3	Draft	FE-1	CMS-05, OPS-17	Build		salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidated	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
CMP-15	D5	Ecosystem & Growth	CMP	Competition / Gamification	Competition templates	As a tenant admin, I create competitions from reusable templates, so that events are launched quickly and consistently. BL-20	D5	Ecosystem & Growth	BL	Tenant Billing	Billing tax profile and tax ID capture	As a tenant admin, I capture my tax ID and billing jurisdiction, so that invoices are tax-compliant.	M	P1	V3	Draft	BE-2	BL-03, TEN-13	Build				salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidation	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
BL-21	D5	Ecosystem & Growth	BL	Tenant Billing	Billing approval workflow for plan changes	As a platform owner, I require approval for enterprise plan changes, so that commercial changes are controlled.	M	P1	V3	Draft	BE-2	BL-09, AUD-01	Build				salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidation	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
SDK-16	D5	Ecosystem & Growth	SDK	BYO Integration SDK	SDK quickstart and code samples	As an integrator, I use runnable quickstarts and code samples, so that I can make my first API call quickly.	S	P1	V3	Draft	BE-1	SDK-04, SDK-08	Build				salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidation	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
SDK-17	D5	Ecosystem & Growth	SDK	BYO Integration SDK	SDK compatibility matrix	As an integrator, I see which SDK version supports which API version, so that upgrades are predictable.	S	P1	V3	Draft	BE-1	SDK-04, SDK-15	Build				salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidation	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
SDK-18	D5	Ecosystem & Growth	SDK	BYO Integration SDK	SDK package publishing pipeline	As the platform, I publish SDK packages to npm and PyPi automatically from CI, so that releases are reliable.	M	P1	V3	Draft	DevOps	SDK-04, OPS-03	Build				salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidation	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
DVP-16	D5	Ecosystem & Growth	DVP	Trained API / Developer Port	API key usage alerts and anomaly detection	As a developer or tenant admin, I receive alerts on quota breaches and abnormal API key usage, so that integration issues surface early.	M	P1	V3	Draft	BE-1	DVP-06, OPS-11	Build				salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidation	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
DVP-17	D5	Ecosystem & Growth	DVP	Trained API / Developer Port	Developer support ticket integration	As a developer, I open and track support tickets from the portal, so that integration help is centralized.	S	P2	V3	Draft	BE-2	DVP-01, SUP-01	Build				salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidation	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
DVP-18	D5	Ecosystem & Growth	DVP	Trained API / Developer Port	API mock server	As a developer, I test against a mock API without consuming sandbox quotas, so that iteration is fast.	M	P2	V3	Draft	BE-1	SDK-05, DVP-04	Build				salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidation	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
PLT-05	D5	Ecosystem & Growth	PLT	Platform Operations	Incident management and on-call rotations	As platform ops, I follow documented incident workflows and on-call escalations, so that incidents are handled consistently.	M	P1	V3	Draft	DevOps	OPS-28	Build				salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidation	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
PLT-06	D5	Ecosystem & Growth	PLT	Platform Operations	Capacity and cost governance dashboard	As platform ops, I see capacity and cost trends per tenant and service, so that scaling and spend are governed.	M	P2	V3	Draft	DevOps	OPS-23, PLT-02	Build				salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidation	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
PLT-07	D5	Ecosystem & Growth	PLT	Platform Operations	Multi-region failover notebook and drills	As platform ops, I rehearse multi-region failovers, so that regional outages are recoverable.	L	P1	V3	Draft	DevOps	PLT-01, OPS-22	Build				salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidation	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
PLT-08	D5	Ecosystem & Growth	PLT	Platform Operations	Security operations and vulnerability management	As platform ops, I run ongoing vulnerability management and security operations, so that platform security is proactive.	M	P1	V3	Draft	DevOps	OPS-14, OPS-20	Build				salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidation	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
CS-05	D5	Ecosystem & Growth	CS	Customer Success	Customer success playbooks and tools	As customer success staff, I use playbooks and tasks for onboarding and retention, so that success rates are repeatable.	M	P1	V3	Draft	BE-2	CS-04, CRM-01	Build				salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidation	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
CS-06	D5	Ecosystem & Growth	CS	Customer Success	Renewal and expansion tracking	As customer success staff, I track renewal and expansion opportunities per tenant, so that revenue retention is managed.	M	P1	V3	Draft	BE-2	BL-03, CS-02	Build				salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidation	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
CS-07	D5	Ecosystem & Growth	CS	Customer Success	Quarterly business review reporting	As customer success staff, I generate QBR reports from tenant health and usage data, so that reviews are data-driven.	M	P2	V3	Draft	BE-2	CS-02, ANA-01	Build				salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidation	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
TRD-06	D5	Ecosystem & Growth	TRD	Advanced Trading	Advanced order types	As an advanced trader, I use OCO, trailing stops, and bracket orders, so that my strategies are executable.	M	P2	V3	Draft	BE-2	TRD-01, BRG-01	Build				salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidation	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
TRD-07	D5	Ecosystem & Growth	TRD	Advanced Trading	Trading API for algorithmic traders	As an algorithmic trader, I access trading endpoints via API, so that I can automate strategies.	L	P2	V3	Draft	BE-1	TRD-01, SDK-01	Build				salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidation	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
TRD-08	D5	Ecosystem & Growth	TRD	Advanced Trading	Advanced trading risk controls and kill switch	As a tenant admin, I configure risk controls and a kill switch for advanced trading, so that runaway strategies are contained.	M	P1	V3	Draft	BE-2	TRD-01, RSK-01	Build				salmarcode@gmail.com	9/14/2026	Added in PRD(20) consolidation	Accepted	salmarcode@gmail.com	9/14/2026	V3.0
CHK-43	D2	Trader Experience	CHK	Checkout & Billing	Checkout session expiry job	As the platform, a scheduled worker expires abandoned checkout sessions after the reservation window, marks them expired, releases the reserved coupon and price holds, and emits a checkout session expired event through the outbox so that state reservations never corrupt a later order.	S	P0	V1-Core	Draft	BE-2	CHK-02, EVT-01	Build	flow, integrate providers	Emits checkout.session_expired	salmarcode@gmail.com	9/16/2026	Added by Decision 7 (checkout)	Accepted	salmarcode@gmail.com	9/16/2026	V1.0	
CHK-44	D2	Trader Experience	CHK	Checkout & Billing	Checkout session cancellation	As a trader, I can cancel my pending checkout session so that I release the reserved price and coupon without waiting for the timeout, and the session is marked cancelled.	S	P1	V1-Core	Draft	BE-2	CHK-02	Build	flow, integrate providers	DELETE /v1/checkout/sessions/{id}	salmarcode@gmail.com	9/16/2026	Added by Decision 7 (checkout)	Accepted	salmarcode@gmail.com	9/16/2026	V1.0	
EVL-38	D1	Core Trading Engine	EVL	Evaluation Engine	Max open lots rule	As the platform, I detect and flag when a trader's combined open volume exceeds the configured maximum open lots so that exposure rules are enforced at the challenge level.	S	P1	V2	Draft	BE-1	EVL-04	Build		Soft-breach flag in V1 scope as add	pdf-gap-18@script	9/18/2026	Extracted from PDF Module 10 New				V2.0	
EVL-39	D1	Core Trading Engine	EVL	Evaluation Engine	Max open positions rule	As the platform, I detect and flag when the number of concurrently open positions exceeds the configured limit so that position-court policies are observable and enforceable.	S	P1	V2	Draft	BE-1	EVL-04	Build		PDF Module 10 C3. Complements	pdf-gap-18@script	9/18/2026	Extracted from PDF rule taacore New				V2.0	
EVL-40	D1	Core Trading Engine	EVL	Evaluation Engine	Stop loss required rule	As the platform, I detect trades opened without a stop loss and flag them as warnings or hard breaches per challenge configuration, so that stop-loss-mandatory products are enforceable.	S	P1	V2	Draft	BE-1	EVL-04	Build		PDF Module 10 C5. Warning by data	pdf-gap-18@script	9/18/2026	Extracted from PDF rule taacore New				V2.0	
EVL-41	D1	Core Trading Engine	EVL	Evaluation Engine	Minimum trade count rule	As the platform, I require a minimum number of closed trades before a pass can be confirmed so that evaluation products cannot be passed by inactivity or single-trade luck.	S	P1	V2	Draft	BE-1	EVL-04	Build		PDF Module 10 C6. Complements	pdf-gap-18@script	9/18/2026	Extracted from PDF rule taacore New				V2.0	
EVL-42	D1	Core Trading Engine	EVL	Evaluation Engine	EA / algo trading restriction rule	As the platform, I detect when EA / algo trading is used on an account (via magic number, order comment, or execution pattern) and flag or fail the trade per challenge configuration.	M	P1	V2	Draft	BE-1	EVL-04	Build		PDF Module 10 D1. Detection quality	pdf-gap-18@script	9/18/2026	Extracted from PDF rule taacore New				V2.0	
EVL-43	D1	Core Trading Engine	EVL	Evaluation Engine	Grid / Martingale detection rule	As the platform, I detect lot-doubling sequences after consecutive losses on the same symbol and flag the account for review so that martingale / grid behavior is caught before it explodes.	M	P1	V2	Draft	BE-1	EVL-04, RSK-01	Build		PDF Module 10 D4. Feeds risk calculator	pdf-gap-18@script	9/18/2026	Extracted from PDF rule taacore New				V2.0	
EVL-44	D1	Core Trading Engine	EVL	Evaluation Engine	Decision priority matrix	As the platform, I evaluate fail conditions before pass conditions, and review conditions before warnings, so that a trader cannot "pass" on the same trade that breaches a rule.	S	P0	V1-Core	Draft	BE-1	EVL-04, EVL-10, EVL-17	Build		PDF Module 10 decision engine. Bridge	pdf-gap-18@script	9/18/2026	Extracted from PDF Module 10 New				V1.0	
EVL-45	D1	Core Trading Engine	EVL	Evaluation Engine	Balance-trailing drawdown type	As a tenant admin, I can configure overall drawdown to trail the highest recorded BALANCE (not equity) so that products can offer balance-based trading advantages.	S	P1	V2	Draft	BE-1	EVL-08, EVL-29	Build		PDF Module 10 A3. Existing EVL-08	pdf-gap-18@script	9/18/2026	Extracted from PDF drawdown New				V2.0	
LCC-37	D1	Core Trading Engine	LCC	Account Lifecycle	Enforcement grace period configuration	As a tenant admin, I configure grace-period policy per rule (none, time-based, confirmation-based, first-offense only, or human review) so that enforcement is proportional to the violation.	M	P0	V2	Draft	BE-2	LCC-02, AUD-01	Build		PDF Module 12 grace-period taacore	pdf-gap-18@script	9/18/2026	Extracted from PDF Module 12 New				V2.0	
LCC-38	D1	Core Trading Engine	LCC	Account Lifecycle	Breach evidence hash chain	As the platform, I capture account state, open positions, trade history, and rule configuration at breach time, hash each evidence block with SHA-256, and chain hashes to previous blocks so that evidence is tamper-proof for disputes.	M	P0	V2	Draft	BE-1	AUD-14, EVL-16, BRG-07	Build		PDF Module 12 evidence integrity	pdf-gap-18@script	9/18/2026	Extracted from PDF Module 12 New				V2.0	
LCC-39	D1	Core Trading Engine	LCC	Account Lifecycle	Forced position closure log	As the platform, I record every forced position close during enforcement with ticket, symbol, requested price, executed price, slippage, taking, and close status so that enforcement is defensible per position.	S	P0	V2	Draft	BE-1	BRG-10, LCC-27	Build		PDF Module 12 per-ticket closure log	pdf-gap-18@script	9/18/2026	Extracted from PDF Module 12 New				V2.0	
LCC-40	D1	Core Trading Engine	LCC	Account Lifecycle	Enforcement dispute reversal workflow	As risk or compliance staff, I can reverse an enforcement when a dispute is upheld, with each reversal action (re-enable account, restore challenge state, credit forced-close losses, or request cancelled payouts) logged separately.	M	P1	V2	Draft	BE-2	LCC-38, PAY-14, AUD-01	Build		PDF Module 12 dispute resolution	pdf-gap-18@script	9/18/2026	Extracted from PDF Module 12 New				V2.0	
LCC-41	D1	Core Trading Engine	LCC	Account Lifecycle	Double-enforcement prevention job	As the platform, I deduplicate enforcement jobs by instance and a short time window so that simultaneous breach events on the same account never create duplicate enforcement jobs.	S	P0	V1-Core	Draft	BE-1	EVL-17, LCC-02	Build		PDF Module 12 concurrency protection	pdf-gap-18@script	9/18/2026	Extracted from PDF Module 12 New				V1.0	
LCC-42	D1	Core Trading Engine	LCC	Account Lifecycle	Multi-resolution equity snapshot retention	As the platform, I retain equity snapshots at multiple resolutions (5 minute for recent, hourly for medium, daily for long-term) so that equity curves and historical reporting load efficiently.	M	P1	V2	Draft	BE-1	LCC-18	Build		PDF Module 11. Complements evidence	pdf-gap-18@script	9/18/2026	Extracted from PDF Module 11 New				V2.0	
AUD-25	D4	Platform Infrastructure	AUD	Audit & Compliance	Breach evidence chain audit trail	As the platform, I store breach evidence hash chains as immutable audit records and expose them to admins and regulators for dispute defense so that every enforcement has provable primary evidence.	M	P0	V2	Draft	BE-1	LCC-38, AUD-01, AUD-14	Build		PDF Module 12 evidence chain. Complete	pdf-gap-18@script	9/18/2026	Extracted from PDF Module 12 New				V2.0	
AUD-26	D4	Platform Infrastructure	AUD	Audit & Compliance	PCI SAQ-A compliance evidence pack	As a compliance owner, I export structured evidence demonstrating PCI SAQ-A scope (no new card or strong, hosted payment files, tokenised credentials only) so that annual attestation is streamlined.	M	P1	V2	Draft	BE-1	CHK-06, AUD-17	Build		PDF Module 14 PCI compliance complete	pdf-gap-18@script	9/18/2026	Extracted from PDF Module 14 New				V2.0	
RSK-45	D1	Core Trading Engine	RSK	Risk Management	Perfect consistency detector	As a batch job, I detect trading patterns whose daily results are unreasonably consistent and issue signals so that copy-trading or algorithmic behaviour is surfaced for review.	M	P1	V2	Draft	BE-2	RSK-01, LCC-19	Build		PDF Module 18 signal B3. Complete	pdf-gap-18@script	9/18/2026	Extracted from PDF signal taacore New				V2.0

EVL-46	D1	Core Trading Engine	EVL	Evaluation Engine	Metric registry and calculation service	As the platform, I maintain a canonical metric registry that defines every rule metric (daily loss, drawdown, PnL, consistency, trading days) with its exact mathematical formula, basis (equity or balance), inclusion of floating PnL, commissions, swaps, and adjustments, and precision scales, so that two functions also both configure "5% daily loss" evaluate identically under the same rule set.	L	P0	V1-Core	Draft	BE-1	BRG-07, EVL-04	Build	Foundational layer between canon	rule-engine-gap-fil@script		2026-09-18 2 15:21	Added from rule-engine rescanNew				V1.0
EVL-47	D1	Core Trading Engine	EVL	Evaluation Engine	Trading calendar and time semantics	As the platform, I provide a canonical trading calendar and time context that defines trading day boundaries, day reset time, DST handling, holiday calendar, trading sessions, weekend windows, broker time versus platform time, and challenge start and expiry, so that every rule consumes a standard time context instead of embedding its own assumptions.	M	P0	V1-Core	Draft	BE-1	EVL-46, BRG-28	Build	Every rule should consume the sam	rule-engine-gap-fil@script		2026-09-18 2 15:21	Added from rule-engine rescanNew				V1.0
EVL-48	D1	Core Trading Engine	EVL	Evaluation Engine	Rule composition and dependency map	As the platform, I maintain an internal representation of every rule and a dependency map from rule to metrics, so that when a metric changes only the rules that depend on it are re-evaluated, and composite rules such as phase pairs can be expressed as expressions over primitive rules.	M	P0	V1-Core	Draft	BE-1	EVL-46	Build	V1 uses a fixed rule catalog but st	rule-engine-gap-fil@script		2026-09-18 2 15:21	Added from rule-engine rescanNew				V1.0
EVL-49	D1	Core Trading Engine	EVL	Evaluation Engine	Observed vs evaluated snapshot model	As the platform, I store two distinct snapshot types: a BrokerSnapshot that records exactly what the broker reported, and an EvaluationSnapshot that links to a BrokerSnapshot, records derived metrics, and records the rule set version used, so that any breach decision can be answered with the precise state that was known when the decision was made.	M	P0	V1-Core	Draft	BE-1	BRG-07, EVL-16	Build	Critical for disputes and replay. Acc	rule-engine-gap-fil@script		2026-09-18 2 15:21	Added from rule-engine rescanNew				V1.0
EVL-50	D1	Core Trading Engine	EVL	Evaluation Engine	Rule trigger matrix and observation requirements	As the platform, I classify every rule by the observation pattern it requires (fixed risk stream, position or trade event, periodic sync, time or event, or behavioral-based), and route each rule to the correct observation path, so that new market ticks are never glued into the rule engine and no critical breach rule is left on a slow periodic poll.	M	P0	V1-Core	Draft	BE-1	EVL-46, EVL-48	Build	This classification determines whe	rule-engine-gap-fil@script		2026-09-18 2 15:21	Added from rule-engine rescanNew				V1.0
EVL-51	D1	Core Trading Engine	EVL	Evaluation Engine	Fast risk guard and emergency threshold path	As the platform, I run a deliberately small and independently verifiable fast risk guard that watches only catastrophic thresholds such as max daily loss and max drawdown on the highest-frequency observation path available, so that a bug in the full rule evaluator cannot leave a funded account unbonded.	M	P1	V1-Plus	Draft	BE-1, DevOps	EVL-50, BRG-18	Build	Independent backupstop, not a secon	rule-engine-gap-fil@script		2026-09-18 2 15:21	Added from rule-engine rescanNew				V1.1
EVL-52	D1	Core Trading Engine	EVL	Evaluation Engine	Snapshot ordering and staleness policy	As the platform, I enforce strict ordering on trading snapshots so that a late-arriving snapshot never overwrites a newer dated, and I enter a defined DATA_STALE state when the observation path stops delivering snapshots near a threshold, so that stale or out-of-order broker data never drives a breach or a payout.	S	P0	V1-Core	Draft	BE-1	EVL-49, BRG-15	Build	Tightens LOC-28 (currently V2) for	rule-engine-gap-fil@script		2026-09-18 2 15:21	Added from rule-engine rescanNew				V1.0
EVL-53	D1	Core Trading Engine	EVL	Evaluation Engine	Precision, rounding and threshold comparison semantics	As the platform, I define explicit precision, rounding, and comparison semantics for every metric, including account currency rounding, broker-reported versus platform-derived equity, stop or inclusive threshold comparisons, and tolerance buffers, so that a trader and the platform never disagree on whether a threshold was crossed.	S	P0	V1-Core	Draft	BE-1	EVL-46	Build	Prevents the 'trader sees \$95,000 c	rule-engine-gap-fil@script		2026-09-18 2 15:21	Added from rule-engine rescanNew				V1.0
EVL-54	D1	Core Trading Engine	EVL	Evaluation Engine	Rule test vector suite	As the platform, I maintain a vetted test vector suite covering day-start equity vs baseline, floating PnL, commissions, swaps, deposits and withdrawals, partial closes, broker corrections, DST day reset, trading drawdown high-water mark, threshold tolerance, stale snapshots, and out-of-order snapshots, so that the rule semantics are executable and regressions are caught before release.	M	P1	V1-Core	Draft	BE-1	EVL-04, EVL-46, EVL-35	Build	Expands EVL-35 into the explicit se	rule-engine-gap-fil@script		2026-09-18 2 15:21	Added from rule-engine rescanNew				V1.0
LOC-43	D1	Core Trading Engine	LOC	Account Lifecycle	Breach decision idempotency key	As the platform, every breach decision carries an idempotency key composed of tenant id, account id, rule version, and breach epoch, so that the same breach detected repeatedly results in exactly one logical breach, one account state transition, and one enforcement workflow.	S	P0	V1-Core	Draft	BE-1	LOC-41, EVL-17	Build	Complements LOC-41 (double enfo	rule-engine-gap-fil@script		2026-09-18 2 15:21	Added from rule-engine rescanNew				V1.0
LOC-44	D1	Core Trading Engine	LOC	Account Lifecycle	Partial enforcement state and per-position confirmation	As the platform, when enforcement closes some but not all positions, the account enters ENFORCEMENT_PARTIAL and the system continues reconciliation until every position is confirmed closed or an escalation policy fires, so that a partial liquidation is never marked FAILED.	M	P0	V1-Core	Draft	BE-1	BRG-10, BRG-11, LOC-39	Build	Adds ENFORCEMENT_PENDING E	rule-engine-gap-fil@script		2026-09-18 2 15:21	Added from rule-engine rescanNew				V1.0

9/13/2026 18:21:38	salmancodez@gmail.com	STEP8_IMPORT	BULK	New modules + features		5 modules, 61 features	Added missing competitor-gap items
9/13/2026 23:30:30	salmancodez@gmail.com	MOVE_FORWARD	BULK	Derived sheets		V1=159, Future=814, Roadmap=6	Housekeeping pass after phase coherence sweep
9/14/2026 0:25:44	salmancodez@gmail.com	MOVE_FORWARD	BULK	Derived sheets		V1=159, Future=814, Roadmap=6	Housekeeping pass after phase coherence sweep
2026-09-14 7:03:14	salmancodez@gmail.com	CLEANUP_V1	BULK	Build vs Buy Rules	BVR-08=Prisma, BVR-14=in-hous	BVR-08=Drizzle preferred, BVR-14=	Reconciled three contradictory rules and closed the BVR-18 → BVR-22 gap. See Tooling Register cross-references.
2026-09-14 7:03:14	salmancodez@gmail.com	CLEANUP_V2	BULK	V1 Execution + Open	Inconsistent / stale / misaligned	Reconciled / synced / aligned	Cleanup v2: rewrote V1 Execution Notes 2 for V1 rows and cleared stray demotion text from Proposed By; fixed remaining Open Questions typo and realigned KYC re-verification row; appended missing V1 tools to Integration Map; corrected Out Of Scope 4th-block header to "Tenant Billing".
2026-09-14 10:15:43	salmancodez@gmail.com	CLEANUP_V2_CORRECTION	BULK	Master Backlog + Open	CLEANUP_V2 was recorded as fu	Master Backlog Notes 2 rewritten f	Honest correction. CLEANUP_V2 did not touch Master Backlog, so MOVE FORWARD re-derived contradictory V1 Execution rows. CLEANUP_V3 fixes the source and records the gap.
2026-09-14 10:22:30	salmancodez@gmail.com	MOVE_FORWARD	BULK	Derived sheets		V1=159, Future=814	Regenerated V1 Execution Sheet and Future Backlog from Master Backlog. Refreshed Version Roadmap counts.
2026-09-14 10:40:32	salmancodez@gmail.com	MOVE_FORWARD	BULK	Derived sheets		V1=159, Future=814	Regenerated V1 Execution Sheet and Future Backlog from Master Backlog. Refreshed Version Roadmap counts.
2026-09-14 10:44:47	salmancodez@gmail.com	FIX_INTEGRATION_MAP	BULK	Integration Map	7 columns (Tool Category What	10 columns (Tool Category What	Standardized status values to a defined enum; added Owner, Serves Release, and Cost model columns; fixed Prisma/Drizzle contradiction (Drizzle primary, Prisma fallback per BVR-08); imported 30+ missing tools from Tooling Register; standardized Category values to Must-integrate / Self-hosted / Consider-later.
2026-09-14 10:46:31	salmancodez@gmail.com	FIX_INTEGRATION_MAP	BULK	Integration Map	7 columns (Tool Category What	10 columns (Tool Category What	Standardized status values to a defined enum; added Owner, Serves Release, and Cost model columns; fixed Prisma/Drizzle contradiction (Drizzle primary, Prisma fallback per BVR-08); imported 30+ missing tools from Tooling Register; standardized Category values to Must-integrate / Self-hosted / Consider-later.
2026-09-14 10:51:15	salmancodez@gmail.com	FIX_DATA_DICTIONARY	N/A	Data Dictionary	5 sections (Priority, Phase, Status,	68 enum values across 10 section	Added Release values (V1.0–V3.0). Added Comment Status values. Expanded Build Strategy to include compound values actually used in Master Backlog (Build/config, Build flow + Integrate providers, Build core + Integrate advanced, Integrate provider + Build gates, Integrate provider + Build routing, Buy/Integrate). Added Release->Phase mapping. Added reference enums for Tool Category, Signup status, Tool Type, Hosting, and Domain ID so the Data Dictionary is the single source of valid enum values across the workbook.
2026-09-14 10:59:04	salmancodez@gmail.com	FIX_VERSION_ROADMAP	BULK	Version Roadmap	6 rows (V1.0, V1.1, V1.2, V2.0, V2	4 rows (V1.0, V1.1, V2.0, V3.0), 12	Removed empty V1.2 and V2.1 placeholder rows. Added Gate Status column. Added Target Date values (TBD — edit script to set). Corrected V2.0 and V3.0 themes to match actual scope. Refreshed P0/P1/P2/Total counts from Master Backlog.
9/14/2026 13:00:27	salmancodez@gmail.com	CLEANUP_V3	BULK	Master Backlog Note	present	removed	Notes 2 column removed from Master Backlog; V1 rows cleaned.
9/14/2026 13:00:28	salmancodez@gmail.com	FIX_CHK_25_STATUS	CHK-25	Status		Draft	CHK-25 Status set to Draft.
9/14/2026 13:00:28	salmancodez@gmail.com	FIX_OUT_OF_SCOPE_HEADER	BULK	Out Of Scope 5th bloc	Risk Management	Analytics & BI	Corrected fifth-block Out Of Scope header to match Analytics & BI content.
9/14/2026 13:00:29	salmancodez@gmail.com	FIX_FUTURE_BACKLOG_SCHEM	BULK	Future Backlog Colu	present	removed	Removed stray Column 23 from Future Backlog.
9/14/2026 13:00:30	salmancodez@gmail.com	CLEANUP_V4	CHK-28	User Story	trailing note embedded in cell	moved to Notes	Stripped embedded project note from User Story; moved to Notes.
9/14/2026 13:00:30	salmancodez@gmail.com	CLEANUP_V4	CON-04	User Story	extra sentence embedded in cell	moved to Notes	Stripped trailing spec sentence from User Story; moved to Notes.
9/14/2026 13:00:31	salmancodez@gmail.com	CLEANUP_V4	DOC-12	User Story	DocuSign>HelloSign	Documenso	Aligned DOC-12 with BVR-27 (use Documenso for e-signature).
9/14/2026 13:00:32	salmancodez@gmail.com	CLEANUP_V4	BVR-08	Tooling Register Pris	Prisma migrations are best-fit for c	Prisma acceptable fallback; Drizzle	Aligned Tooling Register Prisma row rationale with BVR-08.

Tool	Category	What it does	Service Req IDs	Service Release	Cost	Cost model	Signup status	Owner	Action needed
MetaApi	Mult-integrate	MTS account provisioning, balance/inquiry, position, stock trade execution, enable/disable	BIG-01, BIG-02, BIG-05, BIG-07, BIG-08, BIG-10, BIG-11, BIG-14, BIG-43, BIG-44	V1.0	\$50-\$100/mo per active accou.	Per active account	NOT STARTED	Shadab	Sign up today. Get sandbox keys. Highest risk dependency. Confirm provisioning API coverage before Phase 2.
Yaufrt	Mult-integrate	Identity verification, document checks, liveness detection	CHK-01, KYC-02, KYC-03, KYC-07, KYC-08, KYC-24	V1.0	Per verification pricing	SIGNED	FUNCTIONAL	FunderBills CDO	Confirm FunderBills contact keys work. Confirm webhook endpoints are included (reflects KYC-05). Build adapter interface.
Match2Pay	Mult-integrate	Card and local payment processing for Pakistan/India	CHK-04, CHK-06, CHK-07, CHK-08	V1.0	Transaction fees	Per transaction	NOT STARTED	BE-2	Sign up this week. Get API keys. Test hosted checkout. Confirm adjuvment report format.
Interkasa	Mult-integrate	Alternative local payment rail (secondary provider)	CHK-04, CHK-06	V1.0	Transaction fees	Per transaction	NOT STARTED	BE-2	Sign up as secondary provider behind the same CHK-04 payment interface.
NDWPayments	Mult-integrate	Crypto payments: BTC, ETH, USDT with webhooks and auto-conversion	CHK-04, CHK-05	V1.0	~1% fee	Per transaction	NOT STARTED	BE-2	Sign up when ready to test crypto checkout. Week 2. Confirm network support (TRON, BSC, BEP20).
Postmark	Mult-integrate	Transactional email delivery with best deliverability	AUTH-05, NOT-03, NOT-04, NOT-05	V1.0	\$15/mo for 10k emails	Per email sent	NOT STARTED	BE-2	Sign up today. Use Postmark for production payout and password-reset email. Feedback for domain control.
Cloudflare	Mult-integrate	DNS resolution for tenant domains, CDN, edge caching, DoH, protection, WAF	TEN-02, TEN-18, GW-01, GW-20, OPS-15, DDC-06	V1.0	Free tier sufficient	Freemium	NOT STARTED	DevOps	Set up as DNS and edge layer. Every tenant domain routes through it. Confirm Cloudflare for back for custom domains.
Cloudflare R2	Mult-integrate	Tenant-scoped object storage for documents and certificates. Zero egress fees	LED-10, DDC-06	V1.0	Free for first 10GB	Per GB stored	NOT STARTED	DevOps	Set up when building DDC-01. Week 2. Tenant prefilled keys.
Striip Actions	Mult-integrate	CI pipeline lint, typecheck, test, build, CD pipeline, deploy, staging/prod.	OPS-03, OPS-04, OPS-36	V1.0	Free public / \$4/mo private	Per asset	SIGNED	DevOps	Configure CI/CD this week. Confirm secrets auto integration with SOPS.
Sentry	Mult-integrate	Error tracking and stack traces for all services	OPS-11	V2.0	Free tier; \$6 events/mo	Freemium	NOT STARTED	DevOps	Adopt every service on day one. Wire alerting to OPS-38 routing.
Better Auth	Mult-integrate	Auth foundation: registration, login, sessions, MFA, OAuth, self-hosted, no per-MAU pricing	AUTH-01, AUTH-43 (auth foundation)	V1.0	Free	Free	EVALUATING	BE-1	Adopt as the auth foundation. Keep AUTH-13 permission engine as our own resource action layer. Confirm plugin supports multi-tenant organizations.
Carbox	Mult-integrate	Policy decision point for RBAC. Externalized XACML policies, multi-tenant resource-level rules	AUTH-13, AUTH-14	V1.0	Free (self-hosted)	Infra only	EVALUATING	BE-2	Evaluate before writing authorization logic in AUTH-13. If adopted, AUTH-13 becomes a Carbox client. If rejected, build in-house.
Hetzner	Self-hosted	Compute VPS or dedicated server for entire Compose stack	OPS-02, OPS-07, OPS-23, OPS-37	V1.0	€40-€80/mo	Per server	NOT STARTED	DevOps	Rent one dedicated server for V1. Document host sizing and capacity headroom per OPS-37.
PostgreSQL	Self-hosted	Primary database, event log, command table, ledger, audit	EVT-01, EVT-08, EVT-20, LED-01 to LED-25, AUD-01, AUD-04	V1.0	Free on Hetzner	Infra only	SELF-HOSTED	DevOps	Provision on Hetzner. Docker. WAL archiving. Daily backups. Verify restore (see OPS-35).
Redis	Self-hosted	Token sessions, rate limiting, event relay via Streams, caching, BullMQ backing store	AUTH-07, GW-05, EVT-02, EVT-22, OPS-36	V1.0	Free on Hetzner	Infra only	SELF-HOSTED	DevOps	Provision on Hetzner. Enable AOF persistence for Streams. Do NOT upgrade beyond 7.2 without a license review (BWR-17).
Docker	Self-hosted	Containerization for all services. Immutability images with commit auto tags	OPS-01, OPS-02, OPS-36	V1.0	Free	Infra only	SELF-HOSTED	DevOps	OCI images are portable. Push to a defined registry with immutable tags (OPS-36).
Docker Compose	Self-hosted	Production orchestration for V1. Explicit CPU/memory limits per service	OPS-02, OPS-37	V1.0	Free	Infra only	SELF-HOSTED	DevOps	Compose is the V1 source of truth. Do NOT introduce Kubernetes until V2.
Pgbouncer	Self-hosted	Postgres connection pooling. Per-service pool sizing	OPS-35	V1.0	Free	Infra only	SELF-HOSTED	DevOps	Run in front of Postgres. Size pools per service.
SOPS + age	Self-hosted	Secrets encryption at rest with age. Inject at runtime via ConfigMaps	OPS-09	V1.0	Free	Infra only	SELF-HOSTED	DevOps	Do NOT buy HashiCorp Vault for V1 (BWR-04). Integrate in V2 upgrade path when audit trails are required.
Drizzle ORM	Self-hosted	SQL-fluent ORM. Pure SQL migrations for expand-contract discipline. PRIMARY ORM.	OPS-06	V1.0	Free	Free	EVALUATING	BE-1, DevOps	PRIMARY ORM per BWR-08. Adapt: Generate pure SQL migrations so we control tenant-scoped query shape (AUTH-13, TEN-03).
Prisma	Self-hosted	Type-safe ORM with declarative schema. FALLBACK ONLY - see Drizzle ORM for and BWR-08	OPS-06	V1.0	Free	Free	EVALUATING	BE-1, DevOps	FALLBACK ONLY: Use only if it has better a declarative schema over Drizzle. Do NOT adopt as primary.
BullMQ	Self-hosted	Redis-backed job queue + scheduler. Sync workers, reconciliation, evaluation triggers, scheduled reports	BIG-07, BIG-08, EVL-03, OPS-17, OPS-27	V1.0	Free	Infra only	EVALUATING	BE-1	Adopt as the job queue per BWR-19. Pair with BullMQ Dashboard for observability.
BullMQ Dashboard	Self-hosted	Low-queue metrics, job view, retry state, scheduler status. Embeddable React component.	OPS-17, CON-21	V2.0	Free	Free	EVALUATING	BE-1	Enrich into admin panel per BWR-25. Comparison to BullMQ. No custom JS built.
Puppeteer	Self-hosted	Headless Chrome for rendering HTML templates to PDF certificates	DOC-01	V1.0	Free	Infra only	SELF-HOSTED	BE-2	Use for PDF generation (BWR-07). Do NOT log DevTools or PDFMonkey. Evaluate http://pdfs in V2 for lower memory.
Prometheus	Self-hosted	Metrics, dashboards, log aggregation, vendor neutral tracing	OPS-10, OPS-12	V2.0	Free	Infra only	SELF-HOSTED	DevOps	Full observability stack. Do NOT introduce commercial APM (BWR-11). Verify Grafana/Loki APM distribution.
Grafana	Self-hosted	Metrics, dashboards, log aggregation, vendor neutral tracing	OPS-10, OPS-12	V2.0	Free	Infra only	SELF-HOSTED	DevOps	Full observability stack. Do NOT introduce commercial APM (BWR-11). Verify Grafana/Loki APM distribution.
Loki	Self-hosted	Metrics, dashboards, log aggregation, vendor neutral tracing	OPS-10, OPS-12	V2.0	Free	Infra only	SELF-HOSTED	DevOps	Full observability stack. Do NOT introduce commercial APM (BWR-11). Verify Grafana/Loki APM distribution.
OpenTelemetry	Self-hosted	Metrics, dashboards, log aggregation, vendor neutral tracing	OPS-10, OPS-12	V2.0	Free	Infra only	SELF-HOSTED	DevOps	Full observability stack. Do NOT introduce commercial APM (BWR-11). Verify Grafana/Loki APM distribution.
TradingView Lightweight Charts	Self-hosted	Financial charts for equity curve and P&L - 45K+ piped.	TD-08, TD-21	V2.0	Free	Free	EVALUATING	FE-1	Pair with Reactors for admin dashboard bar-line charts. Confirm chart data connect before TD-04 built.
Flint	Self-hosted	Feature flags with On-state workflows. Declarative flag flips, self-hosted, no paid tiers.	TEN-10, CON-31	V2.0	Free	Infra only	EVALUATING	BE-2	Adopt for per-tenant flags and platform-wide rollouts per BWR-20. Git-native declarative flags.
Hostd	Self-hosted	Self-hosted webhook service. Began HMAC signing, delivery logs, subscriber management, circuit breakers	EVT-11, EVT-13, EVT-14, EVT-15	V2.0	Free (self-hosted)	Infra only	EVALUATING	BE-1	Adopt in V2 when outboard tenant webhooks land per BWR-24. Refactor EVT-13 to EVT-14 to house built ADR - verify distribution model.
Uptime Kuma	Self-hosted	Self-hosted uptime monitoring. HTTP/TCP/ping/DNS. Alerts via Telegram, email, webhooks.	OPS-31	V2.0	Free	Infra only	EVALUATING	DevOps	Adopt in V2 for external uptime monitoring. Run independently as a total outage is still detected.
Unkey	Consider later	API key management: issuance, rotation, revocation, per-key rate limits, usage analytics	AUTH-21, GW-16	V2.0	Free (self-hosted)	Infra only	EVALUATING	BE-2	Adopt in V2 when AUTH-21 tenant API keys land. Provides rate limiting and analytics. ADR - verify.
Legto	Consider later	Multi-tenant identity provider built for SaaS. Customizable login, user management, RBAC, organizations	AUTH-01, AUTH-43	V2.0	Free (self-hosted)	Infra only	EVALUATING	BE-1	Alternative to Better Auth for V2/V3. Evaluate only if Better Auth hits a wall on multi-tenant organizations or SaaS.
42St	Consider later	Developer first consent management. React/Next.js native. Policy packs resolve consent model per region.	TD-01, ADM-01, NOT-02	V2.0	Free (self-hosted)	Infra only	EVALUATING	FE-1	Adopt when Webstar/CMS (V3) lands or Postmark/Segment/Intercom/Crisp introduced per BWR-22. Do NOT introduce in V1.
InfraSec	Consider later	Self-hosted secrets manager with UI, audit logs, dynamic secrets, team management.	OPS-09	V2.0	Free	Infra only	DEFERRED	DevOps	V2 upgrade path from SOPS + age per BWR-21. Introduce only when secret access audit trails are required.
Item.pdf-ite	Consider later	HTML to PDF. 7 or faster cold start, PDFs 52-84s, smaller, no Chromium download.	DOC-01, DDC-13, DDC-14	V2.0	Free	Free	EVALUATING	BE-2	Evaluate as drop-in replacement for Puppeteer in V2 when memory becomes a concern.
NATS JetStream	Consider later	Ultra-fast, cloud-native event bus. Built-in persistence, subject-based routing. Lighter than Kafka.	EVT-02, EVT-06, EVT-20	V2.0	Free	Infra only	DEFERRED	BE-1	V2 upgrade path from Redis Streaming when service count goes beyond 6-7. Do NOT introduce in V1.
Tsaxif (V2 gateway)	Consider later	Docker-native edge gateway. Auto-discovered Compose services. Built-in Let's Encrypt.	GW-01, OPS-02	V2.0	Free	Infra only	DEFERRED	DevOps	V1 remains in ops mid-release per BWR-12. Introduce Tsaxif in V2 when gateway plans needs its own service.
DocuSign	Consider later	Open source e-signature platform. Self-hosted, legally binding, audit trail included.	DOC-12	V2.0	Free (self-hosted)	Infra only	EVALUATING	BE-2	Adopt in V2 when DOC-12 contract e-signature lands per BWR-27. Replaces DocuSign/HelloSign choice.
Comp AI	Consider later	Open source compliance automation. Evidence collection, policy generation, continuous monitoring for SOC 2 / ISO 27001.	AUD-17, AUD-18	V2.0	Free (self-hosted)	Infra only	EVALUATING	BE-1	Adopt in V2 when SOC 2 readiness becomes a sales requirement per BWR-26. Do NOT build evidence collection in-house.
Openline	Consider later	Developer first compliance automation and Trust Center. Apache 2.0 license more permissive than Comp AI.	AUD-17	V2.0	Free (self-hosted)	Infra only	EVALUATING	BE-1	Evaluate alongside Comp AI per BWR-26. Pick whichever fits the license model better.
gnifs	Consider later	IP enrichment: country, ASN, proxy/hosting flags for risk fingerprint capture.	RISK-02	V2.0	Tier-based	Per request tier	EVALUATING	BE-2	Adopt in V2 when RISK-02 risk fingerprint capture lands. Behind a Risk adapter interface.
FingerprintJS	Consider later	Device fingerprinting for overlap detection at scale.	RISK-02, RISK-04	V2.0	Per request tier	Per request tier	DEFERRED	BE-2	Deferr until volume justifies cost. gnifs first. Behind a Risk adapter interface.
DocuSign	Consider later	Legally binding funded account agreements (DOC-12)	DOC-12	V2.0	Per envelope	Per envelope	REJECTED	BE-2	Rejected: Use DocuSign (self-hosted) per BWR-27.
DocuBooks	Consider later	Sync ledger entries to accounting software (LED-20)	LED-20	V2.0	Per asset	Per asset	EVALUATING	FunderBills CDO	Pick at LED-20 build. CSV export path exists as fallback. Confirm with external accountant.
Xero	Consider later	Alternate accounting sync (LED-20)	LED-20	V2.0	Per asset	Per asset	EVALUATING	FunderBills CDO	Pick one of DocuBooks or Xero at LED-20 build. Confirm with external accountant.
Avastara	Consider later	VAT/GST calculation engine (CHK-26)	CHK-26	V2.0	Per transaction	Per transaction	EVALUATING	BE-2	Evaluate as manual tax fields at CHK-26 build. Depends on tenant jurisdiction list.
Twilio	Consider later	SMS channel (NOT-17)	NOT-17	V2.0	Per message	Per message	DEFERRED	BE-2	Deferred to V2 by design. Behind the NOT-02 Channel adapter interface.
Discord API	Consider later	Community role automation (CHT-02 / CDM-00)	CHT-02	V2.0	Free	Free	EVALUATING	BE-2	Adopt when community role automation lands. Behind a Community adapter interface.
ReSend	Consider later	Modern TypeEmail email SDK with native React Email integration	NOT-03, NOT-04, NOT-05	V1.0	\$20/mo for 50k emails	Per email sent	EVALUATING	BE-2	Recommended for development and non-critical email. Postmark remains production choice for period. Behind the NOT-03 EmailProvider interface.
Stripe Billing	Consider later	Recurring invoicing engine for tenant billing (BL-07)	BL-07	V3.0	Per transaction	Per transaction	EVALUATING	BE-2	Evaluate at BL-07 build. Behind a Billing adapter interface.
Zapier	Consider later	Low-code connectors (DWP-09)	DWP-09	V3.0	Per task	Per task	DEFERRED	BE-2	Defer to V3. Webhook-based integration. Prefer refs self-hosted option.
idm	Consider later	Self-hostable low-code connector (DWP-09)	DWP-09	V3.0	Free	Infra only	EVALUATING	BE-2	Evaluate at DWP-09 build. Sustainable via License - license review required before deploy (BWR-18).
PerDarry	Consider later	Data warehouse integration (ANA-18)	ANA-18	V3.0	Per query / per storage	Usage	DEFERRED	BE-2	Defer to V3. Event-driven ETL from read models.
Authentik	Consider later	Self-hosted IdP with SAML, OIDC, LDAP proxy auth for enterprise SSO (AUTH-24, AUTH-25)	AUTH-24, AUTH-25	V3.0	Free (self-hosted)	Infra only	DEFERRED	BE-2	Adopt in V3 when enterprise tenants require SSO. Do NOT introduce in V1/V2 - wait until a pricing model demands it.
Plunk	Consider later	Self-hosted email platform for newsletters, marketing automation, drip sequences (NOT-14, CDM-06)	NOT-14, CDM-06	V3.0	Free (self-hosted)	Infra only	DEFERRED	BE-2	Adopt in V3 with CRM module. Not for transactional email - Postmark / Resend remain the choice.
Nango	Consider later	Integration platform with SDKs and built-in API connectors, unified data models, OAuth handling (SDK-01, SDK-04, SDK-08, SDK-11, SDK-12, SDK-13)	SDK-01, SDK-04, SDK-08, SDK-11, SDK-12, SDK-13	V3.0	Free (self-hosted)	Infra only	DEFERRED	BE-1	Evaluate in V3 when BPO SDK module lands. Elastic 2.0 license - verify commercial use terms.
Zenless	Consider later	Stripe-compatible API for stablecoin payments. No fees. Webhook support.	CHK-04, PAY-43	V2.0	Free	Free	DEFERRED	BE-2	Evaluate in V2/V3 as additional stablecoin rail. Regulatory review required.

MetaAPI	Must-integrate	Commercial	Proprietary	SaaS	Cloud (vendor)	Raw MTS Manager API integration	V1.0	BRG-01, BRG-02, BRG-05, BRG-07	Fastest path to MTS provisioning + sync without building Manager API	Broken	Open: coverage vs per-account cost	\$50-100/mo per active ad	Per active account	NOT STARTED	Shadab	Adapter interface BRG-01		
Veriff	Must-integrate	Commercial	Proprietary	SaaS	Cloud (vendor)	In-house identity verification engine	V1.0	KYC-01, KYC-02, KYC-08, KYC-07	Existing FunderUS contract carries over	Onfido, Sumsub, in-house OCR	No contract, or building is out of scope	Per verification	SIGNED	FunderUS/ COO	KYC adapter interface (KYC-01)			
Match2Pay	Must-integrate	Commercial	Proprietary	SaaS	Cloud (vendor)	Building a payment service provider	V1.0	CHK-04, CHK-06, CHK-07, CHK-08	Local card + wallet coverage for PKIN. Secondary local payment rail behind same interface	Interkassa, Stripe, Adyen	Stripe/Adyen do not cover PKIN well	Transaction fees	Per transaction	NOT STARTED	BE-2	PaymentProvider interface (CHK-04)		
Interkassa	Must-integrate	Commercial	Proprietary	SaaS	Cloud (vendor)	A second payment rail	V1.0	CHK-04, CHK-05	Match2Pay	Match2Pay	Single provider is a single point of failure	Transaction fees	Per transaction	NOT STARTED	BE-2	PaymentProvider interface (CHK-04)		
NOVPayments	Must-integrate	Commercial	Proprietary	SaaS	Cloud (vendor)	Building direct crypto integration	V1.0	CHK-04, CHK-05	Crypto rail with webhooks + auto-conversion.	Combase Commerce, direct exchange APIs	NOVPayments is faster to integrate	~1%	Per transaction	NOT STARTED	BE-2	PaymentProvider interface (CHK-04)		
Postmark	Must-integrate	Commercial	Proprietary	SaaS	Cloud (vendor)	Self-hosted SMTP server	V1.0	AUTH-05, NOT-03, NOT-04, NOT-05	Best transactional deliverability. Edge layer for every tenant domain — AWS CloudFront + AWS WAF, Cloud.	SendGrid, AWS SES	SES requires infrastructure work. SendGrid shaming issues	\$15/mo for 10k emails	Per email tier	NOT STARTED	BE-2	EmailProvider interface (NOT-03)		
Cloudflare	Must-integrate	Commercial	Proprietary	SaaS	Edge	Building a WAF / DDoS mitigation layer	V1.0	TEN-02, TEN-18, GW-01, GW-02, OPS-05	Tenant-specific object storage, zero egress fees.	AWS CloudFront + AWS WAF, Fastly	Cost + complexity vs Cloudflare free tier	Free tier sufficient	Freemium	NOT STARTED	DevOps	CDN/edge swap is non-breaking		
Cloudflare R2	Must-integrate	Commercial	Proprietary	SaaS	Cloud (vendor)	Running our own object storage	V1.0	TEN-18, DOC-06	AWS S3, Backblaze B2	AWS S3, Backblaze B2	Egress cost at \$3	Free for first 10GB	Per GB stored	NOT STARTED	DevOps	Storage interface (TEN-18)		
GitHub Actions	Must-integrate	Commercial	Proprietary	SaaS	Cloud (vendor)	Self-hosted Jenkins	V1.0	OPS-03, OPS-04, OPS-36	Native CI/CD with GitHub repos	GitLab CI, CircleCI	Repo already on GitHub	Free public / \$4/mo private	Per seat	SIGNED	DevOps	Pipelines are portable		
Sentry	Must-integrate	Commercial	Proprietary	SaaS	Cloud (vendor)	Building error aggregation in-house	V2.0	OPS-11	Error tracking with slack feeds for every service.	Rumple, Rollbar, self-hosted GRELTP, Bugsnag	Sentry free tier is sufficient in V1	Free tier / \$40k/mo	Freemium	NOT STARTED	DevOps	Sentry SDK swap is easy		
Hetzner	Must-integrate	Commercial	Proprietary	SaaS	Cloud (vendor)	AWS / GCP compute	V1.0	OPS-02, OPS-07, OPS-23	Best price-to-perf for a Compose stack. Primary DB, event log, command table, ledger, audit.	AWS EC2, GCP Compute, OVH, DigitalOcean	Cost at target scale	Per server	NOT STARTED	DevOps	Compose is portable			
PostgreSQL	Self-hosted	Open-source	PostgreSQL License		16 Self-hosted (Hetzner)	Managed Postgres	V1.0	EVT-01, EVT-08, EVT-20, LED-01 to 10	Cost + tenant isolation requirements	Managed RDS, Supabase, Neon	Cost + tenant isolation requirements	Free on Hetzner	Infra only	SELF-HOSTED	DevOps	Portable dump/restore		
Redis	Self-hosted	Open-source	RedisAL2 / BSDPLv1 (since 7.4) — v	latest stable	7.2 Self-hosted (Hetzner)	Building an in-memory queue	V1.0	AUTH-07, EVT-02, EVT-22, GW-05, OPS-01, OPS-02	Taken sessions, rate limiting, event relay via Streams	KeyDB, Dragonfly, Valkey	Redis Streams already proven; keep 7.2 under BSD license	Free on Hetzner	Infra only	SELF-HOSTED	DevOps	Interfaces AUTH-07 / GW-05 / EVT-02		Do NOT upgrade beyond 7.2 without a license review. NATS Jetstream (see row) is the V2 candidate when Redis Streams becomes a bottleneck. Do not introduce in V1.
Docker	Self-hosted	Open-source	Apache-2.0	latest stable	Self-hosted (Hetzner)	Manual process management	V1.0	OPS-01, OPS-02	Containerization for all services.	Podman	Compose ecosystem assumes Docker	Free	Infra only	SELF-HOSTED	DevOps	OCI images are portable		
Docker Compose	Self-hosted	Open-source	Apache-2.0	latest stable	Self-hosted (Hetzner)	Kubernetes	V1.0	OPS-02	Production orchestration for V1.	Kubernetes, Nomad, Swarm	Kubernetes is out of scope for V1	Free	Infra only	SELF-HOSTED	DevOps	Compose files are portable		
Puppeteer	Self-hosted	Open-source	Apache-2.0	latest stable	Self-hosted (Hetzner)	Paid PDF SaaS (DocRaptor, PDFMonkey)	V1.0	DOC-01	HTML-to-PDF for certificates.	DocRaptor, PDFMonkey, @react-pdf/renderer	Avoid paid dependencies	Free	Infra only	SELF-HOSTED	BE-2	Replaceable behind a render fn		templ-pdf file (see row) is a V2 candidate for lower memory footprint and faster cold starts.
Prisma	Self-hosted	Open-source	Apache-2.0	5.x	Self-hosted (bundled)	Handwritten migration scripts	V2.0	OPS-06	Declarative schema ORM accepted as a fallback per BVR-08. Onix ORM remains the primary choice.	Drizzle, TypeORM, raw SQL.	Drizzle is preferred for SQL. Rust control, faster cold starts, and smaller footprint. Prisma retained only as declarative-schema fallback per BVR-08.	Free	Free	SELF-HOSTED	DevOps, BE-1	SQL migrations remain		Drizzle ORM (Apache-2.0) is the preferred alternative — see Drizzle row. Prisma acceptable fallback, if the team prefers declarative schema.
SOPS + age	Self-hosted	Open-source	MPL-2.0 / BSD-3-Clause	latest stable	Self-hosted (bundled)	HashiCorp Vault	V1.0		Secrets at rest, injected at runtime via Compose	HashiCorp Vault, AWS Secrets Manager, Doppler	Vault is overkill for V1	Free	Free	SELF-HOSTED	DevOps	Re-encrypt with new tool		
ipinfo	Consider later	Commercial	Proprietary	SaaS	Cloud (vendor)	In-house IP enrichment	V2.0		IP tags for risk fingerprint capture.	MaxMind, IPinfo	MaxMind requires self-host DB. IPinfo is a per-request cost	Tier-based	Per request tier	EVALUATING	BE-3	Risk adapter		
FingerprintJS	Consider later	Commercial	Proprietary / BSL (open-core)	SaaS	Cloud (vendor)	In-house device fingerprinting	V2.0		Device overlap + fraud detection at fingerprint	Device fingerprinting	Deferred until volume justifies cost	Per request tier	Per request tier	DEFERRED	BE-2	Risk adapter		
DocuSign	Consider later	Commercial	Commercial	SaaS	Cloud (vendor)	In-house contract signature flow	V2.0	DOC-12	Legally binding funded account agreements (DOC-12)	Hellosign (Dropbox Sign)	Open — pick at DOC-12 build	Per envelope	Per envelope	REJECTED	BE-2	Document adapter		
Stripe Billing	Consider later	Commercial	Proprietary	SaaS	Cloud (vendor)	Building recurring invoicing engine	V2.0		Tenant billing subscriptions (BLI-07).	Stripe, Chargebee, in-house	Open — depends on tenant jurisdiction	Per transaction	Per transaction	EVALUATING	FunderUS/ COO	Billing adapter		
QuickBooks	Consider later	Commercial	Proprietary	SaaS	Cloud (vendor)	Building an accounting export	V2.0	LED-20	Sync ledger entries to accounting (LED-20).	Xero, NetSuite	Open — depends on the accountant	Per seat	Per seat	EVALUATING	FunderUS/ COO	CSV export path exists		
Avastara	Consider later	Commercial	Proprietary	SaaS	Cloud (vendor)	Building an accounting export	V2.0	LED-20	Alternate accounting sync (LED-20)	QuickBooks, NetSuite	Open — pick at LED-20 build	Per seat	Per seat	EVALUATING	FunderUS/ COO	CSV export path exists		
Audible	Consider later	Commercial	Proprietary	SaaS	Cloud (vendor)	Building a tax engine	V2.0		TaxJar, manual tax fields	TaxJar, manual tax fields	Open — depends on jurisdiction list	Per message	Per message	EVALUATING	BE-2	Tax adapter		
Twilio	Consider later	Commercial	Proprietary	SaaS	Cloud (vendor)	Building SMS infrastructure	V2.0	NOT-17	Community rate automation (CHT-07 / CRM-09)	MessageBird, Vonage	Churned in where the community stream is	Free	Free	DEFERRED	BE-2	Channel adapter (NOT-02)		
Discord API	Consider later	Commercial	Proprietary (ToS)	v10 API	Cloud (vendor)	Building community tooling	V2.0		Community rate automation (CHT-07 / CRM-09)	Telegram, in-app chat	Discord has the best option is also viable	Free	Free	EVALUATING	BE-2	Community adapter		
Zapier	Consider later	Commercial	Proprietary	SaaS	Cloud (vendor)	Building every integration	V2.0	DWP-09	Low-code connectors (DWP-09)	Make.com	Open — license review required before adoption	Per task	Per task	DEFERRED	BE-2	Webhook-based		
n/a	Consider later	Open-source	Sustainable Use License (fair code)	latest stable	Self-hosted	Zapier	V2.0	DWP-09	Self-hostable low-code connector (DWP-09)	Zapier, Make.com	Open — license review required before adoption	Free (self-hosted)	Infra only	EVALUATING	BE-2	Webhook-based		
BigQuery	Consider later	Commercial	Sustainable Use License (fair code)	latest stable	Cloud (vendor)	Building an analytics warehouse	V2.0	ANA-18	Data warehouse integration (ANA-18)	Bronze, ClickHouse, DuckDB	Deferred to V3	Per query / per storage	Usage	DEFERRED	BE-2	Event-driven ETL		
Kafka	Forbidden	Open-source	Apache-2.0	n/a	n/a	Redis Streams	n/a		Explicity out of scope in V1.	Redis Streams	Redis Streams is sufficient	n/a	n/a	DEFERRED	Tech Lead	n/a

Zendesk	Forbidden	Commercial	Proprietary	n/a	n/a	Support inbox (SUP module)	n/a		Third-party helpdesk out of scope in V1.	In-house Support Inbox	V1 ships a thin in-house inbox	n/a	n/a	DEFERRED	Support Owner	n/a		
WordPress	Forbidden	Open-source	GPL-2.0+	n/a	n/a	Website / CMS (CMS module)	n/a		External CMS is out of scope; hosted CMS is separate.	In-house CMS (V3)	V1 has no marketing site requirement	n/a	n/a	DEFERRED	Tech Lead	n/a		
Prometheus	Self-hosted	Open-source	Apache-2.0	latest stable	Self-hosted (Hetzner)	Commercial metrics (APM)	V2.0	OPS-10, OPS-12	Metric store for observability stack.	Datadog, New Relic	Commercial APM out of scope in V1	Free	Infra only	SELF-HOSTED	DevOps	Metrics adapter		Part of OPS-10 stack.
Outpost	Self-hosted	Open-source	AGPL-3.0	latest stable	Self-hosted (Hetzner)	Commercial dashboards	V2.0	OPS-10, OPS-12	Dashboard for metrics, logs, traces	Datadog, Grafana	Commercial APM out of scope	Free	Infra only	SELF-HOSTED	DevOps	Dashboard configs are portable		ADR — verify no distribution requirement before external use.
Loki	Self-hosted	Open-source	AGPL-3.0	latest stable	Self-hosted (Hetzner)	Commercial log aggregation	V2.0	OPS-10	Log aggregation paired with Grafana.	Elasticsearch, Datadog Logs	Log aggregation is out of scope	Free	Infra only	SELF-HOSTED	DevOps	Log format is portable		
Open Telemetry	Self-hosted	Open-source	Apache-2.0	latest stable	Self-hosted (bundled)	Vendor-specific tracing SDKs	V2.0	OPS-10	Vendor-neutral tracing and metrics SDK	Datadog APM, New Relic APM	Vendor lock-in	Free	Free	SELF-HOSTED	DevOps	Standard OTLP contract		
PyBouncer	Self-hosted	Open-source	ISC	latest stable	Self-hosted (Hetzner)	App-level connection pooling	V1.0	OPS-25	Postgres connection pooling.	PyBouncer, a simpler and proven	PyBouncer is simpler and proven	Free	Infra only	SELF-HOSTED	DevOps	Removable — direct DB connection		
Beiter Auth	Self-hosted	Open-source	MIT	latest stable	Self-hosted (bundled)	In-house auth foundation (registration, login, sessions, MFA, OAuth)	V1.0	AUTH-01, AUTH-02, AUTH-03, AUTH-04	TypeScript-first, framework-agnostic, self-hosted. Plugin architecture for multi-tenant organizations, roles, and custom permissions. No per-MAU pricing.	Clerk, SuperTokens, Auth0, AWS Cognito	Clerk: per-MAU cost at trader scale. Auth0/Cognito: already rejected. SuperTokens: viable fallback if faster Auth fails.	Free	Free	EVALUATING	BE-1	AuthProvider interface. Keep permission engine (AUTH-13) as our own layer.		Replaces the in-house auth foundation. Keep AUTH-13 permission engine as our own resource after layer on top.
Drizzle ORM	Self-hosted	Open-source	Apache-2.0	latest stable	Self-hosted (bundled)	Prisma ORM (declarative, heavy)	V1.0	OPS-06	SQL-first, minimal overhead, faster cold starts, smaller bundle. Generates pure SQL migrations so we control the SQL for expand-contract discipline.	Prisma, Kysely, TypeORM	Prisma is heavier and slower for edge/tenants. Drizzle gives more control over tenant-scoped queries (AUTH-15, TEN-03).	Free	Free	EVALUATING	BE-1, DevOps	SQL migrations are portable.		Preferred over Prisma for this project. See Prisma row notes for cross-reference.
Flipit	Self-hosted	Open-source	Apache-2.0	latest stable	Self-hosted (Hetzner)	LaunchDarkly / Braze feature flag tools	V2.0	TEN-10, CON-31	Git-native workflows, self-hosted, declarative flag files. No paid tiers. Needs fallback. TypeScript-native. Mature. Works with our existing Redis Streams.	Unleash, GrowthBook, LaunchDarkly	Unleash: open-core with paid advanced features. GrowthBook: experimentation-focused. LaunchDarkly: commercial only	Free	Infra only	EVALUATING	BE-2	Flag config as declarative YAML/JSON — portable.		Enables per-tenant flags (TEN-10) and platform-wide rollouts (CON-31).
Buinq	Self-hosted	Open-source	MIT	latest stable	Self-hosted (bundled)	Ad-hoc job scheduling in application code	V1.0	BRG-07, BRG-08, EVL-05, OPS-17, TEN-03	RedisQ, daqalogue, custom cron	RedisQ is generic. Charts is heavy. DQ is low-level. Lightweight Charts is the right tool for equiPaaS, visuals.	RedisQ is generic. Charts is heavy. DQ is low-level. Lightweight Charts is the right tool for equiPaaS, visuals.	Free	Free	EVALUATING	BE-1	Job definitions are code; swap without schema change.		Use for sync workers, reconciliation jobs, evaluation triggers, and scheduled reports.
TradingView Lightweight	Self-hosted	Open-source	Apache-2.0	latest stable	Client-side (bundled)	Custom D3 charting	V2.0	TD-08, TD-21	Purpose-built for financial charts: candlestick, equity curve, P&L. Tiny bundle (~100KB gzipped)	Recharts, ECharts, D3.js	Recharts is generic. Charts is heavy. DQ is low-level. Lightweight Charts is the right tool for equiPaaS, visuals.	Free	Free	EVALUATING	FE-1	Chart data format is standard; swap freely		Plan with Recharts for admin dashboard barline charts.
Resend	Consider later	Commercial	Proprietary	SaaS	Cloud (vendor)	Building an SMTP client	V1.0	NOT-03, NOT-04, NOT-05	Modern TypeScript SDK, native React Email integration, developer-first API. \$20/mo for 50k emails	Postmark, SendGrid, AWS SES	Postmark has better raw deliverability for password resets. Use Resend for development. Postmark for production.	\$20/mo for 50k emails	Per email tier	EVALUATING	BE-2	EmailProvider interface (NOT-03).		Recommended for development and non-critical transactional email. Postmark remains production choice for payout notifications.
NATS JetStream	Consider later	Open-source	Apache-2.0	latest stable	Self-hosted (Hetzner)	Redis Streams (when scale demands)	V2.0	EVT-02, EVT-06, EVT-20	Ultra-fast, subject-based routing. Lighter than Kafka.	Redis Streams (current), Apache Kafka, RabbitMQ	Redis Streams is sufficient for V1. NATS JetStream is a good upgrade when volume grows beyond 6-7. Kafka is out of scope by operational burden.	Free	Infra only	DEFERRED	BE-1	Event envelope (EVT-03) is transport-agnostic; consumers stay unchanged.		Plan for V2 when Redis Streams becomes the bottleneck. Do not introduce in V1.
Infracl	Consider later	Open-source	MIT	latest stable	Self-hosted (Hetzner)	SOPS + age (when team grows)	V2.0	OPS-09	Self-hosted secrets manager with UI, audit logs, dynamic secrets, and team management.	SOPS + age (current), HashiCorp Vault	Vault is overkill. Infracl is the middle ground for V2 when audit trails are needed.	Free	Infra only	DEFERRED	DevOps	Encrypted-at-rest export. Re-encrypt with new tool.		Only introduce in V2 when team size or compliance requires secret access audit trails.
templ-pdf file	Consider later	Open-source	MIT	latest stable	Self-hosted (bundled)	Puppeteer (heavier)	V2.0	DOC-01, DOC-13, DOC-14	7x faster cold start. PDF's 52.84% smaller, no Chromium download. Native color emoji.	Puppeteer (current), @react-pdf/renderer	Puppeteer is reliable and already registered. templ-pdf file is a lower-cost, no-Chromium download. Native color emoji.	Free	Free	EVALUATING	BE-2	Replaceable behind a render function.		Evaluate as drop-in replacement for Puppeteer in V2 for certificate and invoice generation.
Zoneless	Consider later	Open-source	MIT	latest stable	Cloud (self-serve)	Building a stateless payment integration	V2.0	CHK-04, PKY-43	Stripe-compatible API for database integration. No fees. Webhook support.	Direct exchange APIs, NOVPayments	Zoneless is stateless-only.Only.							

Tool	Category	Type	Licence	Version / Plan	Hosting	Replaces building	Serves releases	Serves Req IDs	Why this one	Alternatives considered	Why rejected	Est. cost	Cost model	Signup status	Owner	Exit path	ADR link	Notes		
Hook0	Self-hosted	Open-source	AGPL-3.0	latest stable	Self-hosted (Hetzner)	In-house webhook dispatch, retry, signing, delivery logs	V2.0	EVT-11, EVT-13, EVT-14, EVT-15	Purpose-built self-hosted webhook service. Handles retry with exponential backoff. HMAC signing, delivery logs, subscriber management and circuit breakers out of the box.	In-house webhook dispatch, See Convoxy	See is commercial. In-house build duplicates a solved problem. Hook0 is AGPL — verify distribution mode matches our use.	Free (self-hosted)	Infra only	EVALUATING	BE-1	Webhook contract is standard HTTP. Subscribers are portable.		Adopt in V2 when outboard tenant webhooks (EVT-11) land. This replaces EVT-13, EVT-14, EVT-15 in-house build effort.		
BullMQ Dashboard	Self-hosted	Open-source	MIT	latest stable	Self-hosted (bundled)	Building a custom job monitor UI	V2.0	OPS-17, CON-21	Official dashboard for BullMQ. Shows live queue metrics, job runs, retry state, and scheduler events. Once as an embeddable React component so it drops into the admin panel without building a custom observability UI.	Custom dashboard, Bull Board, Taskforce.sh	Custom dashboard to wheel reinvention. Bull Board is older. Taskforce.sh is the commercial hosted version of this same dashboard.	Free	Free	EVALUATING	BE-1	Read-only view over Redis, no lock-in.		Companion to BullMQ. Use for job and schedule observability (OPS-17, CON-21). No build effort required.		
Uptime Kuma	Self-hosted	Open-source	MIT	latest stable	Self-hosted (Hetzner)	Building an external uptime probe	V2.0	OPS-31	Self-hosted uptime monitoring with HTTP(S), TCP, ping, DNS, and push monitors. Alerts via Telegram, email, Slack, and webhooks. Runs independently of the platform so a total outage is self-detected.	UptimeRobot, Better Black, self-hosted custom cron	UptimeRobot is commercial. Custom cron is fragile and does not detect its own failure. Uptime Kuma is the standard self-hosted answer.	Free	Infra only	EVALUATING	DevOps	Monitors are portable config.		Adopt in V2 for external uptime monitoring (OPS-31). Serves the "total outage detected even when the platform itself is down" requirement.		
Comp AI	Consider-later	Open-source	AGPL-3.0	latest stable	Cloud or self-hosted	Building SOC 2 / ISO 27001 evidence collection in-house	V2.0	AUD-17, AUD-18	Open-source compliance automation. Automates evidence collection, policy generation, and continuous monitoring across SOC 2, ISO 27001, HIPAA, and GDPR. 580+ integrations for evidence sources. Eliminates the manual evidence hunt that blocks SOC 2 readiness.	Openlane, Vanta, Drata, in-house evidence pipeline	Vanta and Drata are commercial (~\$15k/yr). In-house evidence pipeline is a full build. Comp AI is the open-source equivalent.	Free (self-hosted)	Infra only	EVALUATING	BE-1	Evidence is exported to standard formats. Policies are documents.		Adopt in V2 when SOC 2 readiness becomes a sales requirement. Do not build evidence collection in-house.		
Openlane	Consider-later	Open-source	Apache-2.0	latest stable	Cloud or self-hosted	Building compliance automation and Trust Center in-house	V2.0	AUD-17	Developer-first platform for automated compliance, risk management, and Trust Center. Apache-2.0 license is more permissive than Comp AI/AGPL.	Comp AI, Vanta, Drata	Comp AI is AGPL. If license matters, Openlane is the permissive alternative with similar capability.	Free (self-hosted)	Infra only	EVALUATING	BE-1	Compliance data exports to CSV / JSON.		Evaluate alongside Comp AI in V2. Pick whichever fits the license model better.		
DocuSign	Consider-later	Open-source	AGPL-3.0	latest stable	Self-hosted (Hetzner)	Building an e-signature flow for funded account agreements	V2.0	DOC-12	Open-source e-signature platform. The DocuSign alternative. Self-hosted, legally binding, audit trail included. Eliminates per-employee pricing.	DocuSign, HelloSign, in-house signature flow	DocuSign and HelloSign are per-employee commercial. In-house build is out of scope. DocuSign is the open-source equivalent.	Free (self-hosted)	Infra only	EVALUATING	BE-2	Signed PDFs and audit trails are portable standard formats.		Adopt in V2 when DOC-12 (Contract e-signatures) lands. Responds the DocuSign/HelloSign choice already flagged in Tooling Register.		
UnKey	Consider-later	Open-source	AGPL-3.0	latest stable	Cloud or self-hosted	Building API key management, rate limiting, and usage analytics in-house	V2.0	AUTH-21, OW-16	Purpose-built API key management. Handles issuance, rotation, revocation, per-key rate limits, usage analytics, and scoped access. Serves the tenant API key lifecycle without in-house cryptography and rate limiting.	In-house API keys, Zuplo, Kong key auth	In-house build is error-prone for cryptographic keys. Kong is overkill. UnKey is the focused tool for this single problem.	Free (self-hosted)	Infra only	EVALUATING	BE-2	Keys are standards-compliant; verification is stateless.		Adopt in V2 when AUTH-21 (Tenant API keys) lands. Provides rate limiting and analytics for free.		
Logto	Consider-later	Open-source	MPL-2.0	latest stable	Cloud or self-hosted	Building a multi-tenant identity provider in-house	V2.0	AUTH-01, 43	Multi-tenant identity provider built for SaaS. Customizable sign experiences, comprehensive user management, role-based access control, and organisation support. Directly serves AUTH-13, AUTH-15, TEN-03.	Better Auth (current), Auth0, Zitiadl	Better Auth is more framework-agnostic and lighter. Logto is more opinionated with richer UI. Evaluate in V2 if Better Auth becomes limiting.	Free (self-hosted)	Infra only	EVALUATING	BE-1	Standard OAuth2 / OIDC. Users are portable.		Alternative to Better Auth for V2/V3. Evaluate only if Better Auth hits a wall on multi-tenant organisations or SCIM.		
Authentik	Consider-later	Open-source	MIT	latest stable	Self-hosted (Hetzner)	Building enterprise SSO (SAML / OIDC) in-house	V3.0	AUTH-24, AUTH-25	Comprehensive self-hosted identity provider with SAML, OIDC, LDAP, and proxy auth. MIT license. Serves AUTH-24 (SSO federation) and AUTH-25 (SCIM provisioning) when enterprise tenants need to bring corporate identity providers.	Keycloak, Zitiadl, Okta, Microsoft Entra	Keycloak is heavier. Zitiadl is Apache-2.0 but less established. Okta and Entra are commercial. Authentik is the leading self-hosted choice.	Free (self-hosted)	Infra only	DEFERRED	BE-2	SAML and OIDC are standard protocols. Users are portable.		Adopt in V3 when enterprise tenants require SSO. Do NOT introduce in V1/V2 — overkill until a paying tenant demands it.		
Plunk	Consider-later	Open-source	AGPL-3.0	latest stable	Self-hosted (Hetzner)	Building tenant marketing email and newsletter infrastructure	V3.0	CRM-06	Self-hosted email platform for newsletters, marketing automation, and drip sequences. Open-source Mailchimp alternative. Serves tenant marketing email when CRM module lands.	Mailchimp, SendGrid Marketing	Mailchimp is newsletter-only. Mailchimp and SendGrid Marketing are commercial. Plunk handles both transactional/adjacent and marketing in one self-hosted platform.	Free (self-hosted)	Infra only	DEFERRED	BE-2	Subscriber lists and templates are portable.		Adopt in V3 with the CRM module. Not for transactional email — Postmark / Resend remain the choice for those.		
Nango	Consider-later	Open-source	Elastic-2.0	latest stable	Cloud or self-hosted	Building pre-built API connectors for BYO Integration SDK	V3.0	SDK-01, SDK-04, SDK-08, SDK-11, 8, each integration.	Integration platform with 500+ pre-built API connectors, unified data models, and OAuth handling. Serves the BYO Integration SDK (SDK module) by providing pre-built connector infrastructure instead of hand-coding library.	Composio, in-house connector library	Composio is AI-agent focused. In-house connector library is a large build. Nango is the mature open-source integration platform.	Free (self-hosted)	Infra only	DEFERRED	BE-1	Connector definitions are declarative YAML/TypeScript.		Elastic-2.0 license — verify commercial use terms before adopting. Evaluate in V3 when BYO SDK module lands.		

Rule ID	Rule	Applies to	Enforced by	Notes						
BVR-01	Do not build an SMTP server or mail delivery. Use Postmark.	Any email send	Code review	Interface: NOT-03 EmailProvider						
BVR-02	Do not build a payment service provider or touch raw card data. Use hosted flows.	Checkout, refunds, tenant billing	Code review + PCI scope	Interface: CHK-04 PaymentProvider						
BVR-03	Do not build an identity verification engine. Use Veriff with manual fallback.	KYC	Code review	Interface: KYC-01 KYCProvider						
BVR-04	Do not build a broker Manager API client. Use MetaApi (or Brokeree) behind BRG-01.	MT5 provisioning, sync, enforcement	Code review	Interface: BRG-01 Broker capability						
BVR-05	Do not build a WAF, DDoS mitigation, or bot filter. Use Cloudflare at the edge.	All HTTP ingress	Architecture review	See OPS-15 + GW-20						
BVR-06	Do not build a secret manager. Use SOPS + age in V1.	All secrets	Code review	See OPS-09						
BVR-07	Do not build a PDF renderer. Use Puppeteer.	Certificates, receipts, statements	Code review	See DOC-01						
BVR-08	Do not build an ORM or handwritten migration runner. Use Drizzle ORM (Prisma is an acceptable fallback if the team prefers a declarative schema).	All DB migrations	Code review	See OPS-06. Drizzle is preferred for SQL-fluent control, faster cold starts, and smaller bundle. See Tooling Register Drizzle ORM and Prisma rows.						
BVR-09	Do not introduce a message broker other than Redis Streams in V1.	Events, queue, commands	Architecture review	Kafka, Redpanda, NATS are OUT OF SCOPE						
BVR-10	Do not introduce Kubernetes, Nomad, or Swarm in V1.	Orchestration	Architecture review	Docker Compose is the V1 source of truth						
BVR-11	Do not introduce a commercial APM (Datadog, New Relic).	Observability	Architecture review	Use Prometheus + Grafana + Loki + Sentry						
BVR-12	Do not introduce a standalone gateway (Kong, Traefik, AWS API Gateway).	Edge / routing	Architecture review	In-app middleware behind Cloudflare is the V1 contract						
BVR-13	Do not introduce a third analytics or BI tool in V1.	Reporting	Architecture review	Read models + fixed reports are the V1 contract						
BVR-14	Do not use a managed IdP (Auth0, Cognito). Use self-hosted Better Auth as the auth foundation, with our own AUTH-13 permission engine on top.	Auth & identity	Architecture review	See Tooling Register Better Auth row. Rationale: per-MAU cost at trader scale plus custom tenant RBAC make a managed IdP a poor fit. Keep AUTH-13 as our own resource.action layer.						
BVR-15	Any new third-party dependency must be added to the Tooling Register before the PR is merged.	All PRs that add a dependency	Code review	Tooling Register is the single source of truth						
BVR-16	Every external integration must sit behind a defined interface (adapter).	Payments, KYC, broker, email, storage, tax	Code review	So the tool can be swapped without touching domain code						
BVR-17	Before upgrading Redis beyond 7.2, run a licence review.	Redis version	Change request	Redis 7.4+ changed to RSALV2/SSPLv1						
BVR-18	No self-hosted fair-code tools without a licence review (n8n, Sentry self-host, etc.).	Any fair-code / source-available dependency	Change request	Default: prefer MIT, Apache-2.0, BSD, MPL-2.0, PostgreSQL License						
BVR-19	Do not build a job queue or scheduler. Use BullMQ.	BRG-07, BRG-08, EVL-05, OPS-17, OPS-27	Code review	See Tooling Register BullMQ row. Redis-backed, TypeScript-native. Use for sync workers, reconciliation jobs, evaluation triggers, and scheduled reports. Dashboard in BVR-25.						
BVR-20	Do not build a feature flag system. Use Flipt.	TEN-10, CON-31	Code review	See Tooling Register Flipt row. Git-native workflows, self-hosted, declarative flag files. Serves per-tenant flags and platform-wide rollouts.						
BVR-21	Do not build a secrets manager with UI or audit trails in V1. Use SOPS + age. Infisical is the V2 upgrade path.	OPS-09	Change request	See Tooling Register SOPS + age and Infisical rows. SOPS is sufficient for V1. Infisical is only introduced when secret access audit trails are required.						
BVR-22	Do not build an in-house consent banner or cookie gating layer. Use c15t in self-hosted mode.	Trader portal, admin panel, tenant marketing	Code review	Multi-tenant policy resolution is our integration work. See Tooling Register c15t row. Not needed in V1.						
BVR-23	Do not build a policy decision point for RBAC. Evaluate Cerbos before writing authorisation logic in AUTH-13.	AUTH-13 permission engine, AUTH-14 custo	Architecture review	See Tooling Register Cerbos row. Cerbos status is EVALUATE. If adopted, AUTH-13 becomes a client of Cerbos. If rejected, build in-house.						
BVR-24	Do not build in-house webhook dispatch, retry, signing, or delivery logs. Use Hook0.	EVT-11, EVT-13, EVT-14, EVT-15	Code review	See Tooling Register Hook0 row. Emit events; Hook0 handles subscriber management, retries, and delivery logs.						
BVR-25	Use BullMQ Dashboard for job observability. Do not build a custom job monitor UI.	OPS-17, CON-21	Code review	See Tooling Register BullMQ Dashboard row. Ships as an embeddable React component.						
BVR-26	Do not build SOC 2 / ISO 27001 evidence collection in-house. Use Comp AI or Openlane.	AUD-17, AUD-18	Compliance review	See Tooling Register Comp AI and Openlane rows. Both are open-source alternatives to Vanta and Drata.						
BVR-27	Do not build e-signature. Use Docuemento.	DOC-12	Code review	See Tooling Register Docuemento row. Open-source alternative to DocuSign and HelloSign.						
BVR-28	Own rule semantics, rule versions, metric definitions, breach decisions, account sta	EVL, LCC, BRG, AUD modules	Architecture review	Do not make a proprietary vendor the final authority for account breach. Vendors sit underneath the Broker Adapter (BRG-01). Complements BVR-01 through BVR-27.

Do we ship Google OAuth in V1 or defer all social login?	Tech Lead	Tech Lead	Kickoff +2 days	Open	
What are the access token and refresh token lifetimes and rotation rules?	BE-1	BE-1	Kickoff +3 days	Open	
Do migrated TTS traders get a forced password reset at cutover or a reset-email flow?	Tech Lead	Tech Lead	Before migration plan	Open	
Do we store API keys and secrets in Postgres or an external secrets manager in V1?	BE-1	DevOps owner	Kickoff +3 days	Answered – SOPS + age per BVR-06 / BVR-21. External manager (Infisical) deferred to V2.	
Does any V1 tenant require SSO or SAML, which would pull it into V1 scope?	Tech Lead	Sales owner (unassigned)	Kickoff +5 days	Open	
Do we allow super admin impersonation of tenant admins for support, and under what audit rules?	Tech Lead	Tech Lead	Kickoff +5 days	Open	
Tenant Management					
Confirm V1 isolation model: shared schema with tenant_id column, not schema-per-tenant.	Tech Lead	Tech Lead, BE-1	Kickoff +3 days	Answered – Yes. Shared schema with tenant_id per Out Of Scope → Tenant Management.	
Custom domain SSL in V1: manual via Cloudflare for SaaS, or automated certificate provisioning?	DevOps	DevOps owner	Kickoff +3 days	Open	
Who may edit the terminology map: tenant admin or super admin only?	Tech Lead	Tech Lead	Kickoff +2 days	Open	
Impersonation consent model: in-product consent per session or contract-level permission?	Tech Lead	Tech Lead, Legal	Kickoff +5 days	Open	
Which secrets store: external manager or encrypted columns in Postgres for V1?	BE-1	DevOps owner	Kickoff +3 days	Answered – SOPS + age per BVR-06 / BVR-21.	
What happens to existing data when a module entitlement is disabled, for example affiliate commissions after affiliate is turned off?	BE-2	Tech Lead, BE-2	Kickoff +5 days	Open	
Do we support multiple brands or sub-tenants under one firm in V1? Expected answer is no.	Tech Lead	Tech Lead	Kickoff +2 days	Open	
Event Bus & Webhooks					
Do outbound tenant webhooks ship in V1 or immediately after MVP, given FunderBlu does not need them?	Tech Lead	Tech Lead	Kickoff +3 days	Open	
Redis Streams retention: what max stream length and retention window do we configure for V1?	DevOps	DevOps owner	Kickoff +3 days	Open	
Event log retention period for replay: 90 days, 1 year, or permanent archive to object storage?	BE-2	DevOps owner	Kickoff +5 days	Open	
Who approves event schema changes and version bumps to prevent contract drift between modules?	Tech Lead	Tech Lead	Kickoff +2 days	Open	
Is the outbox relay a separate process or a background worker inside the API binary for V1? Recommended: separate process.	BE-1	BE-1	Kickoff +3 days	Open	
Do any V1 flows require stronger than at-least-once delivery plus idempotent consumers? Expected answer is no.	BE-1	Tech Lead	Kickoff +5 days	Open	
API Gateway					
Confirm V1 gateway is in-app middleware behind Cloudflare, not a standalone Kong or Traefik deployment.	Tech Lead	Tech Lead, DevOps	Kickoff +2 days	Answered – Yes. In-app middleware behind Cloudflare per BVR-12 and Out Of Scope.	
What are the default rate limits per route group for trader, admin, and webhook traffic?	BE-1	BE-1	Kickoff +3 days	Open	
Do per-tenant quotas ship in V1 or only after the second paying tenant? Expected: after.	Tech Lead	Tech Lead	Kickoff +3 days	Open	
Versioning strategy: URL versioning only, or also header-based negotiation? Recommended: URL only.	BE-1	BE-1	Kickoff +3 days	Open	

		Do we expose a public tenant API in V1 or only inbound and outbound webhooks? Ties to the EVT-11 question.	Tech Lead	Tech Lead	Kickoff +5 days	Open								
		Who defines and reviews the PII exclusion list for request logs?	Tech Lead	Tech Lead, DevOps	Kickoff +5 days	Open								
		DevOps & Deployment												
		Secrets store for V1: SOPS with age in repo, Vault, or encrypted env injection on hosts?	DevOps	DevOps owner	Kickoff +3 days	Answered – SOPS + age per BVR-06 / BVR-21.								
		What trigger moves us from Compose to Kubernetes: service count, tenant count, or multi-region? Recommended: none of these in year one.	Tech Lead	Tech Lead, DevOps	Kickoff +5 days	Open								
		Backup retention period and off-host copy destination, for example a Hetzner Storage Box?	DevOps	DevOps owner	Kickoff +3 days	Open								
		On-call rotation and alert channel for a 4 to 5 person team: which Telegram group or phone tree?	Tech Lead	Tech Lead	Kickoff +5 days	Open								
		Staging data: synthetic only, or anonymized production copies, and what are the anonymization rules?	Tech Lead	Tech Lead, DevOps	Kickoff +5 days	Open								
		Do we need a bastion or VPN for production access in V1, or is keyed SSH with fail2ban sufficient?	DevOps	DevOps owner	Kickoff +3 days	Open								
		What RPO and RTO does the business accept, for example RPO 15 minutes and RTO 4 hours?	Tech Lead	Tech Lead, FunderBlu COO	Before cutover plan	Open								
		PgBouncer in front of Postgres or application-level pooling only? Recommended: PgBouncer.	DevOps	DevOps owner	Kickoff +5 days	Open								
		V1 database strategy: single instance with rehearsed restore inside RTO, or warm standby from day one? Recommended: single instance plus drills.	Tech Lead	DevOps owner	Kickoff +5 days	Open								
		What are the load test target numbers: concurrent trader sessions, sync batch size, payout burst volume?	Tech Lead	Tech Lead, BE-1	Before Phase 2	Open								
		Is synthetic-only staging data approved, meaning no production PII ever lands in staging? Recommended: yes.	Tech Lead	Tech Lead	Kickoff +5 days	Open								
		Trading Platform Bridge												
		MetaApi or Brokerage for MT5? Decision criteria: provisioning API coverage, price per account, sandbox quality, support response.	Tech Lead	BE-1, Shadab	Week 2	Open								
		Does the broker contract grant API rights for account creation, disable, enable, close all, group assignment, and password reset, or are some manual in broker manager? If manual, enforcement and provisioning designs degrade.	Tech Lead	Shadab	Before Phase 2 starts	Open								
		What is the default sync interval per tenant and the minimum safe interval given vendor rate limits?	BE-1	BE-1	Kickoff +5 days	Open								
		Daily drawdown reset follows broker server time or a tenant-configured timezone?	Tech Lead	Tech Lead	Kickoff +5 days	Open								
		Which MT5 groups map to which phases, and who creates those groups at the broker, broker ops or API?	BE-1	BE-1, Shadab	Before Phase 2 starts	Open								
		Do we store trader terminal passwords in our database or delegate password generation and delivery to the vendor? Needs a security review.	Tech Lead	BE-1, Tech Lead	Kickoff +7 days	Open								
		If the broker does not offer MatchTrader, is cTrader the fallback second platform for V1?	Tech Lead	Shadab	Week 4	Open								
		Can broker groups be created by API, or does broker ops create them manually per request?	Tech Lead	Shadab, BE-1	Before Phase 2 starts	Open								
		Default sync interval per account phase: same interval for evaluation and funded, or faster for funded?	Tech Lead	BE-1, Funderblu Risk Owner	Kickoff +5 days	Open								
		Investor password: delivered by default in the credential email or only on request?	Tech Lead	DevOps	Kickoff +5 days	Open								
		Enforcement retry policy: max attempts, backoff ceiling, and escalation SLA for ops response.	BE-1	BE-1, Tech Lead	Kickoff +5 days	Open								
		At what active account count does MetaApi per-account pricing become more expensive than Brokerage or self-hosted alternatives?	Tech Lead	FunderBlu COO	Week 4	Open								
		Maximum tolerable sync outage before we alert traders or pause provisioning?	Tech Lead	Tech Lead, Funderblu Risk Owner	Kickoff +7 days	Open								
		Evaluation Engine												
		Daily drawdown reset follows broker server midnight or a tenant-configured reset time?	Tech Lead	Funderblu Risk Owner, Tech Lead	Kickoff +5 days	Open								
		What is the default basis, equity or balance, for daily and max drawdown across FunderBlu products?	Tech Lead	Funderblu Risk Owner	Kickoff +5 days	Open								
		Which rules are hard breach versus soft breach by default in V1 product configs?	Tech Lead	Funderblu Risk Owner	Kickoff +7 days	Open								
		Does auto-pass apply to the final evaluation phase or does live verification always require manual review, as TTS defaulted?	Tech Lead	Funderblu Ops Owner	Kickoff +7 days	Open								
		Is the consistency rule evaluated only at payout request or continuously on funded accounts?	BE-1	Tech Lead, Funderblu Risk Owner	Kickoff +7 days	Open								

		News calendar source in V1: manually maintained internal calendar or an external feed provider?	Tech Lead	Tech Lead	Week 6	Open							
		Do we support per-instrument rule sets in V1 or only global per-phase rules plus restricted symbol flags? Expected: global only.	BE-1	Tech Lead	Kickoff +7 days	Open							
		Account Lifecycle											
		Is AWAITING_ACTIVATION a separate state or a flag on PASS_PENDING? Separate state recommended for clarity.	BE-1	BE-1, Tech Lead	Kickoff +5 days	Open							
		Which challenges get free retakes, how many, and is that configured per challenge or per tenant?	Tech Lead	Funderblu Product Owner	Kickoff +7 days	Open							
		On suspension with open positions: disable trading only, or close positions as well?	Tech Lead	Funderblu Risk Owner	Kickoff +7 days	Open							
		How long do terminal accounts stay hot before archive, for example 12 months?	BE-2	Tech Lead, DevOps	Kickoff +7 days	Open							
		Which TTS account states map to which new states, and do imported accounts keep original rule versions or bind to new versions?	Tech Lead	Tech Lead, BE-1	Before migration plan	Open							
		Do giveaway and partner accounts skip payout eligibility rules or use custom payout terms?	Tech Lead	Funderblu Ops Owner	Kickoff +7 days	Open							
		Credential delivery channels: portal only, email only, or both, and do we issue a read-only investor password?	Tech Lead	Tech Lead, Funderblu Ops Owner	Kickoff +7 days	Open							
		Checkout & Billing											
		Which providers are confirmed for V1 launch: Match2Pay, Interkasa, and which crypto rail exactly?	Tech Lead	FunderBlu COO	Week 2	Open							
		During migration parallel run, does FunderBlu keep its current external checkout and cut over per cohort, or switch all at once?	Tech Lead	Tech Lead, FunderBlu COO	Before migration plan	Open							
		Coupon stacking rules: one coupon per order, and can affiliate coupons combine with promo coupons?	Tech Lead	Funderblu Marketing Owner	Kickoff +7 days	Open							
		Final V1 add-on list: reset, swap-free, and time extension only, or more?	Tech Lead	Funderblu Product Owner	Kickoff +7 days	Open							
		Refund policy window and approval role: COO only or a finance role as well?	Tech Lead	FunderBlu COO	Kickoff +7 days	Open							
		Login-first checkout or guest checkout with quick signup? Recommended: login-first with fast signup.	FE-1	Tech Lead, FE-01	Kickoff +5 days	Open							
		How many network confirmations for crypto payments before provisioning starts?	BE-2	BE-2, FunderBlu COO	Kickoff +7 days	Open							
		Payout System											
		Which payout rails and networks are confirmed for V1: which crypto networks such as TRC20 or ERC20, and which fiat rail?	Tech Lead	FunderBlu COO	Week 2	Open							
		Are partial payouts allowed by default across FunderBlu products, and what are the min and max thresholds per challenge?	Tech Lead	Funderblu Product Owner, Funderblu Risk Owner	Kickoff +7 days	Open							
		Is auto-approve ever enabled in V1 or is approval manual only at launch? Recommended: manual at launch.	Tech Lead	FunderBlu COO	Kickoff +7 days	Open							
		What is the second approval threshold amount for V1?	Tech Lead	FunderBlu COO	Kickoff +7 days	Open							
		Post-payout balance handling: keep the remainder or reset to initial after a full payout?	Tech Lead	Funderblu Risk Owner	Kickoff +7 days	Open							
		What are the payout frequency defaults per product: bi-weekly, monthly, or on-demand?	Tech Lead	Funderblu Product Owner	Kickoff +7 days	Open							
		Do affiliate commissions flow through this payout engine in V1? Expected: no, affiliate module is deferred.	Tech Lead	Tech Lead	Kickoff +5 days	Open							
		KYC / Verification											
		Does FunderBlu's Veriff contract include webhook endpoints or only polling? This affects KYC-05 implementation.	Tech Lead	FunderBlu COO, Veriff account manager	Week 4	Open							
		What KYC verification level does each FunderBlu challenge type require at migration? Map each challenge to basic, enhanced, or skipped.	Tech Lead	Funderblu Ops Owner	Kickoff +7 days	Open							
		Do we require proof of address in V1 or only ID plus liveness as Veriff defaults?	Tech Lead	Funderblu Risk Owner	Kickoff +7 days	Open							
		What is the restricted country list for V1, and does it apply at registration, at KYC, or both?	Tech Lead	Funderblu Risk Owner, Legal	Kickoff +10 days	Open							
		Which role can approve KYC manually in the fallback path, and does it require dual control?	Tech Lead	FunderBlu COO	Kickoff +7 days	Open							
		How many resubmission attempts are allowed before final rejection?	Tech Lead	Funderblu Ops Owner	Kickoff +7 days	Open							
		Do we store only Veriff media references, or also cache documents in our object storage for manual cases? Recommended: manual cases only.	Tech Lead	Tech Lead	Kickoff +5 days	Open							

		What is the KYC document retention period required by FunderBlu's jurisdiction? This determines KYC-31 configuration.	Tech Lead	Legal	Week 16	Open							
		Does FunderBlu require proof of address for all challenges or only funded accounts? This affects KYC-28 configuration.	Tech Lead	Legal	Week 14	Open							
		What is the acceptable SLA for manual KYC review? Current target is 4 hours but confirm with operations.	Tech Lead	FunderBlu COO	Week 16	Open							
		Do we need KYC re-verification on an annual cycle or only on document expiry?	Tech Lead	FunderBlu COO	Week 16	Open							
		What happens to KYC data when a trader account is terminated? Immediate deletion, retention period, or anonymization?	Tech Lead	FunderBlu COO	Week 16	Open							
		Does FunderBlu require selfie/liveness for all KYC levels or only enhanced? This affects Veriff configuration.	Tech Lead	FunderBlu COO	Week 14	Open							
		What is the maximum number of KYC resubmission attempts before the trader must contact support?	Tech Lead	FunderBlu COO	Week 14	Open							
		Do we need to support KYC for traders who registered before the KYC module was live (migration backfill)?	Tech Lead	Tech Lead	Week 14	Open							
		Notification Service											
		Which email provider for V1: Postmark, SendGrid, or AWS SES? Postmark recommended for deliverability.	Tech Lead	Tech Lead, DevOps	Kickoff +3 days	Answered — Postmark (production) per Tooling Register / Integration Map. Resend is dev/non-critical backup.							
		Who designs and provides the HTML/CSS for the 10 core email templates?	Tech Lead	FunderBlu marketing/design	Week 4	Open							
		Do we need SMS notifications in V1? Recommended: no, email and in-app only.	Tech Lead	Tech Lead	Kickoff +3 days	Open							
		How do we handle email bounces: suppress immediately, or allow manual override by support?	Tech Lead	Support Owner, Tech Lead	Kickoff +5 days	Open							
		Telegram bot hosting: run as a separate worker in our Hetzner stack or use a managed bot service? Recommended: separate worker.	DevOps	DevOps owner	Kickoff +3 days	Open							
		Do broadcasts respect user notification preferences, or do they override them for critical system announcements?	Tech Lead	Tech Lead	Kickoff +5 days	Open							
		Document Generation											
		Which HTML-to-PDF library to use? Puppeteer/Playwright is heavy. Consider `@react-pdf/renderer` or a lightweight Node library.	Tech Lead	BE-2	Kickoff +3 days	Answered — Puppeteer per BVR-07. html-pdf-lite is a V2 lower-footprint candidate.							
		Do we need a visual drag-and-drop template designer in V1? Recommended: No, use hardcoded templates with JSON config for variables.	Tech Lead	Tech Lead	Kickoff +3 days	Open							
		What are the exact V1 certificate types? Recommended: Challenge Passed, Funded Trader, Payout Receipt.	Tech Lead	FunderBlu Product Owner	Kickoff +5 days	Open							
		Do we need a QR code on the certificate for external verification in V1? Recommended: No, unique ID is enough for V1.	Tech Lead	Tech Lead	Kickoff +5 days	Open							
		Trader Dashboard											
		What is the default polling interval for dashboard data: 30 seconds or 60 seconds?	FE-1	BE-1, FE-01	Kickoff +5 days	Open							
		Does the trader portal include marketing and pricing pages in V1, or does the tenant's external website handle marketing and link into checkout? Recommended: external site links in.	Tech Lead	Tech Lead, FunderBlu marketing/design	Kickoff +5 days	Open							
		Single theme per tenant or a user-toggleable dark and light mode in V1? Recommended: tenant theme only.	FE-1	FE-01	Kickoff +3 days	Open							
		What columns and row limits apply to trade history CSV export?	FE-1	BE-1, FE-01	Kickoff +7 days	Open							
		Which chart library for the equity curve: Recharts or TradingView Lightweight Charts?	FE-1	FE-01	Kickoff +5 days	Answered — TradingView Lightweight Charts for equity/P&L; Recharts for admin bar/line charts. See Tooling Register.							
		Which terminology strings does FunderBlu want customized at launch, for example challenge versus evaluation?	Tech Lead	FunderBlu marketing/design	Week 4	Open							
		Admin Panel											
		Which default roles ship in V1, for example admin, finance, risk, support, and marketing, and what permission subsets do they carry?	Tech Lead	Tech Lead, FunderBlu COO	Kickoff +7 days	Open							
		Does the account detail include device activity and IP events in V1, or only after the risk detectors land in Phase 4?	Tech Lead	Tech Lead	Kickoff +7 days	Open							
		Which reports map to the first read models: daily, monthly financial, challenge versus payout, country payout, top earners?	Tech Lead	FunderBlu COO, Tech Lead	Week 4	Open							
		Confirm masking policy: no staff role can view raw trader trading passwords, only trigger a resend.	Tech Lead	Tech Lead	Kickoff +5 days	Open							

		Email template editor in V1: text and variables only with locked layout, or full HTML? Recommended: text and variables only.	FE-1	Tech Lead	Kickoff +7 days	Open							
		Bulk operation guardrails: maximum selection size and mandatory confirmation step?	FE-1	Tech Lead	Kickoff +7 days	Open							
		Risk Management											
		Confirm the V1 detector set: IP overlap, device overlap, copy, inverse, and KYC reuse in V1, with payment reuse at P2.	Tech Lead	Tech Lead, Funderblu Risk Owner	Kickoff +7 days	Open							
		What open and close time delta and symbol match window counts as correlated for the copy detector in V1?	BE-2	BE-2, Funderblu Risk Owner	Week 20	Open							
		What score thresholds auto-open a case per signal type, versus info-only signals?	BE-2	Funderblu Risk Owner	Week 20	Open							
		Does an open case block new challenge purchases as well as payouts? Recommended: payouts only in V1.	Tech Lead	Funderblu Risk Owner	Kickoff +7 days	Open							
		Device fingerprinting in V1: ipinfo flags only, or add FingerprintJS now? Recommended: ipinfo now, FingerprintJS when volume justifies cost.	Tech Lead	Tech Lead	Kickoff +5 days	Open							
		Who owns the risk staff role definition and the case review SLA, for example review within 24 hours?	Tech Lead	FunderBlu COO	Kickoff +7 days	Open							
		What is the retention period for signals and device logs?	BE-2	Tech Lead, DevOps	Kickoff +7 days	Open							
		Analytics & BI											
		Confirm the exact V1 report list against the reports FunderBlu uses today in TTS: which of the eleven risk tabs map into V1?	Tech Lead	FunderBlu COO	Week 4	Open							
		What timezone defines the daily and monthly cutoff for aggregates: tenant timezone or UTC?	BE-2	Tech Lead, FunderBlu COO	Kickoff +7 days	Open							
		Do we expose a report API to tenants for their own BI tools in V1? Recommended: no, CSV export only.	Tech Lead	Tech Lead	Kickoff +7 days	Open							
		What is the read model rebuild procedure if a read model corrupts: full replay from the event log, and how long must that take?	BE-2	BE-2, DevOps	Week 20	Open							
		Which roles receive financial reports by default, and does the support role see any analytics at all?	BE-2	FunderBlu COO	Kickoff +7 days	Open							
		Which of TTS's report tabs must be reproduced at cutover, and which can wait? This gates cutover.	Tech Lead	FunderBlu COO	Before Phase 3	Open							
		What is the business definition of an active account and a pass? These definitions must be pinned before any KPI is trusted.	Tech Lead	FunderBlu COO	Before Phase 3	Open							
		Is reporting day boundary in tenant timezone or UTC?	Tech Lead	FunderBlu COO	Before Phase 3	Open							
		Is nightly batch freshness acceptable for all reports, or do any reports need near-real-time?	Tech Lead	FunderBlu COO	Before Phase 3	Open							
		How far back must trend data be retained for trend views?	Tech Lead	Tech Lead, DevOps	Before Phase 4	Open							
		Affiliate System											
		Does FunderBlu migrate its existing affiliate program at cutover, or keep it running externally until Phase 4 lands? This changes the migration plan.	Tech Lead	FunderBlu COO, Tech Lead	Before migration plan	Open							
		Commission basis in V1: first order only, or every order from a referred trader?	Tech Lead	FunderBlu COO, FunderBlu marketing/design	Week 20	Open							
		What refund window length gates commission approval, for example 14 days?	Tech Lead	FunderBlu COO	Week 20	Open							
		What is the minimum payout threshold and which payout rails do affiliates use, same as traders or separate?	Tech Lead	FunderBlu COO	Week 20	Open							
		Does FunderBlu's current program use tiered or multi-tier commissions? If yes, V1 scope must change.	Tech Lead	FunderBlu marketing/design	Week 20	Open							
		What cookie duration applies by default, for example 30 days?	Tech Lead	FunderBlu marketing/design	Week 20	Open							
		Can a trader also be an affiliate, and is self-purchase through own link blocked outright or flagged for review?	Tech Lead	FunderBlu COO	Week 20	Open							
		CRM & Communications											
		Which automated sequences are must-have at launch for FunderBlu: welcome, cart abandonment, retry reminder, or re-engagement?	Tech Lead	Funderblu Marketing Owner	Week 20	Open							
		Should segments be able to exclude traders with open risk cases from campaigns? Recommended: yes, by default.	Tech Lead	Funderblu Risk Owner, Funderblu Marketing Owner	Week 20	Open							
		Who writes and owns the marketing copy for sequences and campaigns?	Tech Lead	Funderblu Marketing Owner	Week 20	Open							
		Do we need explicit marketing consent capture at registration for EU traders in V1, or is consent implied by terms acceptance?	Tech Lead	Tech Lead, Legal	Week 20	Open							

		Is the developer portal public before we have external tenants? Recommended: private beta docs for design partners, public at the second tenant.	Tech Lead	Sales owner (unassigned), Funderblu Product Owner	Before build trigger	Open						
		Do we monetize API access separately from plans with per-call pricing, or include quotas in tiers only? Ties into tenant billing.	Tech Lead	CEO, FunderBlu COO	Before build trigger	Open						
		Which API products ship first: read-only reports, webhooks, or account management?	Tech Lead	Funderblu Product Owner	Before build trigger	Open						
		Does partner-delegated access ship in the first iteration, or do we start with tenant-owned keys only?	Tech Lead	Tech Lead	Before build trigger	Open						
		Is GraphQL real demand or speculation? Recommended: defer until two tenants explicitly request it.	Tech Lead	Tech Lead	Before build trigger	Open						
		Who owns portal content, guides, and tutorials, and what keeps them current across releases?	Tech Lead	Funderblu Product Owner, Tech Lead	Before build trigger	Open						
		Status page: build a minimal internal one or use an external provider such as Instatus? Recommended: external provider at launch.	DevOps	DevOps owner	Before build trigger	Open						

Tax documents (W-8BEN, 1099, VAT invoices).		Leaderboards, competitions, and badges. Deferred with the competition module.	In-panel visual certificate designer.	Internal trade copier from funded accounts to live market accounts.
Multi-language certificates in V1. English only.		Economic calendar and news feed widgets.	Full CRM with sales pipeline and lead management. Deferred to M11.	Toxicity scoring and machine learning based anomaly detection.
Physical printing and mailing of certificates.		Trade journal and advanced analytics.	Live chat with traders inside the admin. The support inbox is ticket and Telegram based in V1.	Real-time tick-level exposure monitoring. V1 works from synced positions in batch.
Watermarking or complex DRM on PDFs.		Multi-language UI in V1.	Field-level permissions beyond route and action permissions.	Latency arbitrage and high-frequency trading detection, which require tick data.
		User-toggable dark and light mode. V1 ships the tenant theme only.	White-labeling the admin panel beyond branding tokens: logo, colors, and terminology.	Martingale and grid strategy detection.
		Affiliate and referral pages. Deferred with the affiliate module.	A mobile admin app.	Graph network analysis beyond pair-level correlation.
		Social features and public trader profiles.	Embedded third-party BI dashboards such as Metabase or Looker in V1.	Chargeback fraud scoring beyond the payment reuse signal.
			Full helpdesk suite features such as macros, knowledge base, and auto-assignment rules. The thin account-tied inbox ships in Phase 4; the suite arrives later.	
		WebSocket real-time streaming in V1. Polling with visible freshness timestamps is the contract.		Selling risk data or scores to external consumers.
Analytics & BI		Affiliate System	CRM & Communications	Audit & Compliance
Custom drag-and-drop report builder with arbitrary dimensions.		Multi-tier and MLM style sub-affiliate commissions in V1.	Full B2B sales pipeline and lead scoring. External CRM tooling stays external for platform sales.	Automated regulatory reporting packs and regulator filings.
Data warehouse such as ClickHouse or BigQuery and ETL pipelines in V1.		Tiered volume-based commission auto-progression. V1 supports manual per-affiliate overrides only.	Live chat widgets and third-party chat integrations such as Intercom or Crisp in V1.	Streaming audit into an external SIEM in V1. Export only.
Embedded third-party BI tools such as Metabase or Looker in V1.		Lifetime recurring commissions beyond the configured per-order rules.	SMS and WhatsApp channels. Deferred with the notification channel expansion.	A self-serve data subject request portal for traders. V1 is manual export by the compliance owner.
Real-time streaming dashboards. Event-driven read models plus nightly batch is the contract.		Automated affiliate payout execution. V1 records manual execution with full audit.	AI-generated content and send-time optimization.	Court-ready forensic tooling beyond the replay chain and exports.
Machine learning forecasting and lifetime value prediction.		A standalone affiliate portal on its own domain. V1 lives as an affiliate section inside the trader portal.	A/B testing of campaigns and subject lines.	Cross-tenant analytics or anomaly detection on staff behavior.
Cross-tenant benchmarking reports for the platform console.		Click fraud detection beyond self-referral and basic velocity checks.	Web push notifications.	Blockchain or third-party notarization of audit records.
			Call center integration and call logging.	Automatic PII redaction inside audit payloads. V1 minimizes PII in payloads by design; redaction tooling arrives with anonymization.
Public or shareable report links outside the admin panel.		Mobile install and deep-link attribution.	Predictive churn scoring and machine learning based segmentation.	
GMA, pivot, and marketing analytics integrations. Attribution capture already exists in checkout; marketing tooling stays external in V1.		Affiliate tax document generation.		
		Real-time click streaming analytics. Daily batch aggregation is the contract.		
Platform Console		Ledger & Accounting	Support Inbox	Website / CMS
Tenant billing, subscriptions, invoicing, and payment collection from tenants. Deferred module.		Multi-currency ledger and FX revaluation in V1. USD only, with capture-time rate stored as metadata.	Full helpdesk suite replacement for Zendesk, Freshdesk, Intercom, or Crisp.	A freeform drag-and-drop page builder. The constrained section editor is the deliberate limit.
Module marketplace and self-serve module installation UI.		Deferred revenue schedules and a full accrual accounting engine.	Live chat widget in V1.	E-commerce beyond the challenge checkout deep link.
Per-tenant dedicated infrastructure provisioning from the console.		QuickBooks, Xero, or NetSuite integrations. CSV export only in V1.	AI support bot, AI summarization, and suggested replies.	Multi-language sites in the first iteration.
White-label console for resellers or partners.		Automated tax calculation and filing support.	Knowledge base and FAQ article management.	A/B testing and personalization.
Tenant-to-tenant data migration tooling inside the console.		Inter-company or inter-tenant accounting.	Complex auto-assignment rules and round-robin routing.	Membership or gated content beyond the existing trader portal.
Automated tenant onboarding email sequences. V1 onboarding is manual and sales-led.		Budgeting and forecasting tools.	Customer satisfaction surveys.	Custom code injection by tenants, including arbitrary scripts and iframes, for security reasons.
Platform-level feature experimentation and A/B testing UI.		Real-time profit and loss dashboards beyond what Analytics reads from ledger balances.	Voice, WhatsApp, and SMS support channels.	Email capture popups and exit-intent tooling. Marketing automation belongs to CRM.
A public status page managed from the console.		Editing or deleting posted journal entries. Corrections happen only through reversing adjustments.	Public support portal outside the trader dashboard.	Hosting tenant-owned external applications or arbitrary backends on tenant subdomains.
			Multi-brand helpdesk routing beyond tenant scoping.	
			SLA contractual reporting for external enterprise tenants.	
			Full Telegram two-way support sync in V1 unless explicitly approved after the first cutover.	
Competition / Gamification		Tenant Billing	BYO Integration SDK	Advanced API / Developer Portal
Real-time tick-level leaderboard updates in the first iteration. Batch per sync cycle is the contract.		Self-serve tenant signup funnel in the first iteration. Onboarding stays sales-led with billing recorded manually or via manual contract mode.	Official SDKs beyond two languages at launch. Go, PHP, and Java arrive only on demonstrated demand.	A public marketplace with revenue share on partner integrations.
		Complex revenue recognition schedules. Invoices only; recognition stays with the accountant process.	A GraphQL public API.	Per-call API monetization in the first iteration. Plan-based quotas only.
Social trading, signal marketplaces, and copy-follow features.		Multi-currency billing beyond USD in the first iteration.	A partner marketplace listing third-party integrations.	Mobile SDKs for external developers.
		Reseller and partner revenue-share billing.	White-glove integration engineering as a standard offering. Professional services only.	Self-serve partner onboarding with automated legal contracts.
Wagering or real-money entry pools beyond fixed entry fees, which would raise gambling regulation issues.		Automated tax engines such as Avalara or TaxJar. V1 uses manual tax fields on invoices.	Real-time streaming public feeds such as WebSocket event streams in the first iteration.	AI-assisted integration builders and codegen copilots.
Cross-tenant platform-wide competitions in the first iteration. Competitions are tenant-scoped.		Tenant credit balances, prepaid credits, and wallet systems.	Mobile client SDKs.	Multi-region API endpoints and developer-selectable data residency.
NFT or tokenized badges and tradable achievements.		Per-feature metered pricing beyond the defined counters, except pass-through costs at P2.	Guaranteed client code generation beyond publishing the OpenAPI specification.	SLA-backed enterprise API tiers with contractual uptime, until platform maturity justifies them.
		B2B chargeback dispute workflows beyond recording the event.	Multi-region sandbox environments.	Replacing REST with GraphQL. REST remains the primary public contract.
		Contract e-signature integrations.		
Automated prize procurement and physical goods fulfillment.				
Sponsorship and advertising placement management inside competitions.				
Bracket-style tournament formats. The first iteration ships ranked leaderboard competitions only.
